Semester : First

Subject Title : English

Subject Code : 17101

Teaching and Examination Scheme:

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS.	TH	PR	OR	TW	TOTAL
03	--	02	03	100	--	--	25@	125

NOTE:

- Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

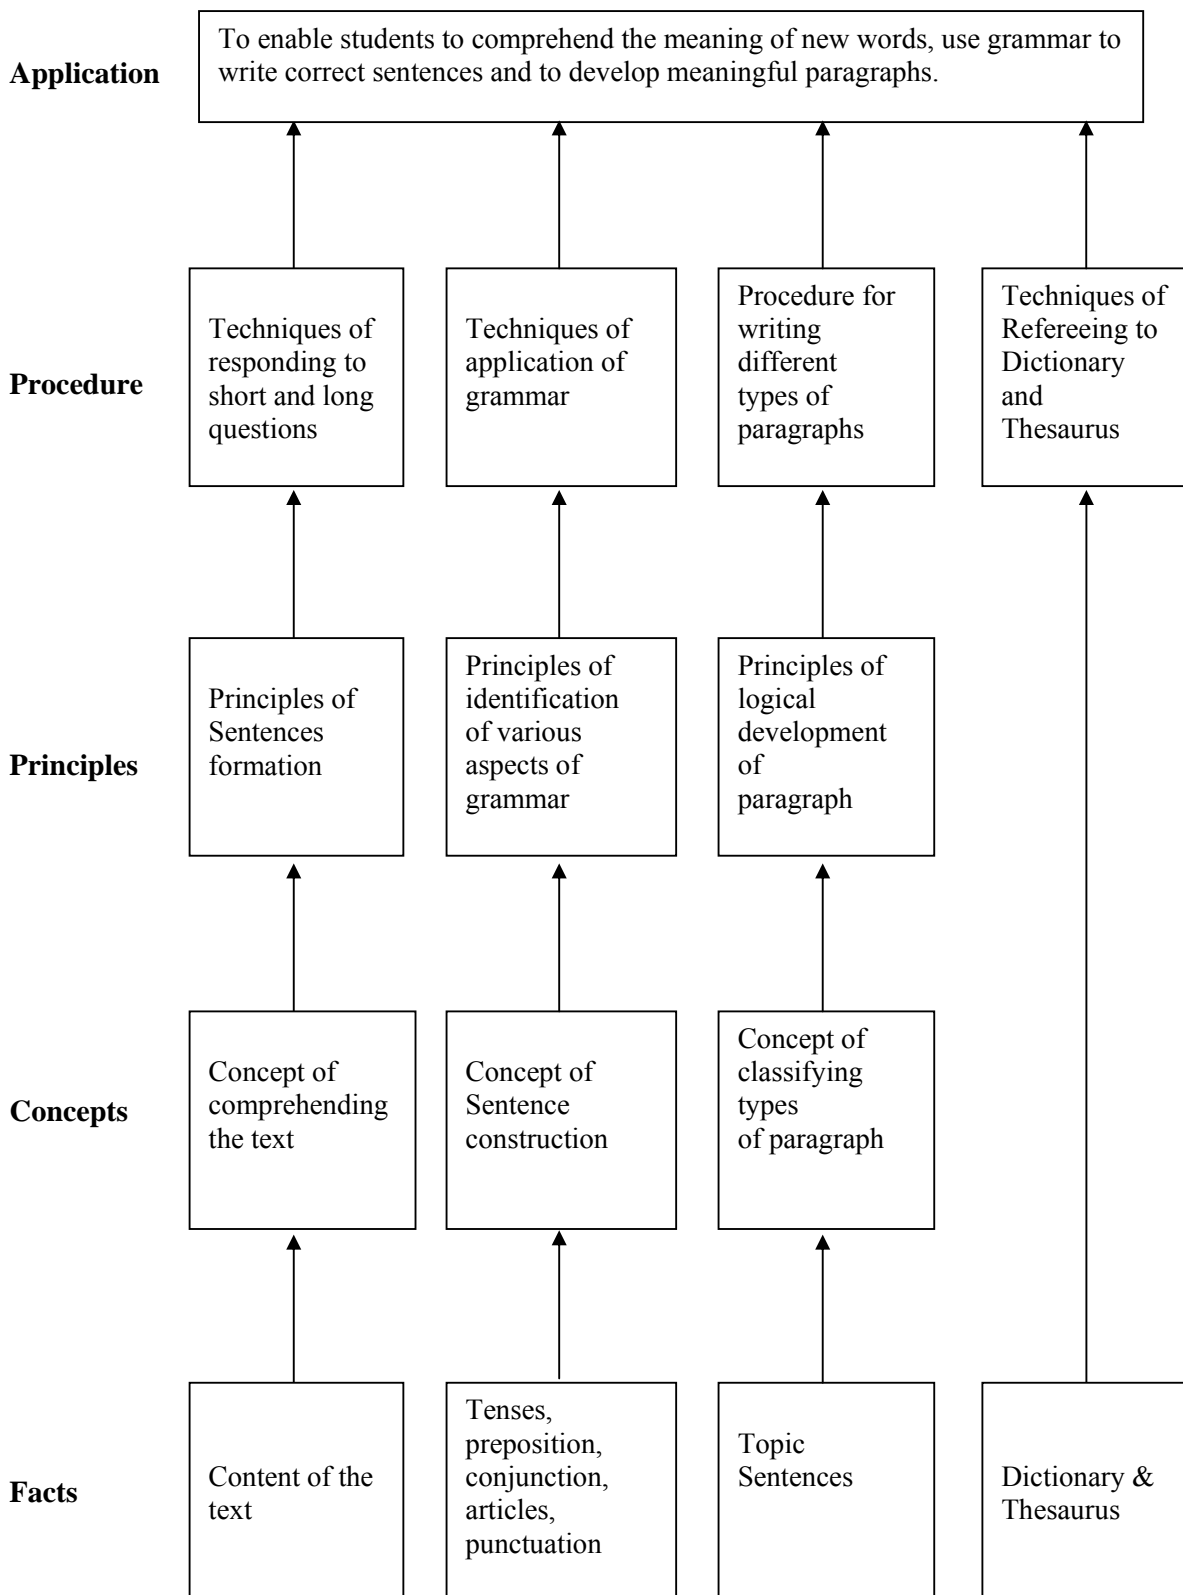

Rationale:

The most commonly used medium to express oneself is language. English, being a global language, is used in all the spheres of human life i.e., personal, professional and social. A diploma student is expected to be proficient in English language and pursue the existing course of study to handle the future jobs. The content of the text includes the aspects related to language skills.

General Objectives:

Students will be able to;

1. Develop vocabulary.
2. Apply the rules of grammar.
3. Comprehend the given unseen passage.

Learning Structure:

CONTENTS: Theory

Name of the Topic	Hours	Marks
PART I - Application of Grammar Specific Objective: <ul style="list-style-type: none"> ➤ Apply grammatical rules to form correct sentences. Contents: <ul style="list-style-type: none"> ▪ Articles: Appropriate use of definite and indefinite Articles ▪ Prepositions: To use correct Prepositions as per context ▪ Conjunctions: Co-ordinating and sub-ordinating Conjunctions ▪ Tenses: Correct usages of past, present and future tenses ▪ Active and Passive voice: Use of Active and Passive voice ▪ Direct and Indirect sentences: Conversion of direct into indirect sentence and vice versa 	12	24
PART II – Text Specific Objectives: <ul style="list-style-type: none"> ➤ Answer the questions based on the articles ➤ State the meanings of the given words from the articles Contents: <ul style="list-style-type: none"> ▪ Articles 	20	32
PART III - Paragraph Writing Specific Objective: <ul style="list-style-type: none"> ➤ Write a paragraph on a given topic Contents: <ul style="list-style-type: none"> ▪ Paragraph Writing: Elaborate and expand the ideas with cohesion, coherence and use of correct punctuation marks ▪ Types of Paragraph: Narrative, Descriptive, Technical, Comparison and Contrast ▪ Dialogue Writing: Based on various situations ▪ Speech Writing based on situations: Welcome Speech, Farewell Speech, Vote of Thanks and Introducing a Guest 	06	16
PART IV – Comprehension Specific Objective: <ul style="list-style-type: none"> ➤ Comprehend and provide the answers on given passages Contents: <ul style="list-style-type: none"> ▪ Comprehension of Passage: Comprehending questions and writing the answers on unseen passages 	04	12
PART V- Vocabulary Building Specific Objective: <ul style="list-style-type: none"> ➤ Use correct words in given situations Contents: <ul style="list-style-type: none"> ▪ Words Often Confused 	06	16

<ul style="list-style-type: none"> ▪ Collocation ▪ Prefix and Suffix ▪ Synonyms and Antonyms 		
Total	48	100

Skills to be developed in practicals:**Intellectual Skills:**

1. Select appropriate words/verbs and formulate correct sentences
2. Develop ability of correct pronunciation
3. Report writing skills

Assignments:

Journal consists of the following assignments:-

1. Punctuate 25 sentences given by the teacher.
2. Rewrite the passage/passages with correct form of verbs. [Teacher is expected to give passage /passages of verbs used wrongly [at least 25 verbs.]
3. Write 15 synonyms and 15 antonyms with the help of the thesaurus.
4. Write a paragraph each on descriptive, narrative, comparison, contrast and technical type in 75 to 100 words.
5. Write 10 words of prefixes and 10 words of suffixes and use them in sentences.
6. Select one news from any English newspaper. The news may be from any one of the following areas – Social, environmental, financial, economics, sports, etc. Prepare a summary of the news and make it presentable by using relevant photographs/graphics.
7. Students will be given ten collocations, develop three sentences for each collocation.

NOTE: The following assignment should be performed in the Language Laboratory/with the help of interactive media.

8. Listen and practice the dialogues with the help of interactive media/ interactive software.

Subject Title : Basic Science (Physics)

Subject Code : 17102

Teaching and Examination Scheme:

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
02	--	02	02	50	25@	--	--	75

NOTE:

- Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work. (SW)
- Students should compulsory appear for Basic Science (Physics) & Basic Science (Chemistry) theory examination. There should be combined passing for the subject (40/100). Remaining absent in any examination of any part will not be declared successful for that examination head.
- Students should compulsory appear for Basic Science (Physics) & Basic Science (Chemistry) practical examination. There should be combined passing for the subject (20/50). Remaining absent in any examination of any part will not be declared successful for that examination head.

Rationale:

Physics is a foundation of all core technology subjects. Study of science and technology goes hand in hand. Technical knowledge can be gained more effectively using concepts of Physics. Curriculum of Engineering Physics includes fundamental concepts used in industrial applications.

Study of various properties of matter is helpful in the study of Strength of Material, Fluid mechanics, Fluid power etc., and selection of lubricant for machine parts. Property of Surface tension is applicable in Paint industry and capillarity phenomenon is useful in plumbing.

Thermal properties of matter are applicable in study of various core technology subjects like Thermal Engineering, Heat Transfer etc. Optical phenomena such as refraction and dispersion are required in higher study as well as in industry such as in characterization of material using Spectroscopy, X-ray diffraction (XRD), Atomic Force Microscopy (AFM).

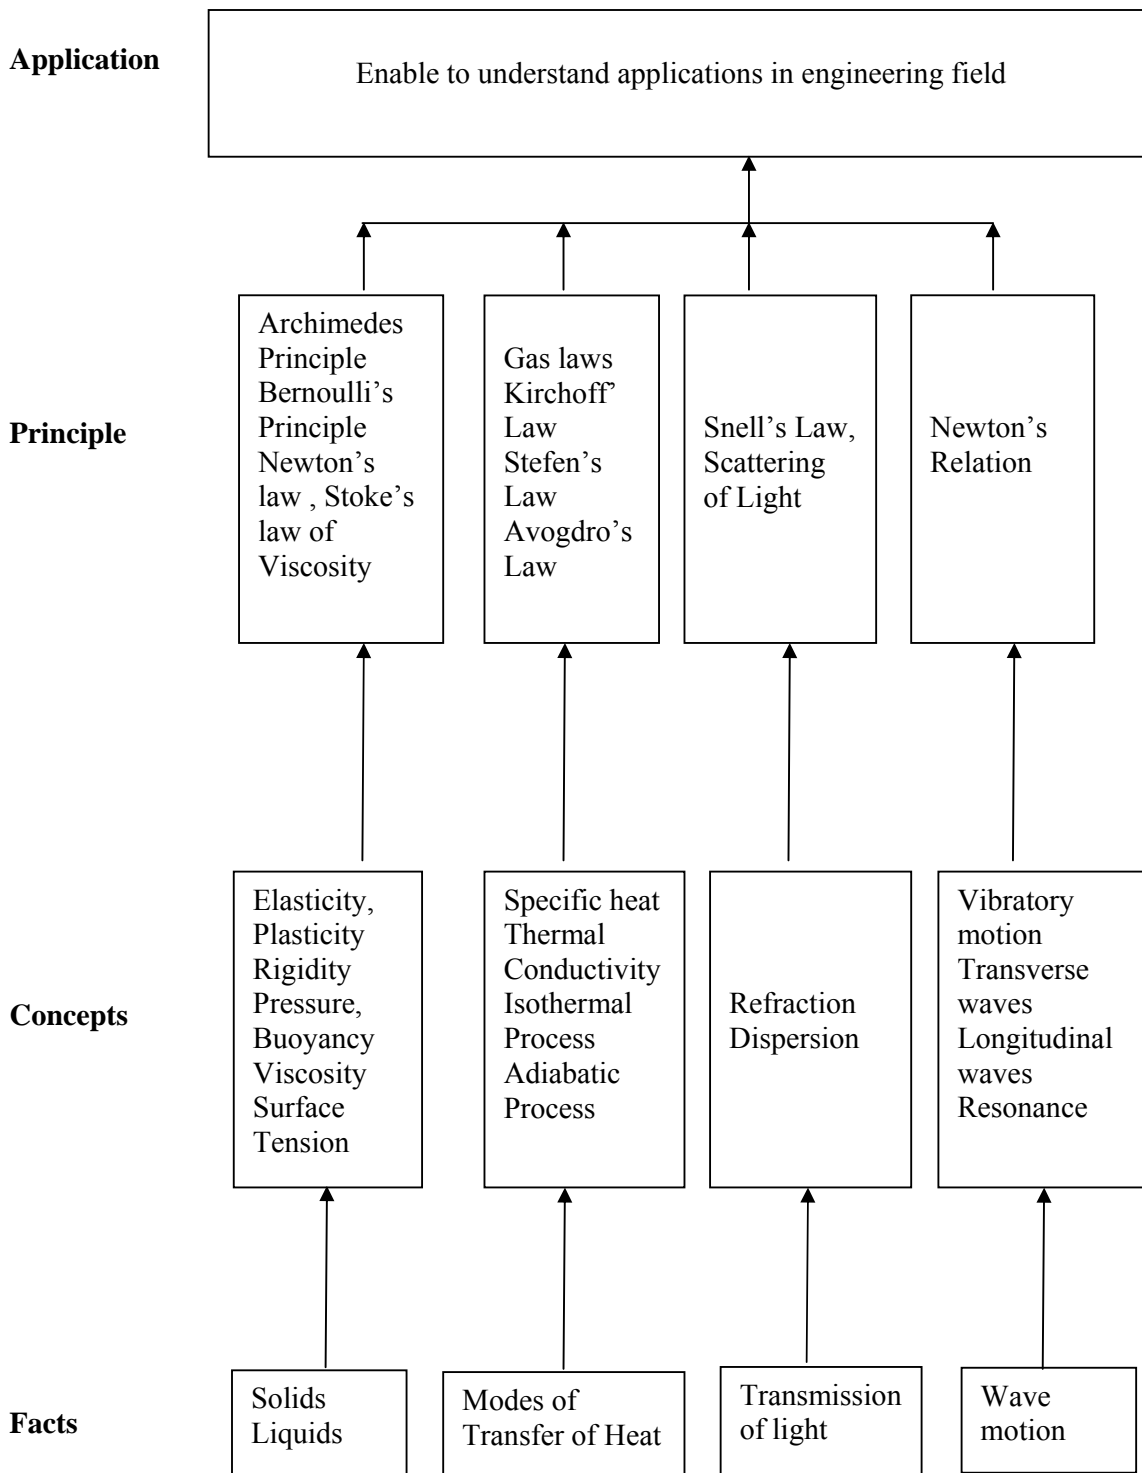

Study of wave motion, Simple Harmonic Motion and their behavior is useful in field of Civil Engineering, Electronics & Communication Engineering, Mechanical Engineering and Electrical Engineering.

