Academic Programmes

FMS is known for its flagship Full Time MBA programme, Executive MBA programme, management development programmes and doctoral programme. Currently, FMS conducts the following programmes:

MBA Two Year Programme (Full Time)

MBA-Executive Two Year Evening Programme

MBA-Executive (Health Care Administration) Two Year Evening Programme

Doctoral Programme

Two-Year (Full-Time) MBA Programme

Programme Structure

The MBA -Two year programme is designed with the objective of developing young men and women into highly adept professional managers, capable of working in diverse sectors, continuously striving for excellence in performance, while propagating thought leadership and contributing to the welfare of the society at large. The curriculum of the continuously evolving MBA Two-Year Programme rests on two pillars: one, providing a strong analytical foundation in key functional areas and the other, enabling a high degree of academic flexibility, thereby allowing students to customize their MBA experience.

The first year introduces students to the essential models and tools, with a focus on rigorous training in the diverse disciplines in management and the development of a strong foundation of business knowledge and management theory. The First year concludes with the summer internship programme which allows students to explore practical application of the management concepts learnt through the first year.

In the second year, the students decide on their professional development plans by reflecting on their first year's learning and summer internship experiences. This experience is augmented by interactions with an eclectic mix of world-renowned faculty and corporate luminaries who together teach 22 core courses and over 78 elective courses. After two years of 360 degree learning, the students move on to materialize their dreams in the corporate world.

The program nurtures and develops world class business leaders with personalized care and attention, in small work groups and teams, and in a practical, application-oriented environment. Every year aspirants avail the opportunity of realizing their dreams through this program after proving their mettle in one of the most rigorous selection processes.

At FMS, the MBA course structure is closely aligned with the contemporary business requirements. The focus is on producing managers with sound fundamentals to hit the ground running when they enter the corporate world. The programme empowers the students to demonstrate the ability to innovate, the ability to execute the most daunting of challenges in the most trying of circumstances, the ability to create synergies amongst the most diverse set of variables and the ability to continuously learn, improvise, adapt, energize and grow.

The Transformational Journey Called FMS

The combination of a flexible curriculum, a wide array of learning opportunities and a conducive academic environment is the hallmark of this programme. The transformative journey starts from day one and new entrant is introduced to the culture and values of FMS through an enriching classroom experience and intense mentorship program. The learner is empowered to collaborate as well as take independent initiatives throughout the year. As much as it is possible to sum up a community, this is FMS: Balanced individuals who approach work and play with equal intensity; confident achievers who are brave enough to make mistakes and humble enough to accept them; and dreamers who are grounded enough to know that getting to the top is more fun when the journey is shared. It is this drive and enthusiasm that differentiates and distinguishes us from all others, giving us the winning edge - wherever we go, whatever we do.

Our faculty believes in collaboration and much of our research is interdisciplinary. This comes across in our integrated teaching, which helps the learners appreciate how each field links with others. The faculty shares information, elicits responses, spurs dialogue, encourages differences of opinion and debates ideas. They expect their learners to do the same, in the classroom and on their own. This is where ideas compete and people collaborate. Active engagement, informed thought and dynamic teamwork makes the FMS experience unique among its peers.