Principle of Photocell and its applications are required in study of Solar cells, Photovoltaic cells.

General Objectives: Student will be able to:

1. Understand method of selection of material for intended purpose.
2. Apply knowledge of good and bad conductors of heat in various engineering concepts.
3. Know the effect of interference between light waves.

4. Apply knowledge of characteristics of wave motion and resonance in engineering applications.
5. Apply Concept of photoelectric effect for applications like photovoltaic cell, Solar cell.

Learning Structure:

Theory:

Topic and Contents	Hours	Marks
Topic 1] Properties of solids: Specific Objectives <ul style="list-style-type: none"> ➤ Calculate the Young's Modulus of material of wire. • Elasticity: Definitions of deforming force, restoring force, elasticity, plasticity, Factors affecting elasticity. • Stresses: Tensile, Compressive, Volumetric and Shear stress, • Strains: Tensile, Volumetric and Shear strain. • Elastic limit, Hooke's law. • Elastic co-efficient- Young's modulus, bulk modulus, modulus of rigidity and relation between them • Stress -strain diagram, behavior of wire under continuously increasing load, yield point, ultimate stress, breaking stress, factor of safety. compressibility, Poisson's ratio. 	05	08
Topic 2] Properties of liquids Specific objectives: <ul style="list-style-type: none"> ➤ Determine the surface tension of the given liquid ➤ Determine the coefficient of viscosity by Stoke's method. 2.1 Fluid friction: [8 Marks] <ul style="list-style-type: none"> • Pressure , pressure-depth relation ($P = \rho h g$), atmospheric pressure, Pascal's law, Archimedes's principle. • Viscous force, definition of viscosity, velocity gradient, Newton's law of viscosity, coefficient of viscosity and its SI unit. • Streamline and turbulent flow with examples, critical velocity, Reynold's number and its significance. • Up thrust force, terminal velocity, Stokes law, and derivation of coefficient of viscosity by Stoke's method, effect of temperature and adulteration on viscosity of liquid. 2.2 Surface tension : [4 Marks] <ul style="list-style-type: none"> • Cohesive and adhesive force, Laplace's molecular theory of surface tension, Surface Tension: definition and unit, effect of temperature on surface tension. • Angle of contact, Capillarity and examples of capillary action, derivation of expression for surface tension by capillary rise method, applications of surface tension. 	09	12
Topic 3] Thermal properties of matter: Specific objectives: <ul style="list-style-type: none"> ➤ Distinguish between isothermal and adiabatic process. ➤ Determine the relation between specific heats. 3.1 Modes of transformation of heat : [6 Marks] <ul style="list-style-type: none"> • Difference between heat and temperature, definition of calorie, Absolute zero, units of temperature: °C, °F, °K, with their conversion. • Conduction, law of thermal conductivity, coefficient of thermal conductivity, good conductors of heat & insulators with suitable examples, applications of conduction. Convection, applications of convection. Radiation, applications of radiation. 3.2 Gas laws: : [6 Marks] <ul style="list-style-type: none"> • Gas Laws: Boyle's law, Charles law, Gay lussac's law (Statement and 	08	12

mathematical equation only) • Perfect gas equation ($PV=RT$) (No derivation), specific heat of a substance, SI unit, specific heat of gas at constant volume (C_V) specific heat of gas at constant pressure (C_P), ratio of specific heat, Mayer's relation between C_P and C_V , isothermal process, adiabatic process, difference between isothermal process and adiabatic process.		
Topic 4] Optics Specific objectives: <ul style="list-style-type: none"> ➤ Calculate refractive index of prism. ➤ Determine the numerical aperture of optical fiber Refraction of light : [6 Marks] <ul style="list-style-type: none"> • Refraction of monochromatic light, Snell's law, Derivation of prism formula, total internal reflection, critical angle. • Optical fibre: principle, structure of optical fiber, propagation of light wave through optical fibre, derivation of numerical aperture and acceptance angle. 	04	06
Topic 5] Wave motion Specific objectives: <ul style="list-style-type: none"> ➤ Differentiate between transverse waves and longitudinal waves ➤ Derive expression for displacement, velocity and acceleration of a body executing SHM 5.1 Wave motion : [6 Marks] <ul style="list-style-type: none"> • Definition of a wave, wave motion, wave velocity, wave period, wave frequency, wave length, vibratory motion, periodic motion, amplitude of a vibrating particle, derivation of $v = n \lambda$ • Simple harmonic motion (SHM), examples of SHM, equation of SHM, expression of velocity and acceleration of a body executing SHM. • Types of progressive waves: transverse and longitudinal waves with examples. 5.2 Resonance: [6 Marks] <ul style="list-style-type: none"> • Stationary wave, formation of stationary wave, examples of stationary wave, characteristics of stationary waves, free and forced vibrations with examples. • Resonance: definition of resonance, examples of resonance, formula to calculate velocity of sound by resonance tube method. 	06	12
TOTAL	32	50

Practical:**Skills to be developed****1) Intellectual skills-**

- Select proper measuring instruments
- Verify the principles, laws, using given instruments under different conditions.
- Read and interpret the graph.
- Interpret the results from observations and calculations.

2) Motor skills-

- Handle the instruments.
- Measuring physical quantities accurately.
- Observe the phenomenon and to list the observations in a tabular form.
- Plot the graphs.

List of experiments

1. Know your Physics Laboratory, measuring instruments and interpretation of graph.
2. Measure the dimensions of given objects using vernier caliper.
3. Measure the dimensions of given objects using micrometer screw gauge.
4. Determine Young's modulus of elasticity of metal wire by using Searle's apparatus.
5. Determine coefficient of viscosity of given liquid using Stoke's Method
6. Determine surface tension of liquid by capillary rise method using travelling microscope.
7. Determine the coefficient of thermal conductivity of copper by Searle's method
8. Determine refractive index of liquid by concave mirror.
9. Determine stiffness constant 'K' of a helical spring.

Subject Title : Basic Science (Chemistry)

Subject Code : 17103

Teaching and Examination Scheme:

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
02	--	02	02	50	25@	--	--	75

Note:

- Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work. (SW).
- Students should compulsory appear for Basic Science (Physics) & Basic Science (Chemistry) theory examination. There should be combined passing for the subject (40/100). Remaining absent in any examination of any part will not be declared successful for that examination head.
- Students should compulsory appear for Basic Science (Physics) & Basic Science (Chemistry) practical examination. There should be combined passing for the subject (20/50). Remaining absent in any examination of any part will not be declared successful for that examination head.

Rationale:

Basic Chemistry is the basic science which is essential to all engineering courses. For an engineer, the usage of equipments and instruments would require knowledge of chemical substances, their composition and properties. Hence the content of this subject provides knowledge of engineering materials. This knowledge also aims to bridge the theoretical concepts and their practical engineering applications, thus highlighting the role of chemistry in the field of engineering. It helps in understanding chemical and physical properties of engineering materials.

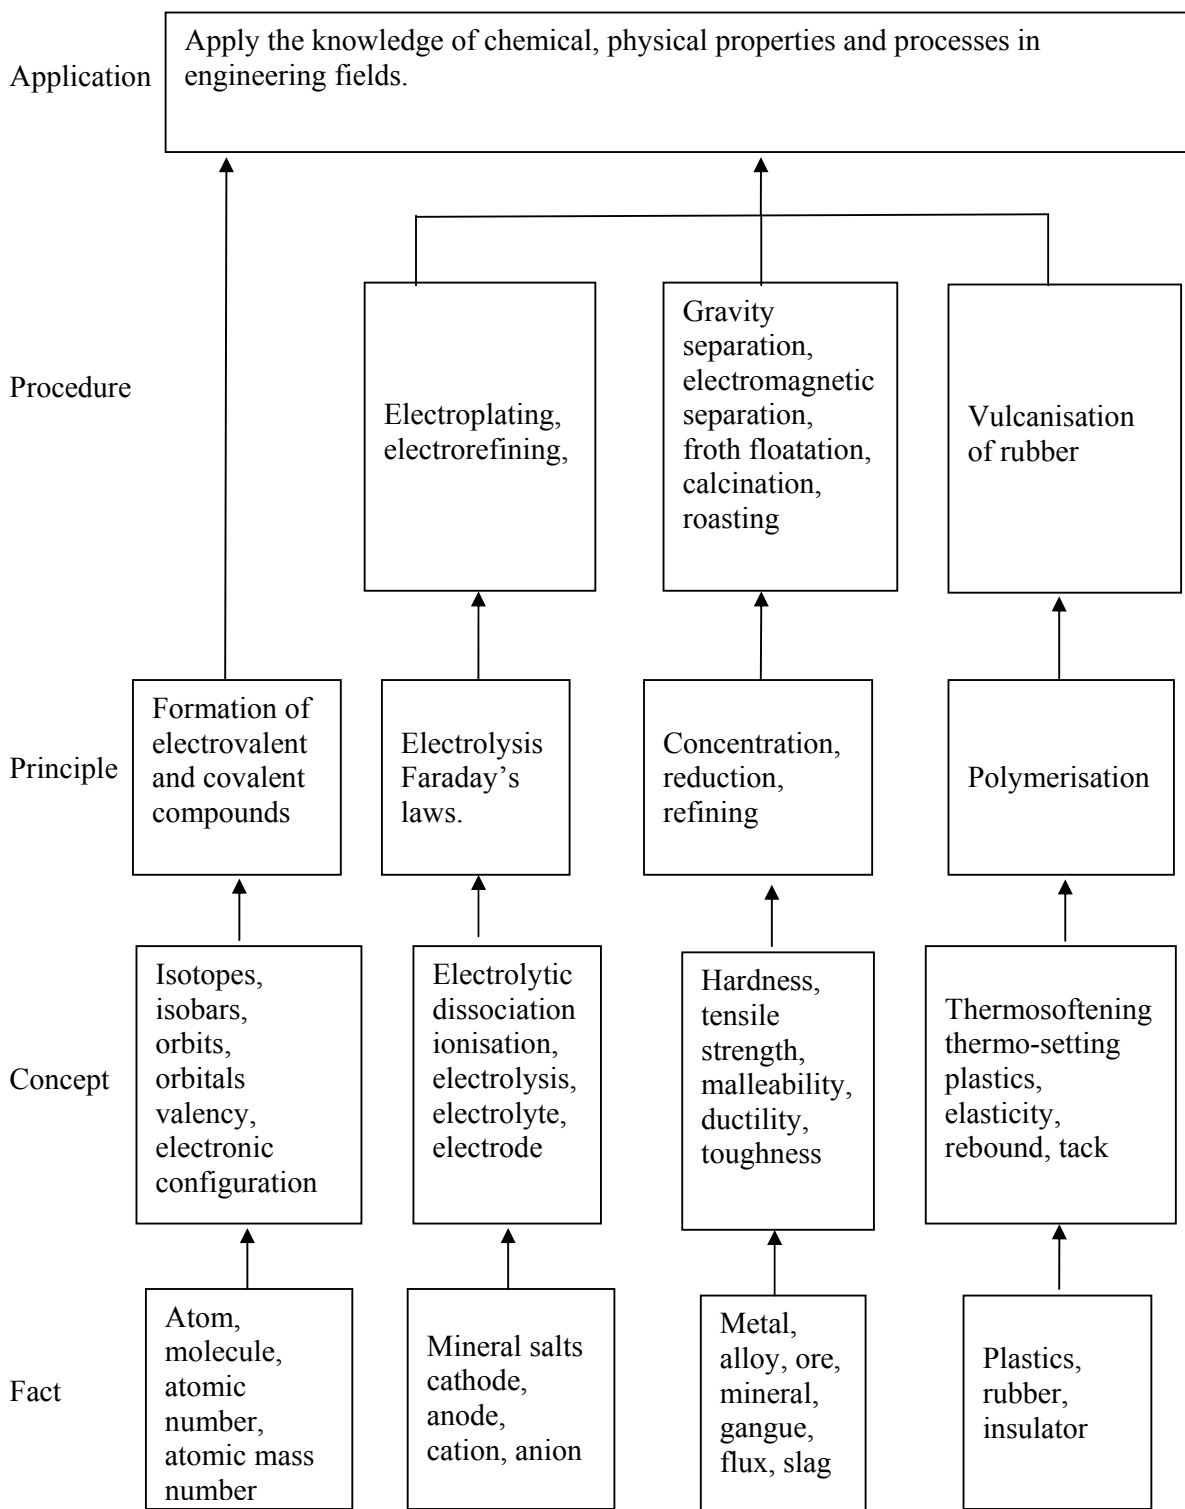

The content of this curriculum has four units which provide the knowledge of chemical bonding, mechanisms of various applications of electrochemistry. It also provides in depth knowledge of extraction processes, properties and applications of metals and alloys. The non-metallic materials like plastics, rubber, insulators are the back bone of developing industries.

General Objectives:

The student will be able to

1. Know the concepts of valence electrons and valency of elements.
2. Apply the knowledge of electrolysis in engineering applications.
3. Understand the formation of various molecules.

4. Apply the properties of metals and alloys in engineering field.
5. Use non-metallic materials in engineering applications.

Learning Structure:

Theory Content:

Topic and Contents	Hours	Marks
Topic 1] Chemical Bonding: Specific Objectives: <ul style="list-style-type: none"> ➤ Predict valence electrons and valency of elements. ➤ Draw schematic diagram for formation of molecules. 1.1 Atomic Structure : [8 Marks] <ul style="list-style-type: none"> • Definition of atom, Bohr's atomic model, structure of modern atom, characteristics of fundamental particles of an atom, definition of atomic number, atomic mass number and their differences, Isotopes and Isobars: Definitions, examples and distinction, applications of carbon and cobalt isotopes. Orbits: Bohr's energy levels, sub-energy levels, s, p, d, f orbitals, shapes and description of s-orbital and p-orbital. Distribution of electrons in orbitals: Definition of electronic configuration, Aufbau's principle, Hund's rule, orbital electronic configurations (s, p, d, f) of elements having atomic number 1 to 30, 1.2 Valency: [4 Marks] <ul style="list-style-type: none"> • Definitions of valence electrons, valency. • Definition of electrovalency, positive and negative electrovalency, formation of Electrovalent compounds-$MgO, CaCl_2$ • Definition of covalency, single, double and triple covalent bonds, formation of Covalent compounds H_2O, CO_2, N_2 	08	12
Topic 2] Electrochemistry: Specific Objectives: <ul style="list-style-type: none"> ➤ Describe the mechanism of electrolysis. ➤ Identify the role of electrodes in application of electrolysis. 2.1 Basic concepts of electrolysis: [4 Marks] <ul style="list-style-type: none"> • Electrolyte, types of electrolyte- strong and weak electrolyte, their difference. • Ionisation and electrolytic dissociation, Arrhenius theory of electrolytic dissociation, degree of ionization, factors affecting degree of ionization. Definitions of electrolytic cell, electrodes-cathode, anode, electrode potential-oxidation potential and reduction potential. 2.2 Electrolysis: [10 Marks] <ul style="list-style-type: none"> • Mechanism of electrolysis- Electrolysis, electrochemical series for cations and anions, • Mechanism of electrolysis of $CuSO_4$ solution by using platinum electrodes and copper electrodes • Applications of electrolysis- Electroplating of silver, electro refining of blister copper, • Faraday's laws of electrolysis: Faraday's first and second law, relation between electrochemical equivalent and chemical equivalent, Numericals. • pH and pOH: Definition of pH, pOH, pH Scale, Numericals. 	10	14
Topic 3] Metals and Alloys: Specific Objectives: <ul style="list-style-type: none"> ➤ Identify the properties of metals and alloys related to engineering applications. ➤ Describe the process of extraction of metals. 3.1 Metals: [8 Marks]	08	12

<ul style="list-style-type: none"> • Occurrence of metals in free and combined state, definitions- mineral, ore, gangue, flux and slag, metallurgy. • Metallurgy- Detailed Flow chart for extraction of metal, • Important extraction processes-Concentration-gravity separation, electro-magnetic separation, froth floatation, calcination and roasting, Reduction-smelting, aluminothermic process, Refining- poling, electrorefining • Mechanical properties of metals- Hardness, ductility, malleability, tensile strength, toughness, machinability, weldability, forging, soldering, brazing, castability. <p>3.2 Alloys: [4 Marks]</p> <ul style="list-style-type: none"> • Definition, purposes of making alloys with examples. • Preparation methods- Fusion, Compression • Classification of Alloys- Ferrous and non ferrous alloys with examples. • Examples of alloys- Composition, properties and applications of duralumin, Woods metal, babbit metal. 		
<p>Topic 4] Non-metallic Engineering Materials:</p> <p>Specific Objectives:</p> <ul style="list-style-type: none"> ➤ Distinguish between thermosoftening and thermosetting plastics. ➤ List the properties of rubber ➤ State the applications of thermal insulators. <p>4.1 Polymers (Plastics, Rubber) : [8 Marks]</p> <ul style="list-style-type: none"> • Plastics: Definition of plastic, polymer, polymerisation, types of polymerisation with examples. Types of plastic- thermo softening plastics and thermosetting plastics and their difference, properties and applications of plastics. • Rubber: Types of rubber. • Natural Rubber- definition, drawbacks of natural rubber, vulcanization of rubber with chemical reaction, applications of vulcanized rubber. Synthetic rubber- definition, difference between natural and synthetic rubber, examples of synthetic rubber, properties of synthetic rubber like - elasticity, tack, and abrasion resistance, their definition and related applications. <p>4.2 Thermal Insulators [4 Marks]</p> <ul style="list-style-type: none"> • Thermal Insulators -Definition, characteristics of thermal insulators, classification- organic and inorganic thermal insulators, their examples, preparation, properties and applications of thermocole and glasswool. 	06	12
Total	32	50

Practical:**Intellectual Skills:**

1. Analyse given solution and to find the chemical properties of metallic and non-metallic ions.
2. Interpret the results of experiments or numerical values.
3. Understand the set up of the experiment.
4. Verify the laws and characteristics.

Motor Skills:

1. Handle various laboratory reagents.
2. Accurately measure proper quantity of various chemicals.
3. Observe correct colour of precipitate, evolution of gas.
4. Connect electrical circuit as per the circuit diagram.

5. Proficiently handle apparatus and equipments to perform experiments.
6. Observe the completion of reaction.

List of Experiments:

Sr. No.	Name of the experiment
1	Know your Chemistry laboratory and prepare sample solutions of different concentrations.
2	Determine the basic radical (metallic ion) and acidic radical (non-metallic ion) by qualitative analysis of given salt solution no-1.
3	Determine the basic radical (metallic ion) and acidic radical (non-metallic ion) by qualitative analysis of given salt solution no-2.
4	Determine the basic radical (metallic ion) and acidic radical (non-metallic ion) by qualitative analysis of given salt solution no-3.
5	Determine the basic radical (metallic ion) and acidic radical (non-metallic ion) by qualitative analysis of given salt solution no-4.
6	Determine the basic radical (metallic ion) and acidic radical (non-metallic ion) by qualitative analysis of given salt solution no-5.
7	Calculate the electrochemical equivalent of copper by electrolysis of copper sulphate solution using copper electrodes.
8	Determine pH value of given solutions by using pH paper, universal indicator and pH meter.
9	Prepare Phenol formaldehyde resin used in manufacturing of Bakelite plastic.

Course Name : All Branches of Diploma in Engineering and Technology.

**Course Code : AE/CE/CH/CM/CO/CR/CS/CW/DE/EE/EP/IF/EJ/EN/ET/EV/EX/IC/IE/IS/
ME/MU/PG/PT/PS/CD/CV/ED/EI/FE/IU/MH/MI/FG/FC/AA**

Semester : First

Subject Title : Basic Mathematics

Subject Code : 17104

Teaching and Examination Scheme:

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
04	01	--	03	100	--	--	--	100

Notes:

- **Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.**
- **Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).**

Rationale:

Mathematics is the foundation of science and technology. The study of basic mathematics is helpful to understand concepts of Engineering. This subject enhances logical thinking capability. It also improves the systematic approach in solving engineering problem.

Algebra provides the language and abstract symbols of mathematics. It also helps to use that Language in real-life applications.

Matrix and Determinant topics are helpful for finding optimum solution of system of simultaneous equations which are formed in the various branches of engineering using different parameters.

Trigonometry is the study of triangles and angles.

Geometry gives emphasis on understanding the deductive reasoning process. It includes writing derivations of theorems and giving geometric relationships by reasoning. Co-ordinate geometry plays an important role in Animation, AutoCAD, Computer graphics etc. Contents of this subject will form foundation for further study in mathematics.

General Objectives:

Student will be able to:

1. Apply Cramer's rule and matrix method to solve simultaneous equations in three variables.
2. Use concept of allied angle, compound angle, multiple and sub-multiple angles to solve engineering problems.
3. Use factorization and de-factorization formulae to solve examples.
4. Understand the relationship of two variables.

Learning Structure:

Theory

Topic and Contents	Hours	Marks
Topic - I Algebra		
1.1 -Determinant ----- 04 Specific objectives: <ul style="list-style-type: none"> ➤ Solve simultaneous equations in three variables using Cramer's rule . • Definition and expansion of determinant of order 3 . • Cramer's rule to solve simultaneous equations in three variables. 	04	32
1.2 - Matrices ----- 16 Specific objectives : <ul style="list-style-type: none"> ➤ Perform all algebraic operations on matrices. ➤ Solve simultaneous equations in three variables. • Definition of a matrix of order $m \times n$ and types of matrices. • Algebra of matrices with properties and examples. • Transpose of a matrix with properties. • Cofactor of an element of a matrix. • Adjoint of matrix and inverse of matrix by adjoint method. • Solution of simultaneous equations containing two and three unknowns by matrix inversion method. 	10	
1.3 -Partial Fraction ----- 12 Specific objectives: <ul style="list-style-type: none"> ➤ Find partial fraction of proper and improper fraction. • Definition of fraction, proper, improper fraction and partial fraction. • Resolve proper fractions into partial fraction with denominator containing <ul style="list-style-type: none"> i) non repeated linear factors, ii) repeated linear factors, iii) non repeated quadratic irreducible factors. • To resolve improper fraction in to partial fraction. 	08	

Topic 2- Trigonometry		
2.1 Trigonometric Ratios of Allied, Compound, Multiple and Sub-Multiple Angles ----- 16	10	40
Specific objectives: <ul style="list-style-type: none">➤ Solve examples of allied angle, compound angle, multiple and sub-multiple angles.• Trigonometric ratios of any angle.• Definition of allied angle, compound, multiple and sub-multiple angles.• Trigonometric ratios of above angles with proofs. Simple examples		
2.2 Factorization and De-factorization Formulae ----- 12		
Specific objectives: <ul style="list-style-type: none">➤ Derive factorization and de-factorization formulae to solve examples.• Formulae for factorization and de-factorization with proof and examples.	08	
2.3 Inverse Trigonometric Ratios ----- 12	08	
Specific objectives: <ul style="list-style-type: none">➤ Solve examples of inverse trigonometric ratios.• Definition of inverse trigonometric ratios.• Principal value of inverse trigonometric ratios.• Relation between inverse trigonometric ratios with proof and examples.		
Topic 3- Co –Ordinate Geometry		
3.1 Straight Line ----- 16	10	16
Specific objectives: <ul style="list-style-type: none">➤ Solve problems with given condition.• Angle between two lines with proof. Examples.• Condition of parallel and perpendicular lines.• Point of intersection of two lines, equation of line passing through point of intersection with given condition.• Perpendicular distance between point and line with proof and examples.• Distance between two parallel line with proof and examples.		
Topic 4 - Statistics		
4.1 Measures of Dispersion ----- 12	06	12
Specific objectives : <ul style="list-style-type: none">➤ Find the range, mean deviation, standard deviation and consistency of any data.• Measures of dispersion - range, mean deviation from mean and median, and standard deviation.• Variance and its coefficient.Comparisons of two sets of observations.		
Total	64	100

Tutorials:

Note: 1) Tutorials are to be used to get enough practice.

1) Make group of 20 students and for each group minimum 10 problems are to be given.

List of tutorial:

Sr. No.	Topic for tutorial
1	Determinant.
2	Matrices (Algebra of matrices)
3	Matrices (Adjoint , inverse and solution of equations using matrix inversion method)
4	Partial fraction.
5	Trigonometric ratio of allied, compound, multiple and sub-multiple angles.
6	Factorization and de- factorization formulae.
7	Inverse trigonometric ratios.
8	Straight line.
9	Statistics(Measure of Dispersion)

Learning Resources:**1) Books :**

TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
04	--	04	03	100	50#	--	50@	200

Notes:

- Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

Rationale:

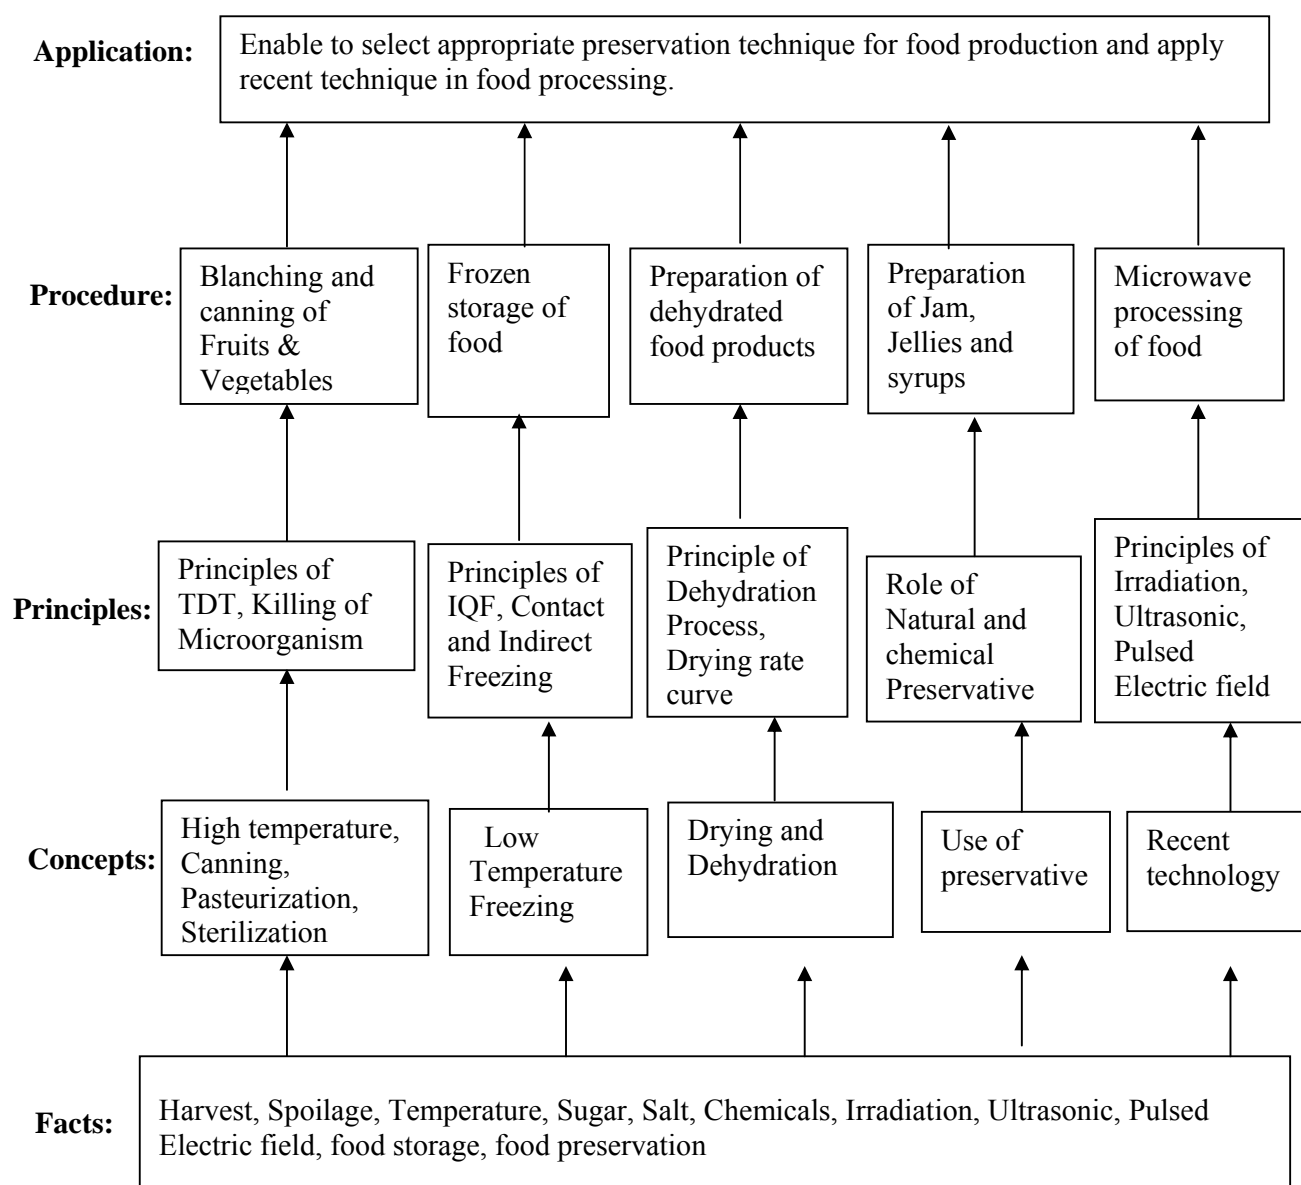

The food preservation and storage has become increasing important today in progress of economical life. Without food preservation life as we know today would be impossible.

Knowledge and skills related to food processing and preservation are essential for the diploma holder in food technology. In this subject, students are exposed to various techniques of food preservation such as high temperature, freezing and thawing of food, moisture removal, chemical and radiation preservation. Relevant skills will also be imparted through this subject

General Objectives:

Students will be able to:

1. Understand principles of food preservation and Techniques' of Food preservation
2. Understand processing conditions during heat processing
3. Understand recent technique of food processing and its application.

Learning Structure:

Contents: Theory

Topic and Contents	Hours	Marks
Topic 1 : INTRODUCTION Specific Objectives: <ul style="list-style-type: none"> ➤ Define the related term in food technology. ➤ Classify the Food on the basis of spoilage ➤ State post harvest treatment in various food. Contents: <p>1.1 Introduction: (Marks-06)</p> <ul style="list-style-type: none"> • Definition of food, food technology, food science, food preservation, Importance of food preservation and processing, classification of foods on the basis of shelf life Basic principles and methods of preservation <p>1.2 Post harvest and storage: (Marks-06)</p> <ul style="list-style-type: none"> • Post harvest technology, Storage of various foods. . Different types of food spoilage (microbial, biochemical and physical) General principles underlying spoilage and its causes 	08	12
Topic 2 : USE OF HIGH TEMPERATURE Specific Objectives: <ul style="list-style-type: none"> ➤ State the principle of food preservation by high temperature ➤ Give process conditions by high temperature processing of foods ➤ Draw process flow sheet of canning ➤ Draw thermal death time curve. Contents: <ul style="list-style-type: none"> • Thermal processing of foods, Thermal Death Time, Heat penetration, factors affecting heat resistance. (Marks-06) • Canning, Pasteurization and Sterilization- Principles, Method, advantages and disadvantages, Effects on foods (Marks-12) 	10	18
Topic 3 : USE OF LOW TEMPERATURE Specific Objectives: <ul style="list-style-type: none"> ➤ State the Principle of food preservation by low temperature ➤ List freezing equipments with process parameter. ➤ Describe process of frozen storage of various food. ➤ Describe construction of freezing equipments Contents: <ul style="list-style-type: none"> • Low temperature required for different foods, types of freezer air blast freezer, multi-plate freezer, Immersion freezing and cryogenic freezing), advantages and disadvantages of freezing, frozen storage and thawing of frozen food (Marks-08) • Slow and quick freezing, IQF freezing. Processing of some frozen products (Frozen peas, fish, sea food sweet corn, resins, okra, eggs etc), freeze drying, (Marks-08) 	10	16
Topic 4 : DRYING AND DEHYDRATION Specific Objectives: <ul style="list-style-type: none"> ➤ State the Principle of food preservation by drying ➤ Draw sketch of drying equipments ➤ Describe construction and working principles of various dryers. Contents: <ul style="list-style-type: none"> • Drying rate curve, Principle, methods of drying, dehydration 	08	14

equipments (Cabinet dryer, tunnel dryer, spray dryer and vacuum dryer etc.) Dehydration of vegetables, fruits and fish , Effects on foods		
Topic 5 : USE OF PRESERVATIVES Specific Objectives: <ul style="list-style-type: none"> ➤ Classify preservatives and its use. ➤ Enlist Natural and Chemical preservative ➤ Draw process flow sheet of Jam, Jellies, Pickles and tomato sauces. Contents: <ul style="list-style-type: none"> • Classification of preservatives, Principles of preservation by salt, sugar and Acids preparation of Pickles, Jams, Jellies, Syrups, Tomato sauces and ketchup. (Marks-14) • Use of chemical preservatives- benzoic acid, Sorbic acid, sulphur dioxide, acetic acid, lactic Acid and others (Marks-08) 	16	22
Topic 6: RECENT TECHNOLOGY OF PRESERVATION. Specific Objectives: <ul style="list-style-type: none"> ➤ Give advantages and limitation of Irradiation. ➤ State the principles of Ultrasonic processing & Pulsed Electric. Contents: <p>6.1 Irradiation- Principle, uses, dose levels, Advantages and disadvantages (Marks-04)</p> <p>6.2 Other methods: Principles Uses, Advantages of High pressure processing technology, Non thermal Processing, Ultrasonic processing, Pulsed Electric, Magnetic field in food processing (Marks-14)</p>	12	18
Total	64	100

Practical:**Skills to be developed:****Intellectual Skills:**

1. Proper selection of preservative for food preservation
2. Proper selection of equipment & method of food preservation

Motor Skills:

1. Preparation of different food product by application of principles of food preservation.

List of Practical's:

1. Demonstration of Fruit and vegetable processing equipments.
2. Blanching of seasonal fruits and vegetables
3. Preservation of seasonal fruits and vegetables by Freezing.
4. Preservation of seasonal fruits and vegetables by dehydration.
5. Preservation of seasonal vegetables by Fermentation process. (Pickles)
6. Preparation and analysis of sugar syrup and brine
7. Preservation of seasonal fruits and vegetables by Canning process.
8. Preservation of foods using sugar and acid and heat e.g. Jam, jellies etc

9. Preservation of foods using chemicals and heat e.g. Tomato sauces / ketchup etc
10. Preservation food by using salt e.g. salted fish, meat etc.
11. Preservation food by using osmotic drying.
12. Observation Chilling injuries on fruits and vegetables by freezing process.
13. Visit any one Fruit / vegetable / fish processing Industry

Learning Resources:**Books:**

TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
02	--	--	02	50	--	--	--	50

Notes:

- Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

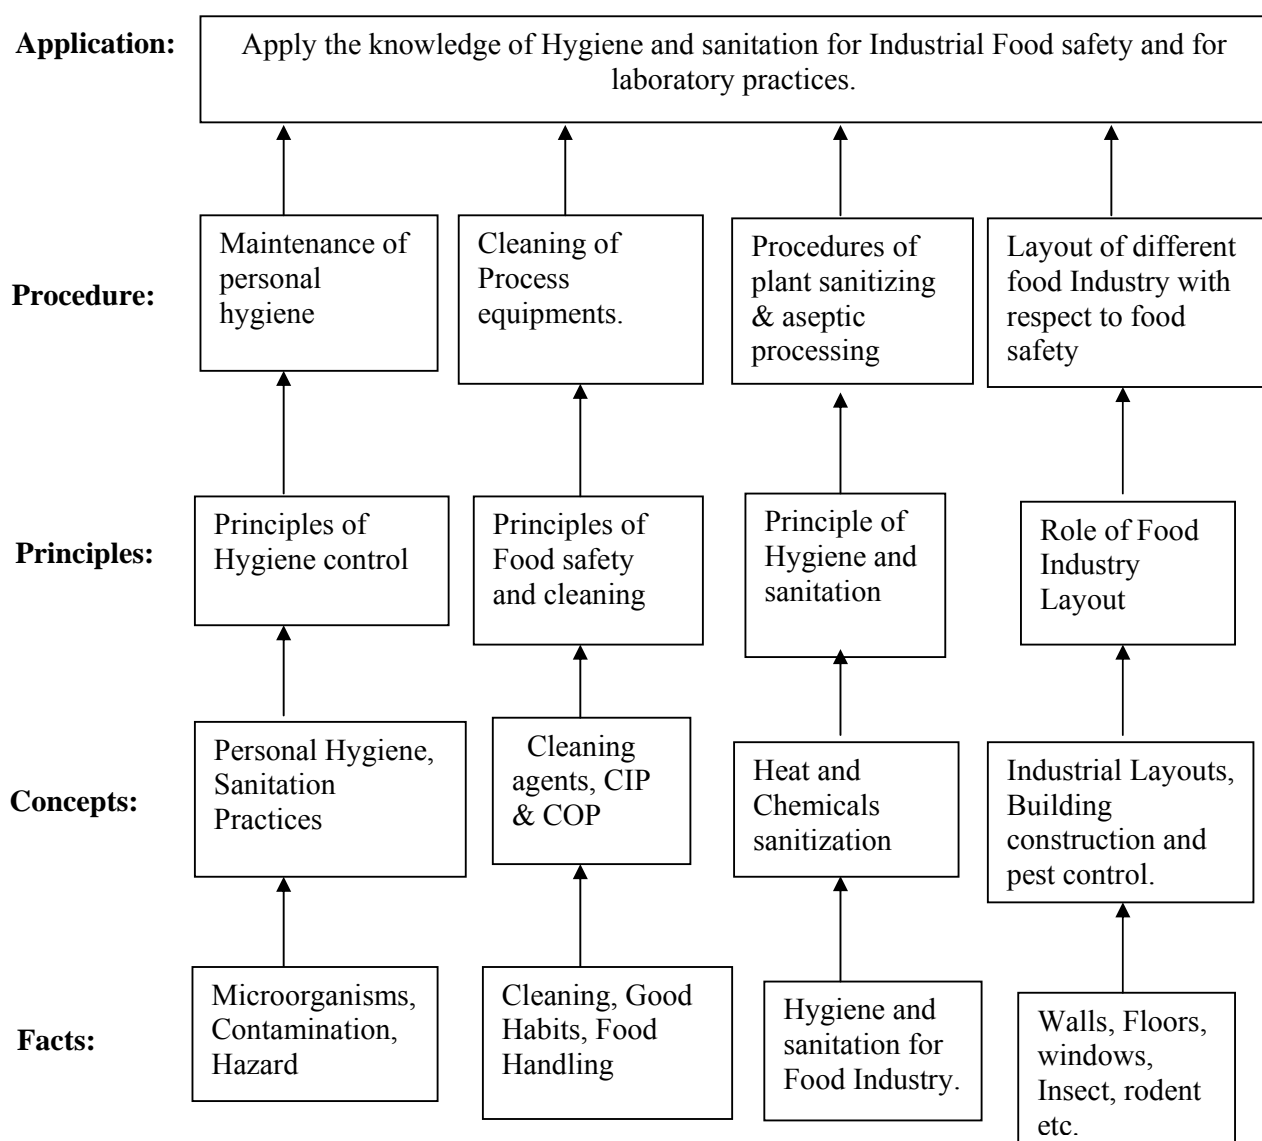

Rationale:

In spite of all the efforts made the number of food poisoning cases reported each year is on the increase at an alarming rate. Keeping in mind above fact it has become important that all food handlers understand and implement the basic principles of food sanitation to avoid food borne illnesses. Food technologist should understand the importance of personal hygiene, must acquire the skill for safest processing methods, plant sanitation practices and skill for managing waste disposal & treatment. This subject covers personal hygiene, aseptic & food processing & safe food handling, water treatment plant sanitation methods, waste disposal & treatment.

General Objectives:

The student will be able to,

- a) Understand importance of hygiene and sanitation in food industry.
- b) Understand the sanitation practices involved in food industry.
- c) Understand hygienic food handling in all type of food operations

Learning Structure:

Contents: Theory

Topic and Contents	Hours	Marks
Topics 1: GENERAL PRINCIPLES OF HYGIENE Specific Objectives: <ul style="list-style-type: none"> ➤ Define the Cleaning, Food hygiene and sanitation ➤ State principle of food hygiene. ➤ Give the importance of Food hygiene Contents: <ul style="list-style-type: none"> • Importance of food hygiene and sanitation Definition & Importance of food hygiene, Nature of food hazard, Good hygiene control, Contamination of food and protective against contamination. • General principles of food hygiene viz. aseptic processing, packaging and storage, 	04	06
Topics 2: PERSONAL HYGIENE AND FOOD HANDLING Specific Objectives: <ul style="list-style-type: none"> ➤ Give the importance of personal hygiene ➤ List for good hygienic practices. ➤ Know them clear their role in sanitary food handling. Contents: 2.1 Personal hygiene (Marks-06) <ul style="list-style-type: none"> • Necessity of personal hygiene, Personal appearance of food handler during food processing. • Sanitary practices-Bathing, hair, eyes, teeth, & mouth, hands, fingernails, jewelers, feet & footwear • Protective clothing & uniform Importance of rest ,exercise & recreation 2.2 Food handling habits (Marks-06) <ul style="list-style-type: none"> • List of Good habit of food handling(wearing aprons, mask, gloves, cap, cleaning hands before & after work) • List of Bad habits(coughing, sneezing, smoking, nose picking, handshaking, washing hands in sink used for food preparation, testing of food with spoon, chewing gum ,blowing on food or packaging material, use of dirty handkerchief) • Role of employee in sanitary food handling, Selection criteria of employee to work in food industry(Any five fact) 	06	12
Topics 3:- CLEANING AND SANITIZING OPERATIONS Specific Objectives: <ul style="list-style-type: none"> • Identify the different processes that can be used to clean and sanitize • Describe procedures used to clean in food industry. Contents: 3.1 Cleaning (Marks-06) <ul style="list-style-type: none"> • Principles of cleaning , cleaning agents and methods, CIP, Factors affecting cleaning, Detergents for cleaning, concentration of detergents and cleaning frequency 3.2 Sanitizing (Marks-06) <ul style="list-style-type: none"> • Principles of sanitizing, Heat sanitation, Chemical sanitation and Cleaning Environment area 	08	12

Topics 4: HYGIENE AND SANITATION IN FOOD SERVICE ESTABLISHMENTS Specific Objectives: <ul style="list-style-type: none"> Types of hazards associated with food Design and implementation of food safety management Contents: 4.1 Introduction (Marks-06) <ul style="list-style-type: none"> Sources of contamination, General Principles of Food Hygiene (GHP), Sanitization practices and procedures in food plant operations, legal aspects of food hygiene and sanitation 4.2 Planning, layouts and sanitation (Marks-06) <ul style="list-style-type: none"> Building construction consideration, processing and design consideration, Pest control and construction material-In fruit and vegetable Industry, meat and poultry Industry, bakery Industries and Dairy Industry. 4.3 Pest control-Insect Destruction, Rodents, Birds, Cockroaches and use of pesticides (Marks-04)	10	16
Topics 5: SAFTY AT THE WORK PLACE Specific Objectives <ul style="list-style-type: none"> List types of accidents and their precautions Contents: <ul style="list-style-type: none"> Introduction, How to accidents take place, Types to Accidents, common types of injuries, fire safety, fire extinguishers, Precautions to prevent accidents. General Practice in food laboratory. 	04	04
Total	32	50

*** On Line Examination**

Rationale:

Since early 21st Century the use of Computer has been so rapidly that it is difficult to think of an area where computers are not being used. It is very desirable that everyone should have good knowledge of computer.

Main purpose of this subject is how to use a computer for basic needs. This subject covers application softwares like MS-Word, MS-Excel, MS- PowerPoint.

It is a gateway to wonderful world of information and part of various applications like business, academic, hospitals, construction, designing, chemical fields and many more.

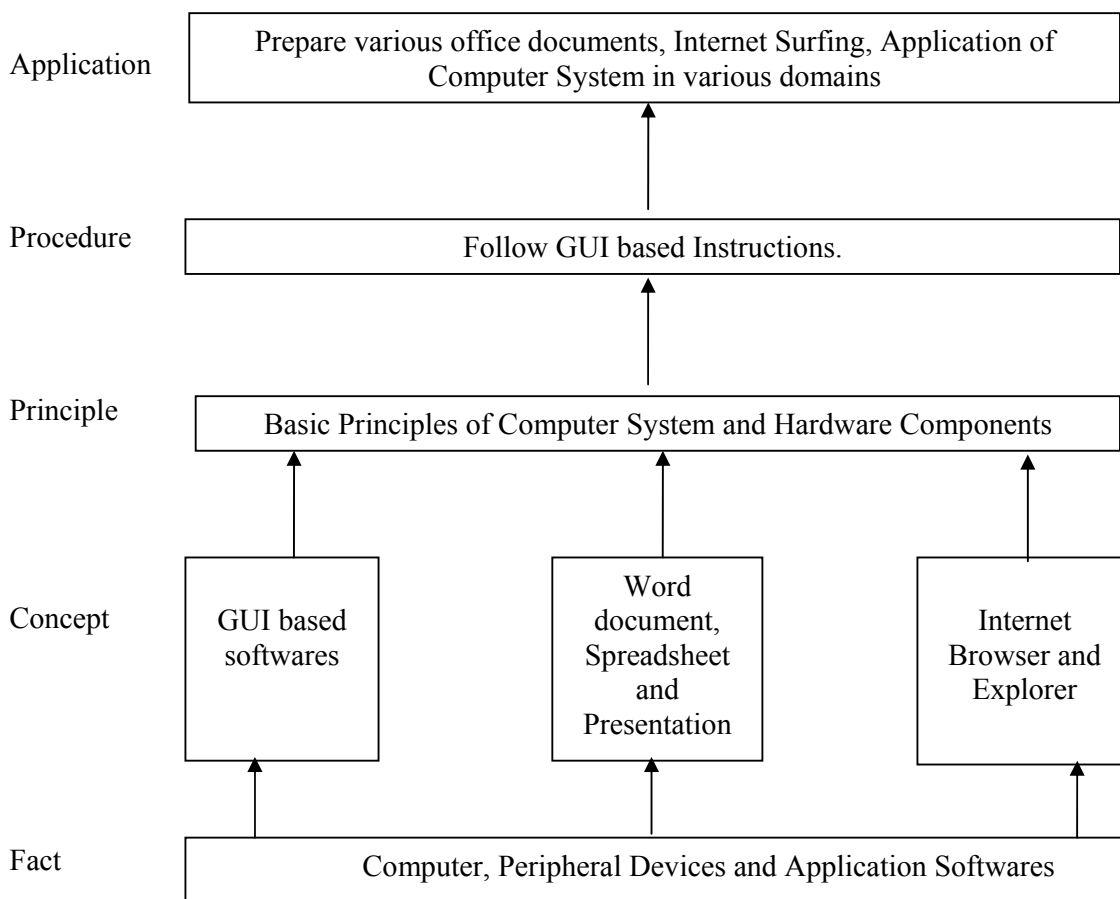

Intellectual Skills:

Students should be able to:

1. Use of Operating System.
2. Use MS- Word, MS-Excel, MS- PowerPoint, efficiently for documentation.
3. Use browser for accessing Internet.

Motor Skills:

Handle Personal Computer System.

Learning Structure:

Contents:**Note:**

1. It is suggested that the separate batch should be formed for students having less computer background.
2. Contents of theory are to be taught in practical period with the help of LCD projector.

Sr. No	Activity/Topics	Hours
1	<ul style="list-style-type: none"> • Algorithms-Introduction, Three Basic Operations, Procedures and Programs 	1
2	<ul style="list-style-type: none"> • Data Representation- Representing different symbols, minimizing errors, Representing more Symbols, Generic Formula, the ASCII code, the EBCDIC code, Rules of Decimal number System and its conversion to binary • Multimedia- Digital images, analog to digital conversions, digital audio and digital video 	2
3	<ul style="list-style-type: none"> • Binary Arithmetic- binary addition, binary subtraction, multiplication and division • Logic Gates- The need for derived gates, Half adder, Full adder, Logical operations 	2
4	<ul style="list-style-type: none"> • Data Storage- memory-Main Memory, Memory data transfer, MBR, Memory decoders -1x2,2x4...10x1024, MAR, Address, Data and Control Buses, Load and Store Instructions, Word and Word Length, RAM and ROM, Cache Memory • Data Storage- Disk- Memory Hierarchy, Disk basics – Cylinders, Tracks, Surfaces, Sectors, Relationship between logical and physical records, Disk Controller Architecture, Sector format, Formatting Process, Seek Time, Rotational Delay and Transmission time, The relationship between Application program, Operating System, Disk Controller and the actual disk, CDs, DVD • VDU and Printers-Human-computer interface, Keyboard, Raster Scanning, Frame Buffer, Basics of Graphics, Black and White/ Color Terminals, Text based terminals, LEDs/LCDs, Inkjet Printers, Laser Printer 	3
5	<ul style="list-style-type: none"> • Computer Architecture-CPU Registers, Multiplexers, ALU, Instruction Format, Instruction Decoding, Instruction Execution Cycles • Operating System-Concepts of system calls, Multiprogramming, Concepts of Context Switch, Different Services of Operating System, Information Management, Process Management (Process states, Process State Transition, Process Scheduling), Memory Management (Fixed Partition, Variable Partition, Paging, Demand Paging) 	2
6	<ul style="list-style-type: none"> • Classification of Computers and applications- Characteristics of Computers, What Computers can do, What computers can't do, Classification of Digital Computer Systems, Anatomy of a Digital Computer 	1
7	<ul style="list-style-type: none"> • Introduction to Computer Usage of computer system in different domains like office, book publication, ticket reservation, banks etc. Components of PC – Mouse, keyboard, CPU, monitor, printers, scanners, modem, memory, sound cards, pen drives. 	1

8	<ul style="list-style-type: none"> Introduction to Operating System(Windows 7) Working with Windows desktop, icons, taskbar, menu bar options, My Documents, My Computer, Control Panel, Recycle bin Concept of drives, folders, files Windows accessories – Notepad, WordPad, paint, clock, calendar, calculator 	1
9	<ul style="list-style-type: none"> GUI Based Software – MS – Office 2010 MS-Word – Opening menus, toolbars, opening and closing documents, clipboard concept MS – Excel – Working and manipulating data with excel, formulas, functions, chart and its types MS – PowerPoint – Working with PowerPoint and presentation ,Changing layout, Graphs , Auto content wizard ,Slide show, Animation effects, Normal, outline, Slide sorter, Reading view. 	2
10	<ul style="list-style-type: none"> Internet History of Internet, equipments required for Internet connection, browser (Internet Explorer, Mozilla and Firefox, Google Chrome) 	1
Total		16

List of Practicals / Activities

Sr. No	Practicals / Activities
1	<ul style="list-style-type: none"> Demonstration of above peripheral devices to students
2	<ul style="list-style-type: none"> Moving from one window to another window Opening task bar buttons into a window. Arranging icons on the desktop and create shortcuts.
3	<ul style="list-style-type: none"> Creating folders and files. Copy, rename, delete files and folders. Moving folders and files from one drive to another drive.
4	<ul style="list-style-type: none"> Create and edit notepad document. Create and edit WordPad document. Create paint file by using different drawing tools.
5	<ul style="list-style-type: none"> Creating, editing, saving word document. Entering and formatting text. Paragraph formatting, use bullets and numbering. Page formatting – page margins, page size, orientation, page break, headers and footers. Create tables, insert, and delete rows and columns. Printer installation and printing document. Create and print mail merging address for envelop and letters.
6	<ul style="list-style-type: none"> Create, open and print worksheet with page setup and print options. Enter data and format cells. Select, insert, delete cells, rows and columns. Insert formulas, functions and named ranges in worksheet. Create chart of different types.
7	<ul style="list-style-type: none"> Create a simple text slide using formatting, Selecting a slide layout. And insert pictures & backgrounds. Insert auto shapes, clip-arts and form group/un group objects from slides. Apply slide transitions and slide timings and animation effect for slide show
8	<ul style="list-style-type: none"> Perform Internet connection.

	<ul style="list-style-type: none"> • Create own e-mail id, send and receive mail with attachment. • Searching information using search engine (Google, MSN, bing etc.) • Do Internet chatting and understand the chat toolbar. • Organize favorite websites in different browsers.

Subject Title : Communication Skills

Subject Code : 17201

Teaching and Examination Scheme:

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
02	--	02	03	100	--	25#	25@	150

NOTE:

- Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

Rationale:

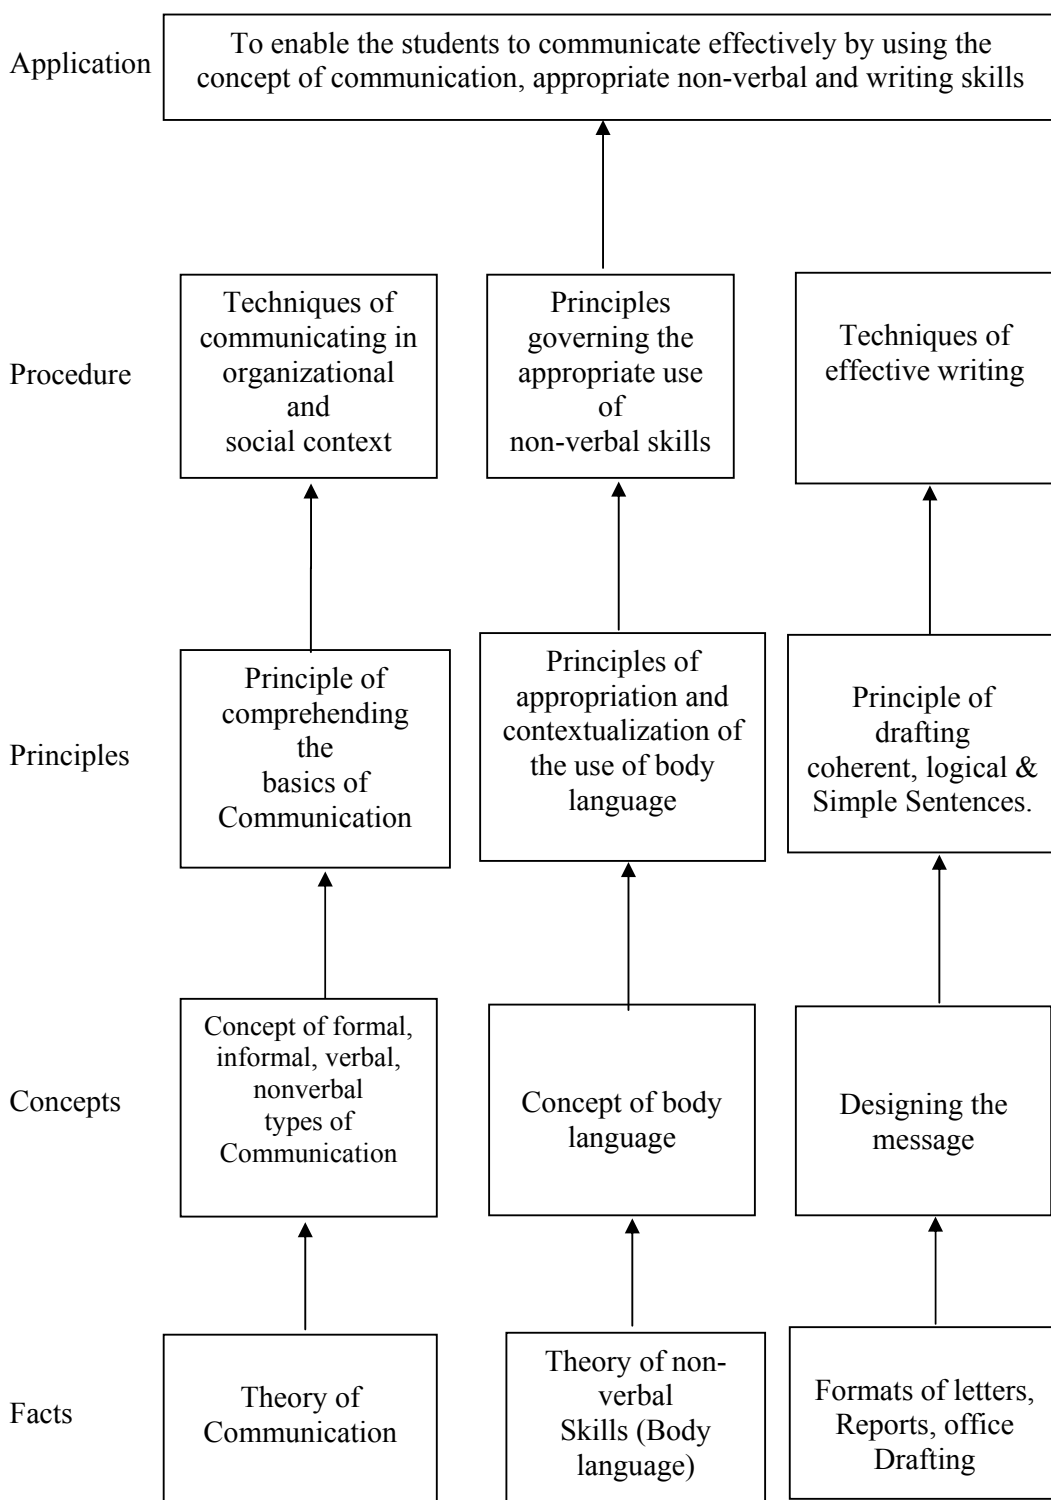

In this age of globalization, competition is tough. Hence effective communication skills are important. Communication skills play a vital and decisive role in career development. The subject of Communication Skills introduces basic concepts of communication. It also describes the verbal, non-verbal modes and techniques of oral & written communication.

It will guide and direct to develop a good personality and improve communication skills.

General Objectives:

Students will be able to:

1. Utilize the skills necessary to be a competent communicator.
2. Select and apply the appropriate methods of communication in various situations.

Learning Structure:

Theory

Name of the Topic	Hours	Marks
Topic 01 - Introduction to Communication: Specific Objective: ➤ Describe the process of communication. Contents: <ul style="list-style-type: none"> • Definition of communication • Process of communication • Types of communication -- Formal, Informal, Verbal, Nonverbal, Vertical, Horizontal, Diagonal 	06	16
Topic 02 - Effective communication Specific Objective: ➤ Identify the principles and barriers in the communication process Contents: <ul style="list-style-type: none"> ❖ Principles of communication. ❖ Barriers to communication a. Physical Barrier: <ul style="list-style-type: none"> ❖ Environmental (time, noise, distance & surroundings), ❖ Personal (deafness, stammering, ill-health, spastic, bad handwriting) b. Mechanical : Machine oriented c. Psychological: Day dreaming, prejudice, emotions, blocked mind, generation gap, phobia, status inattentiveness, perception. d. Language : Difference in language, technical jargons, pronunciation & allusions.	08	20
Topic 03 - Non verbal & Graphical communication: Specific Objectives: <ul style="list-style-type: none"> ➤ Effective use of body language & nonverbal codes ➤ View and interpret graphical information precisely. Contents: 3.1 Non- verbal codes: [08 Marks] <ul style="list-style-type: none"> • Proxemics, • Chronemics • Artefacts 3.2 Aspects of body language (Kinesics) [10 Marks] <ul style="list-style-type: none"> • Facial expression • Eye contact • Vocalics, paralanguage • Gesture • Posture • Dress & appearance • Haptics 3.3 Graphical communication [10 Marks]	08	28

<ul style="list-style-type: none"> Advantages & disadvantages of graphical communication Tabulation of data & its depiction in the form of bar graphs & pie charts. 		
Topic 04 - Listening Specific Objective: ➤ Effective use of listening Contents: <ul style="list-style-type: none"> Introduction to listening Listening versus hearing Merits of good listening Types of listening. Techniques of effective listening. 	02	08
Topic 05 - Formal Written Communication Specific Objectives: ➤ Use different formats of formal written skills. Contents: <ul style="list-style-type: none"> Office Drafting: Notice , memo & e-mail Job application with resume. Business correspondence: Enquiry letter, order letter, complaint letter, adjustment letter. Report writing: Accident report, fall in production, investigation report. Describing objects & giving instructions 	08	28
Total	32	100

Skills to be developed in practical:**Intellectual Skills:**

- Analyzing given situation.
- Expressing thoughts in proper language.

Motor Skills:

- Presentation Skills focusing on body language.
- Interpersonal skills of communication

Journal will consist of following assignments:

01: Draw the diagram of communication cycle for given situation.

State the type and elements of communication involved in it.

02: Graphics:- a) Draw suitable bar-graph using the given data.
b) Draw suitable pie-chart using the given data.

03: Role play: Teacher should form the group of students based on no. of characters in the situation. Students should develop the conversation and act out their roles.

04: Collect five pictures depicting aspects of body language from different sources such as magazines, newspapers, internet etc. State the type and meaning of the pictures.

NOTE: The following assignments should be performed by using Language Software.

05 Practice conversations with the help of software.

06 Describe people/personalities with the help of software and present in front of your batch.

07 Prepare and present elocution (three minutes) on any one topic with the help of software.

08 Describe any two objects with the help of software.

Course Name : Diploma in Food Technology**Course Code : FC****Semester : Second****Subject Title : Basic Food Chemistry****Subject Code : 19207****Teaching and Examination Scheme:**

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
04	--	04	03	100	50#	--	25@	175

Notes:

- Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

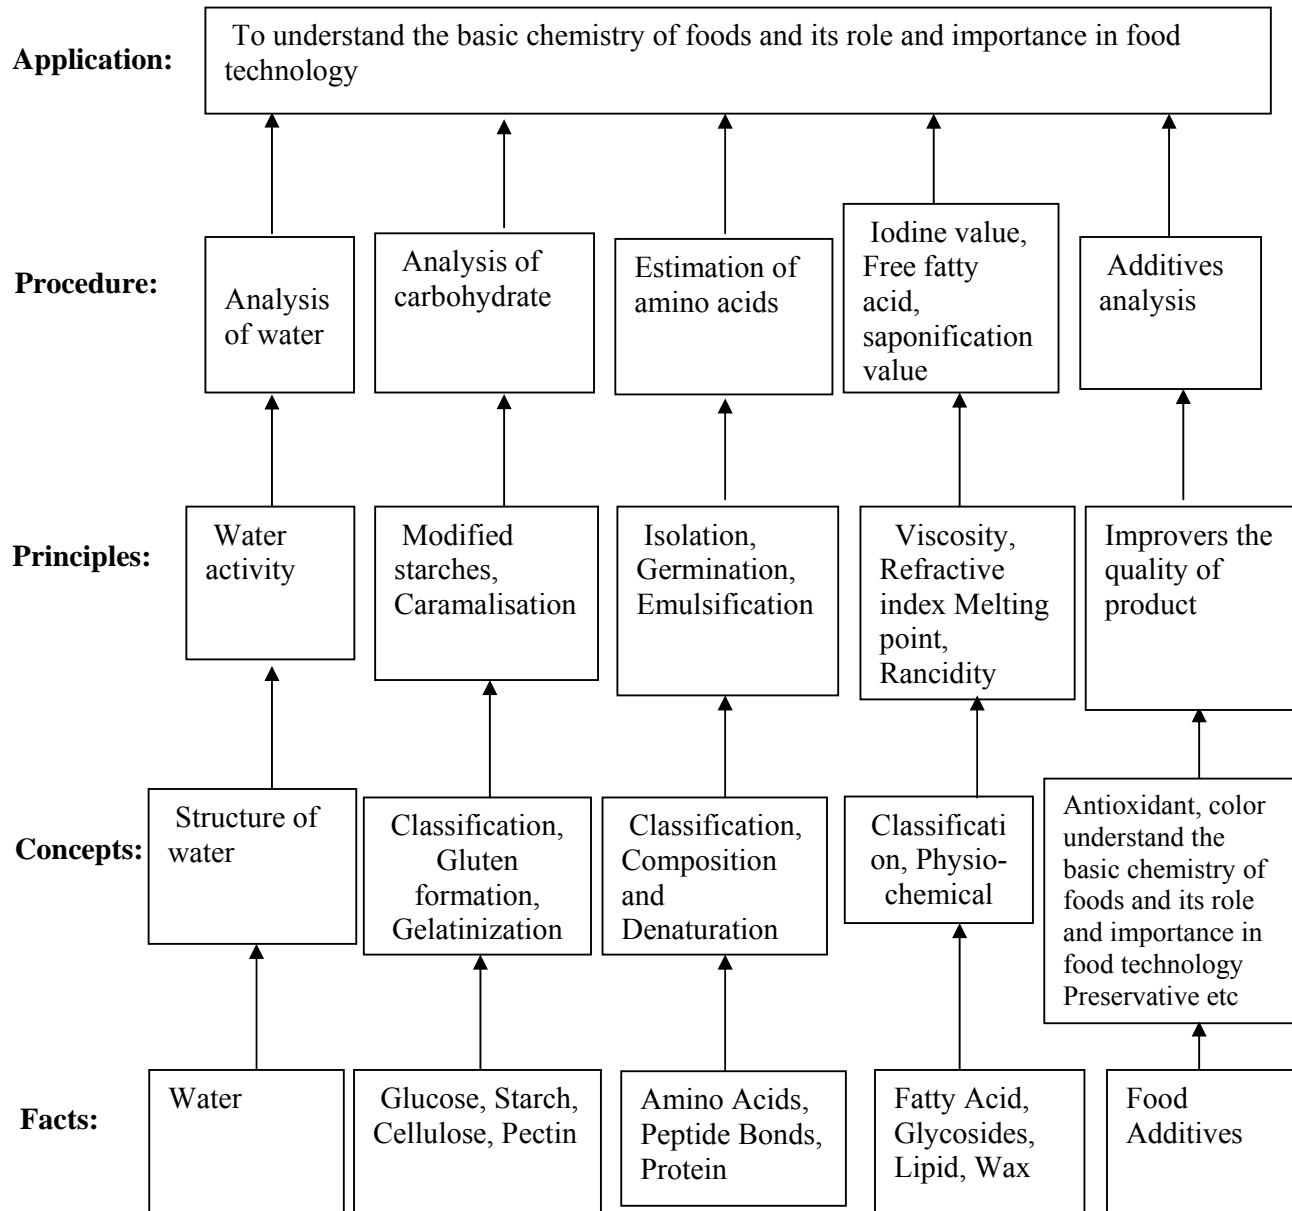

Rationale:

Foods are complex substances composed of chemical constituents. Three major constituents of foods are carbohydrates, proteins and lipids. In addition, foods contain small amount of vitamins, minerals, pigments, flavoring substances and enzymes. Another important constituent of all foods is water, which is present in small or large quantities. These constituents give foods their structure, texture, color, flavor and nutritional value. Thus, knowledge of constituents of foods and their properties is important for the food technologist.

General objectives:

Students will be able:

- Analyze Chemical composition of food.
- Understand the chemistry of foods - composition of food, role of each component and their interactions

Learning Structure:

CONTENTS: Theory:-

Topic and Contents	Hours	Marks
Topic 1: WATER Specific Objectives: <ul style="list-style-type: none"> State the physical properties of water Sketch the structure of water Contents: <ul style="list-style-type: none"> Physical Properties of water, Structure of water molecule, Bound water and water activity. Water activity and stability (shelf life) of food products. 	04	06
Topic 2: CARBOHYDRATES Specific Objectives: <ul style="list-style-type: none"> Classify the carbohydrates Give the effect of chemical constituents in food State the physico-chemical properties of carbohydrates Contents: <p>2.1 Chemistry of carbohydrate (Marks-10)</p> <ul style="list-style-type: none"> Classification and types of carbohydrates, Physico-chemical and functional properties of carbohydrates Sugar- crystallization, Inversion, Caramelization, Millard reaction <p>2.2 Gluten and Starch: (Marks-10)</p> <ul style="list-style-type: none"> Gluten formation- factors affecting gluten formation, selection of cereal mixture of flours for various preparation Starch- Gelatinization, factors affecting gelatinization, retrogradation of starch, modified starches 	14	20
Topic 3: PROTEINS & AMINO ACIDS Specific Objectives: <ul style="list-style-type: none"> Define related terms in protein Classify and give source of proteins Isolation and identification of protein State chemical changes in protein during processing. Contents: <p>3.1 Chemistry of Proteins: (Marks-10)</p> <ul style="list-style-type: none"> Classification, Physico-chemical properties, Classification of amino acids based on nutritional/physiological role and structure Primary, secondary, tertiary & quaternary structure of protein, Role of protein in food products, Amphoteric nature, Hydration, Denaturation, coagulation and gel formation Isolation, identification, purity of proteins <p>3.2 Protein food (Marks-10)</p> <ul style="list-style-type: none"> Pulses and legumes Effect of soaking, germination, fermentation on proteins Milk - effect of heat, acid, alkali and enzymes on proteins Egg- properties and role of protein- Binding, coating, leavening, emulsifying & glazing agent, Meat, Fish & poultry- factors affecting tenderness of meat. 	14	20

Topic 4: LIPIDS Specific Objectives: <ul style="list-style-type: none"> • State the physico-chemical properties of lipids • Distinguish between saturated and unsaturated fatty acids • Define rancidity and state chemistry of rancidity Contents: <ul style="list-style-type: none"> • Composition, types and sources • Chemistry of fatty acids and glycerides, MUFA, PUFA & nutritional significance Physical characteristics- melting point, plasticity, smoking point, flash point, viscosity, refractive index, density, Functional properties of lipids in foods • Rancidity- Hydrolytic & oxidative, prevention of rancidity, Reversion 	12	18
Topic 5: PIGMENTS AND COLOURS Specific Objectives: <ul style="list-style-type: none"> • Enlist colour pigments and their sources in food. • Describe the Physico-chemical properties of pigments • Draw the structure of colour pigments Contents: <ul style="list-style-type: none"> • Chlorophyll, Myoglobin & Haemoglobin, Anthocyanins, Flavonoids, Tannins, Betalains, Quinons & Xanthenes, Carotenoids, (composition, occurrence, effect of heat, alkali) nutritional significance of β-carotene (provitamin A activity) (Marks-12) • Enzymatic Browning, Changes during ripening, Meat pigment and colour changes during processing (Marks-04) 	08	16
Topic 6: FOOD ADDITIVES Specific Objectives: <ul style="list-style-type: none"> • Describe the chemistry and functions of food additives • Classification, chemical composition, uses and role of additives Contents: <ul style="list-style-type: none"> • Introduction, role and amount to be added of additives - Antioxidants, Coloring and Flavoring agents, Chelating agents, Curing agents, Stabilizers and Thickeners, Emulsifiers, Flour improvers (Marks-10) • Humectants and Anticaking agents, Leavening Agents, Non-nutritive sweeteners, Preservatives such as sulphur dioxide and benzoic acid, Buffering agents (Marks-10) 	12	20
Total	64	100

Practical:

Skills to be developed:

Intellectual Skills:

1. Understanding the composition of food, their structure and functional properties.
2. Analysis of carbohydrates, proteins and lipids.
3. To observe the browning reactions during processing.

Motor Skills:

1. To prepare different chemical reagents
2. Identification of types of carbohydrates present in foods.

List of Practicals:

1. Qualitative analysis of carbohydrates (glucose, fructose, sucrose and starch.)
2. Qualitative analysis of protein.
3. Determination of reducing and non-reducing sugar.
4. Quantitative estimation of amino acid.
5. Estimation of protein by Kjeldahl method.
6. Estimation of carbohydrates e.g. Sucrose, starch etc.
7. Determination of iodine value.
8. Determination of saponification value.
9. Determination of peroxide value.
10. Qualitative determination of chlorophyll.

TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
04	--	04	03	100	25#	--	25@	150

Notes:

- Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

Rationale:

Foodstuffs by their very nature provide ideal media in which all types of microorganisms can grow. It is essential for the food technologist to understand the factors influencing microbial growth in order to harness and encourage desirable organisms, and to discourage and destroy those organisms that have deleterious effect on food substrates.

There are enormous annual issues of food materials, throughout the world, which are attributable directly to spoilage by the action of "microorganisms". Such losses may have far reaching economic and political results as for example, the great potato blight in Ireland during the nineteenth century.

Many bacteria, fungi and viruses cause food poisoning infections and information which may vary in severity from the very mild to the fatal.

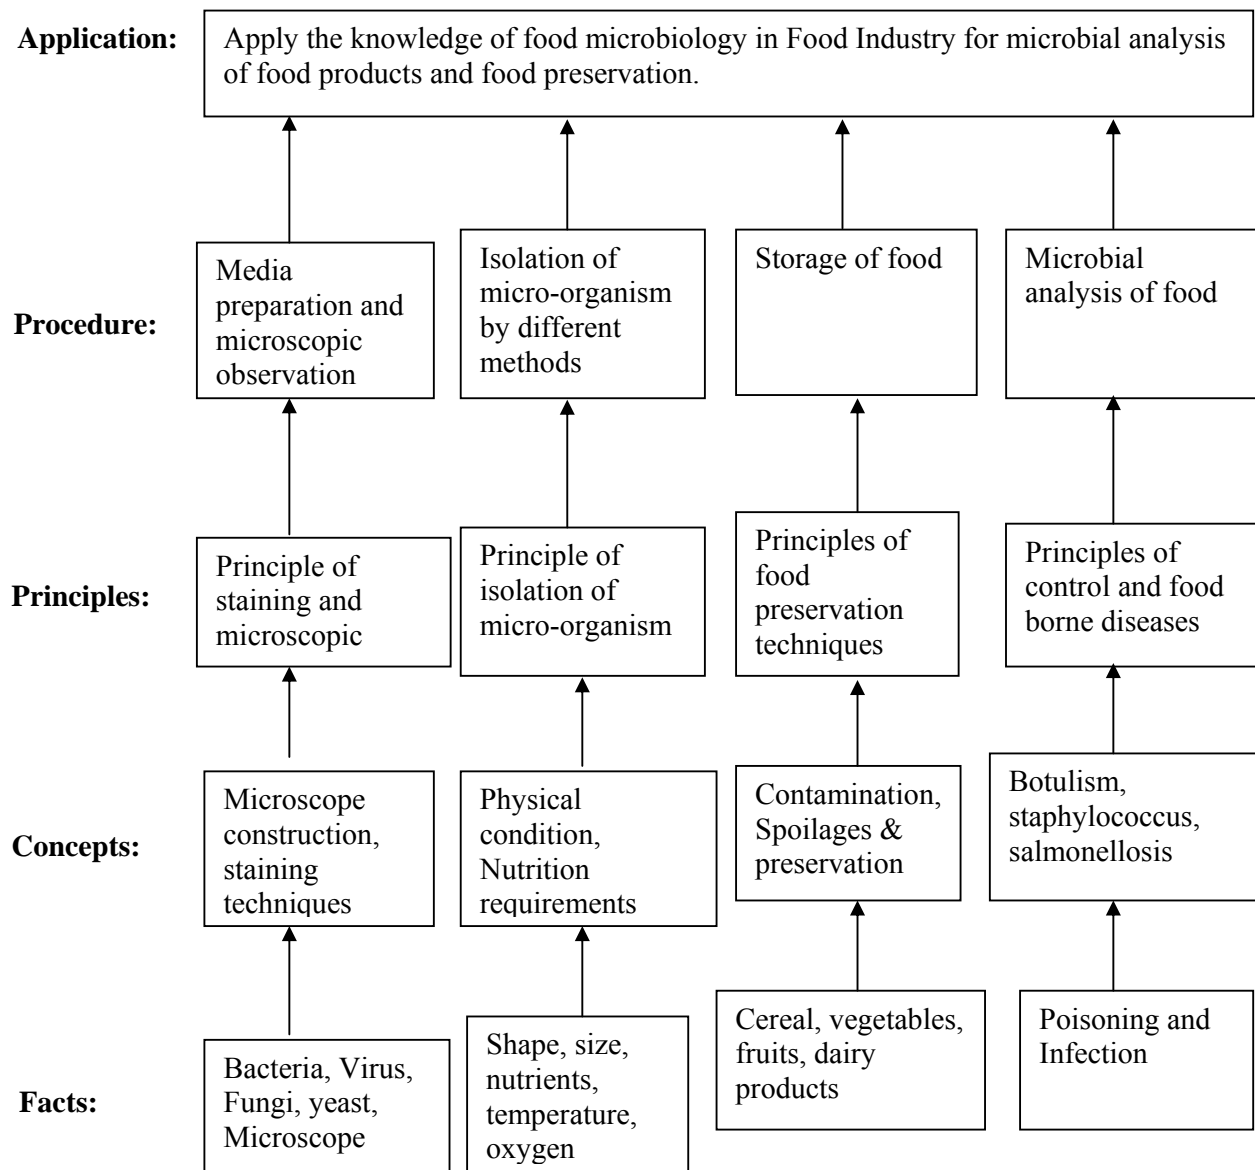

On the credit side, there are many microorganisms whose metabolic processes have contributed the production of foods and beverages from the earliest times. Food commodities such as bread, fermented milk and vegetables and alcoholic beverages have a significant place in the diet of today. Knowledge of the organisms responsible for such products is essential to improve or control the quality of such foods. Newer foods and food processes may depend on the use of microorganisms, the production of "single cell" protein and fermented foods being typical examples. Additionally, the use of microorganisms for the utilization of food processing waste has the greatly the food industry on economic grounds and the community at large on ecological grounds.

An application of microbiology is therefore essential to food technologists if they are to control or exploit the natural metabolic to the community.

General objectives:

Students will be able:

1. Know the important genera of microorganisms associated with food and their Characteristics.
2. Understand the role of microbes in fermentation, spoilage and food borne Diseases

Learning structure:

Contents: Theory

Topic and Contents	Hours	Marks
Topic 1 : GENRAL MICROBIOLOGY INTRODUCTION Specific Objectives: <ul style="list-style-type: none"> ➤ Sources of microorganism ➤ Classify microorganisms Contents: <ul style="list-style-type: none"> • History of microbiology, microorganisms and men(Louis pasture, Robert Koch and Leeuwen hoke) • Classification of microorganisms: Bacteria, Yeast Fungi, Algae, Protozoa, Viruses 	10	12
Topic 2 : MICROSCOPY Specific Objectives: <ul style="list-style-type: none"> ➤ Interpret microscopic observation. ➤ Preparation of different stain and microbial analysis ➤ Identification of microorganisms. Contents: <p>2.1 Microscope: (Marks-10)</p> <ul style="list-style-type: none"> • Definition of microscope, types, construction and working of simple and compound microscope, comparison of different types of Microscope, methods of microscopic examination <p>2.2 Staining Techniques: (Marks-10)</p> <ul style="list-style-type: none"> • Staining techniques –Definition, types, preparation of simple stain, gram positive stain, gram negative stain, acid fast stain. 	10	20
Topic 3 : MORPHOLOGY AND PHYSIOLOGY OF BACTERIA Specific Objectives: <ul style="list-style-type: none"> ➤ Describe Morphological characteristics of microorganisms ➤ Describe physiology of microorganisms ➤ State growth Curve and its factor affecting. Contents: <p>3.1 Morphological of bacteria: (Marks-08)</p> <ul style="list-style-type: none"> • Size , shape, and arrangement of bacterial cell, Drawing of major structure of bacterial cell wall <p>3.2 Physiology of bacteria: (Marks-16)</p> <ul style="list-style-type: none"> • Nutritional requirement (Definition of phototrophs, chemotrophs, Autotrophs & Heterotrophs) • Physical condition required for growth -Temperature, gaseous requirement and P^H. (Aerobes & Anaerobes, microaerophilic, emosynthetic saprophytes &, parasites, pychrophiles, mesophiles and thermophiles) • Isolation of Pure culture –Streak plate technique, pour plate technique and spread plate technique Methods of isolation of pure culture. 	12	24

Topic 4 : CONTAMINATION, SPOILAGE AND PREVENTION Specific Objectives: <ul style="list-style-type: none"> ➤ State different sources of food contamination ➤ List types of spoilage and preservation of food Contents: <ul style="list-style-type: none"> • Contamination, source, , spoilage causative agents and prevention of <ul style="list-style-type: none"> a. Cereal and cereal products (Marks-06) b. Dairy and dairy products (Marks-06) c. Vegetables and fruits (Marks-08) d. Canned foods (Marks-04) 	20	24
Topic 5 : FOOD POISONING AND FOOD BORNE DISEASES Specific Objectives: <ul style="list-style-type: none"> ➤ State different sources of food Poisoning and infections ➤ State Bacterial food infection and food borne diseases Contents: <ul style="list-style-type: none"> • Bacterial - Botulism, Staphylococcus aureus, Salmonellosis, Bacillus cereus, Escherechia coli, Vibrio etc. Mycotoxins, Viral diseases • Difference between food poisoning and food infection • Air borne diseases and Water borne diseases 	12	20
Total	64	100

PRACTICAL:

Skills to be developed:

Intellectual Skills

1. Understand the morphological structure of microorganisms.
2. Understand the instruments for microorganism identification.
3. Know use of microscope to observe micro organisms..
4. Enable the students to gain and inside into aspect of food microbiology

Motor Skills

1. Prepare different microbial media, their sterilization, incubation and inoculation with great care
2. Perform the staining ~~methods~~.
3. Use advance techniques in microbial food analysis.

LIST OF PRACTICALS:

1. Handle of some laboratory instruments, their requirement, use and care – Incubator,
2. Autoclave, Inoculating chamber, etc.
3. Sterilization of glassware.
4. Preparation and sterilization of standard media.
5. Plating techniques, viable counts and total counts.
6. Microscope construction, working, maintenance.
7. Microscopy of standard cultures-bacilli, cocci, fungi, yeasts, algae, protozoa.

8. Staining procedures:
 - a) Simple
 - b) Negative
 - c) Gram
 - d) acid-fast
 - e) capsule
9. Microbial Examination of table, container and packaging material.
10. Microbial examination of following foods
 - a) Cereal and cereal products
 - b) Milk and milk products
 - c) Meat and meat products

Teaching and examination Scheme

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
03	01	--	03	100	--	--	--	100

NOTE:

- **Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.**
- **Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work. (SW)**

Rationale:

This subject is an extension of Basic mathematics of first semester and a bridge to further study of applied mathematics. The knowledge of mathematics is useful in other technical areas.

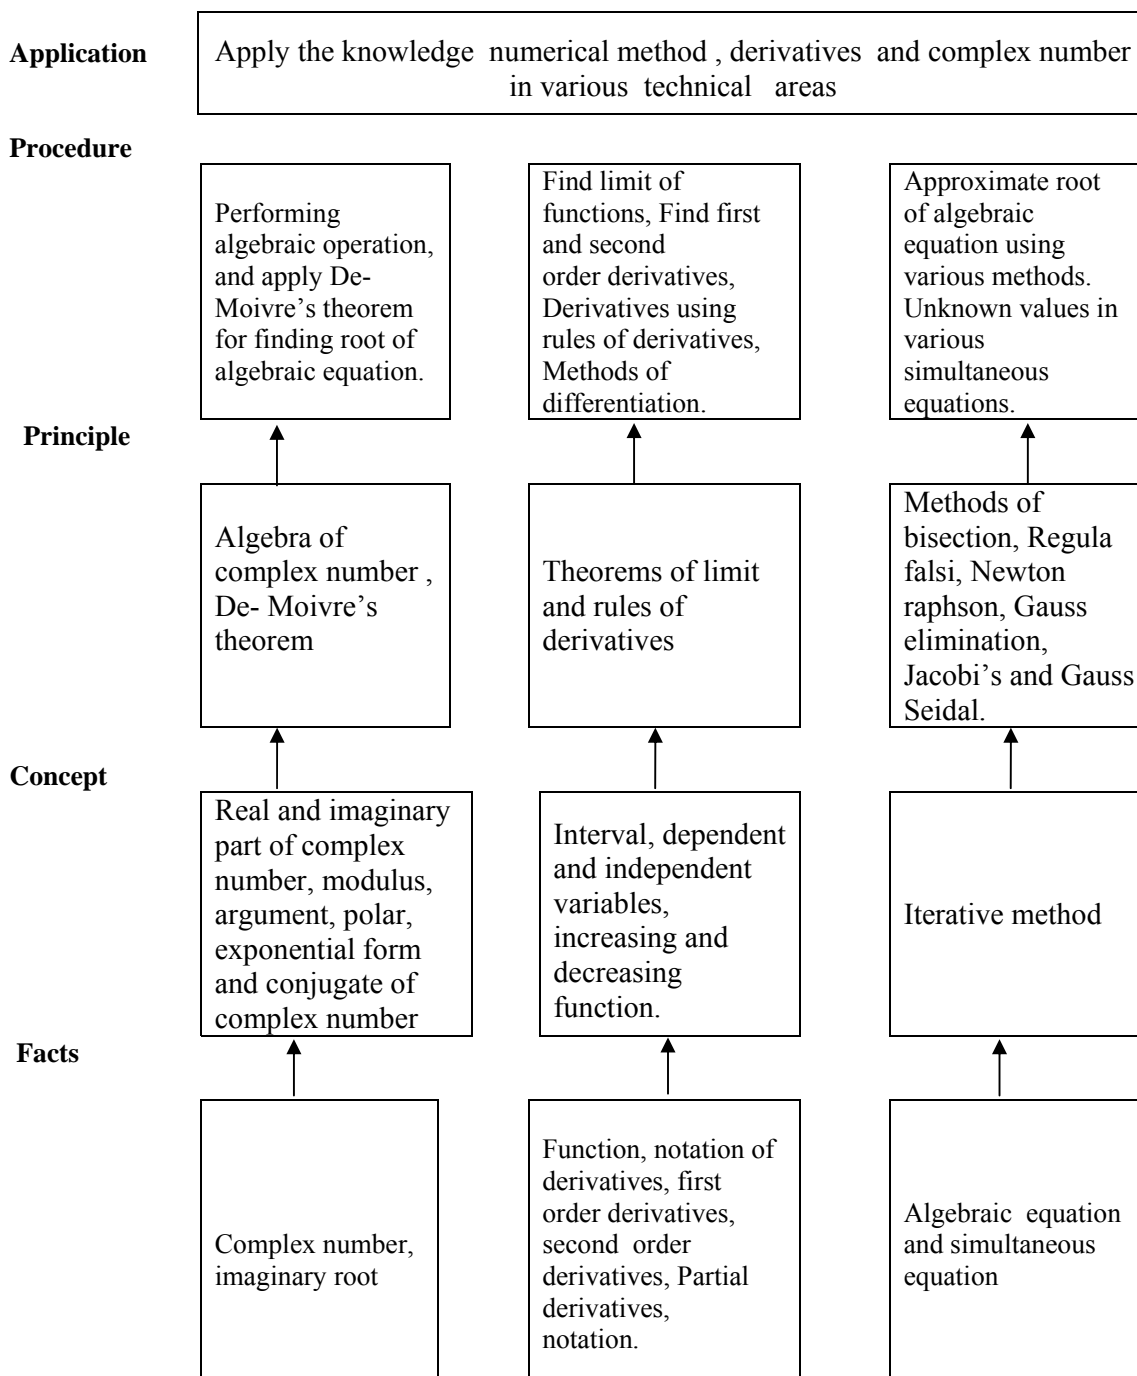

Differential calculus has applications in different engineering branches. For example concepts such as bending moment, curvature, maxima and minima.

Numerical methods are used in programming as an essential part of computer engineering. For solution of problems in electrical circuits and machine performances complex number is used engineering mathematics lays the foundation to understand technical principles in various fields.

General objectives:

Student will be able to

- 1) Use complex numbers for representing different circuit component in complex form to determine performance of electrical circuit and machines.
- 2) Apply rules and methods of differential calculus to solve problems.
- 3) Apply various numerical methods to solve algebraic and simultaneous equations.

Learning Structure:

Content Theory:

Topic	Hours	Marks
Topic 1 - Complex number		
1.1 Complex number ----- 14 Specific objectives : <ul style="list-style-type: none">➤ Find roots of algebraic equations which are not in real.• Definition of complex number, Cartesian, polar and exponential forms of complex number.• Algebra of complex number such as equality, addition, subtraction, multiplication and division.• De- Moivre's theorem with simple examples.• Euler's form of circular functions, hyperbolic functions and relation between circular and hyperbolic functions.	08	14
Topic 2 - Differential Calculus		
2.1 Function ----- 14 Specific objectives : <ul style="list-style-type: none">➤ Identify the function and find the value of function.• Definition of function, range and domain of function.• Value of function at a point.• Types of functions and examples.	08	58
2.2 Limits ----- 20 Specific objectives : <ul style="list-style-type: none">➤ To evaluate limit of function.• Concept and definition of limit.• Limits of algebraic, trigonometric, logarithmic and exponential functions with examples.	08	
2.3 Derivatives ----- 24 Specific objectives : <ul style="list-style-type: none">➤ Find the derivatives by first principle.➤ Solve problems using rules and methods of derivatives• Definition of derivatives, notation, derivatives of standard function using first principle.• Rules of differentiation such as, derivatives of sum or difference, product, and quotient with proofs.• Derivative of composite function with proof (Chain rule)• Derivatives of inverse trigonometric functions using substitution• Derivatives of inverse function.• Derivatives of implicit function.• Derivatives of parametric function.• Derivatives of one function w.r.t another function.• Logarithmic differentiation.• Second order differentiation.	12	
Topic 3 - Numerical Method		
3.1 Solution of algebraic equation ----- 14 Specific objectives : <ul style="list-style-type: none">➤ Find the approximate root of algebraic equation.• Bisection method• Regula falsi method• Newton Rapshon method	06	28

3.2 Numerical solution of simultaneous equations ----- 14 Specific objectives : ➤ Solve the system of equations in three unknowns. • Gauss elimination method • Jacobi's method • Gauss Seidal method	06	
Total	48	100

Tutorials:

- 1) Tutorial are to be used to get enough practice.
- 2) In each tutorial make a group of 20 student students and for each group minimum 10 problems are to be given.

List of Tutorials:

Sr No.	Topic for Tutorial
1	Complex number (Examples based on algebra of complex numbers)
2	Complex number (Examples based on De Moivre's theorem and Euler's formulae)
3	Function
4	Limit (algebraic and trigonometric functions)
5	Limit (logarithmic and exponential functions)
6	Derivatives by first principle
7	Derivatives (Examples based on formulae of standard functions and rules)
8	Derivatives (Examples based on methods of differentiation)
10	Solution of algebraic equations
11	Solution of simultaneous equations

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
02	--	02	--	--	--	--	50@	50

Rationale:

Drawing is said to be the language of engineers and technicians. Reading and interpreting engineering drawing is their day-to-day responsibility. The course is aimed at developing basic graphic skills so as to enable them to use these skills in preparation of engineering drawings, their reading and interpretation

General Objectives:

The student after studying this subject will be able to:

- 1) Draw different engineering curves and know their applications.
- 2) Draw orthographic projections of different objects.
- 3) Visualize three dimensional objects and draw Isometric Projections.

Learning Structure:**Application**

To acquire the skill of visualizing, interpreting and drawing the curves, orthographic projections, and Projection in point lines and plan and solid

**Procedure**

Read, understand, visualize, interpret and draw engineering curves, orthographic Prepare drawing sheets

**Principles**

Orthographic projection by 1st angle method, Isometric projections, diagonal scale, plain scale

**Concepts**

Reference planes (HP, VP), projections, isometric axes & scale, locus of points, convention of lines, polygon, dimensioning, engineering drawing IS Code

**Facts**

Various objects, geometric entities, line, arc circle, drawing instruments

Contents: Theory

Topic and Contents	Hours
Topic 1: DRAWING OFFICE PRACTICE Specific Objectives: <ul style="list-style-type: none"> Use Instruments for drawing & there applications. Contents: <ul style="list-style-type: none"> Drawing instruments -T-Square, set squares, Draw the horizontal and vertical lines, draw different angles, mini drafter, compass, divider, scale, and protractor and drawing pencils. Sizes and layout of standard drawing sheets, Sizes of drawing boards, Drafting table/board 	03
Topic 2:DIFFERENT TYPES OF LINES AND LETTERING Specific Objectives: <ul style="list-style-type: none"> Draw different lines and letters and their applications. Contents: 2.1 Different types of lines. <ul style="list-style-type: none"> Different types of Lines Different types of lines in engineering drawing as per BIS specifications Practice in free hand sketching of vertical, horizontal and inclined lines 2.2 Lettering Techniques and Practice <ul style="list-style-type: none"> Instrumental single stroke (capital and inclined) lettering of 35 mm height in the ratios of 7:4 Instrumental double stroke lettering of 35 mm height in the ratio of 7:4, vertical, Free hand lettering (alphabet and numerals) lower case and upper case, 	03
Topic 3: DIMENSIONING AND SCALES Specific Objectives: <ul style="list-style-type: none"> Draw the different Scales and dimensions techniques Contents: 3.1 Dimensioning <ul style="list-style-type: none"> Necessity of dimensioning, terms and notations – methods and principles, dimensioning small simple objects 3.2. Scale <ul style="list-style-type: none"> Scales – their need and importance, Definition of representative fraction (RF); Find RF of a given scale, Types of scales, Construction of plain and diagonal scales 	04
Topic 4:ENGINEERING CURVES Specific Objectives: <ul style="list-style-type: none"> Draw Conic curves& know their applications Draw curves from given data. Contents: <ul style="list-style-type: none"> Ellipse –by one method Parabolic- by one method Hyperbola- by one method Cycloid circle- by one method Helix- by one method 	08
Topic 5:ORTHOGRAPHIC PROJECTIONS Specific Objectives: <ul style="list-style-type: none"> Visualize, interpret & draw orthographic views simple objects. Contents: <ul style="list-style-type: none"> Two-dimensional views vertical plane and horizontal plane, Conversion of 	06

pictorial view into Orthographic Views (First Angle Projection Method Only) – elevation, plan and end view. <ul style="list-style-type: none"> • Procedure to draw orthographic and sectional views, draw simple object of orthographic views. 	
Topic 5: PROJECTION OF LINES AND PLAIN AND SOLID Specific Objectives: <ul style="list-style-type: none"> ➤ Visualize, interpret & draw orthographic views simple objects. Contents: 6.1 Projection of lines <ul style="list-style-type: none"> • Lines inclined to one plane and parallel to the other and vice versa 6.2 Projection of Planes- <ul style="list-style-type: none"> • Planes perpendicular and parallel to either of the planes; planes perpendicular to one plane and parallel to the other or vice versa 6.3 Projection of solids- <ul style="list-style-type: none"> • such as Prism, Pyramid, Cylinder, Cone with axis parallel to one plane and inclined to another plane. 	08
Total	32

Practical:**Skills to be developed for practical:****Intellectual skills:**

1. Develop ability to solve problems on geometrical constructions.
2. Develop ability to differentiate between conic and curves
3. Interpret the given mechanisms and locus of points.
4. Interpret first angle projection method.
5. Interpret and able to solve problem on orthographic projection of given object.

Motor Skills:

1. Draw the geometrical constructions.
2. Draw different types of curves.
3. Draw orthographic projections by first angle projection method.

List of Practical:**1. Introduction of Engineering drawing - (two Sheet) Imperial Size Sheets**

- a) Draw the different types of line and letters
- b) Draw the different types of dimension and scales.

2. Engineering curves - (one Sheet)

- a) Three different curves are to be draw using any one method.

3. Orthographic Projections - (Total two Sheets)

Two simple objects by first angle projection method

- a) Full orthographic views -One sheet
- b) Sectional orthographic views–One sheet

4. Projection in point lines and plane and solid - (Total one sheets)

(Inclined to one reference plane)

Rationale:

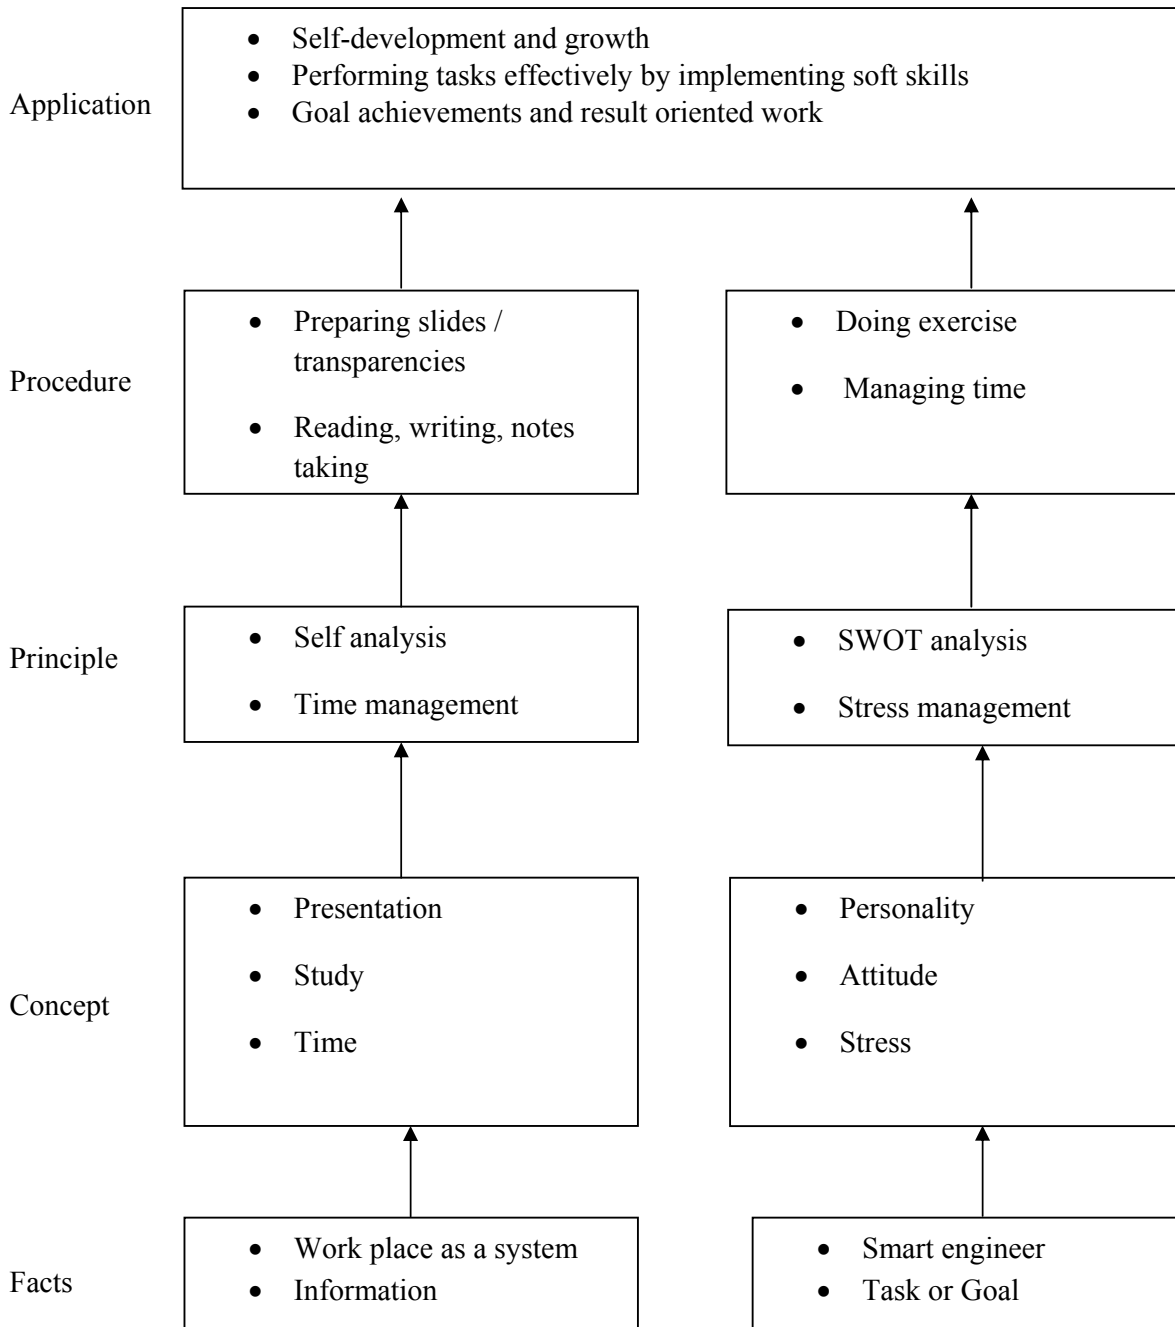

Globalization has emphasized the need for overall development of technician to survive in modern era. Soft skills development in addition to technical knowledge; plays a key role in enhancing his/her employability.

This subject aims to provide insights into various facets of developing ones personality in terms of capabilities, strengths, weakness, etc as well as to improve reading, listening and presentation skills. Also in this age fierce competition, the time and stress management techniques will immensely help the technician to live happy and purposeful life.

General Objectives:

After studying this subject, the students will be able to:

1. Understand and appreciate importance of life skills.
2. Use self-analysis and apply techniques to develop personality.
3. Use different search techniques for gathering information and working effectively.
4. Improve the presentation skills.

Theory:

Topic and Contents	Hours
TOPIC 1: SELF ANALYSIS Specific Objectives: ➤ To introduce oneself. Contents: 1.1 Need of Self Analysis 1.2 Attitude and types (positive, negative, optimistic and pessimistic) Guidelines for developing positive attitude.	02
TOPIC 2: STUDY TECHNIQUES Specific Objectives: ➤ To identify different process and strategies. ➤ To improve reading, listening and notes taking skills. Contents: 2.1 Learning strategies 2.2 Learning process 2.3 Organization of knowledge 2.4 Reading skills 2.5 Listening skills 2.6 Notes taking 2.7 Enhancing memory	03
TOPIC 3: INFORMATION SEARCH Specific Objectives: ➤ To search information as per the need. Contents: 3.1 Sources of information 3.2 Techniques of information search (library, internet, etc)	02
TOPIC 4: SELF DEVELOPMENT Specific Objectives: ➤ To set primary goals using SMART parameters. ➤ To Priorities the work effectively. ➤ To cope up with stress effectively. Contents: 4.1 Goal setting and its importance. 4.2 Characteristics of Goal setting (SMART - Specific, Measurable, Attainable, Realistic, Time bound) 4.3 Time Management - Importance, prioritization of work, time matrix, time savers, and time wasters. 4.4 Stress Management - Definition, types of stress, causes of stress, managing stress, and stress busters.	05
TOPIC 5: PRESENTATION TECHNIQUES Specific Objectives: ➤ To plan for presentation. ➤ To prepare contents for presentation. Contents: 5.1 Importance of presentation.	02
