प्रश्न पुरितका / QUESTION BOOKLET विषय / Subject :

Mechanical Engineering

कोड / Code: OP16

पुस्तिका में पृष्ठों की संख्या /

Number of Pages in Booklet: 32

पुस्तिका में प्रश्नों की संख्या /

Number of Questions in Booklet: 200

A BENDAMA A TOTAL

Mechanical Engineering

समय / Time : 3 घंटे / Hours

पूर्णांक / Maximum Marks : 100

INSTRUCTIONS

Answer all questions.

All questions carry equal marks.

3. Only one answer is to be given for each question.

If more than one answers are marked, it would be treated as wrong answer.

5. Each question has four alternative responses marked serially as 1, 2, 3, 4. You have to darken only one circle or bubble indicating the correct answer on the Answer Sheet using BLUE BALL POINT PEN.

6. 1/3 part of the mark(s) of each question will be deducted for each wrong answer. (A wrong answer means an incorrect answer or more than one answers for any question. Leaving all the relevant circles or bubbles of any question blank will not be considered as wrong answer.)

The candidate should ensure that Series Code of the Question Paper Booklet and Answer Sheet must be same after opening the envelopes. In case they are different, a candidate must obtain another Question Paper of the same series. Candidate himself shall be responsible for ensuring this.

8. Mobile Phone or any other electronic gadget in the examination hall is strictly prohibited. A candidate found

with any of such objectionable material with him/her will be strictly dealt as per rules.

Please correctly fill your Roll Number in O.M.R. Sheet. 5 marks will be deducted for filling wrong or incomplete Roll Number.

Warning: If a candidate is found copying or if any unauthorised material is found in his/her possession, F.I.R. would be lodged against him/her in the Police Station and he/she would liable to be prosecuted under Section 3 of the R.P.E. (Prevention of Unfairmeans) Act, 1992. Commission may also debar him/her permanently from all future examinations of the Commission.

निर्देश

- 1. सभी प्रश्नों के उत्तर दीजिए ।
- सभी प्रश्नों के अंक समान हैं ।
- प्रत्येक प्रश्न का केवल एक ही उत्तर दीजिए।
- एक से अधिक उत्तर देने की दशा में प्रश्न के उत्तर को गलत माना जाएगा !
- प्रत्येक प्रश्न के चार वैकल्पिक उत्तर दिये गये हैं, जिन्हें क्रमशः 1, 2, 3, 4 अंकित किया गया हैं। अभ्यर्थी को सही उत्तर निर्दिष्ट करते हुए उनमें से केवल एक गोले अथवा बबल को उत्तर-पत्रक पर नीले वॉल पाइंट पेन से गहरा करना है ।
- प्रत्येक गलत उत्तर के लिए प्रश्न अंक का 1/3 भाग काटा जायेगा। गलत उत्तर से तात्पर्य अशुद्ध उत्तर अथवा किसी भी प्रश्न के एक से अधिक उत्तर से है । किसी भी प्रश्न से संबंधित गोले या बबल को खाली छोड़ना गलत उत्तर नहीं माना जायेगर।
- प्रश्न-पत्र पुरितका एवं उत्तर पत्रक के लिफाफे की सील खोलने पर परीक्षार्थी यह सुनिश्चित कर लें कि उसके प्रश्न-पत्र पुरितका पर वहीं सीरीज अंकित है जो उत्तर पत्रक पर अंकित है। इसमें कोई भिन्नता हो तो वीक्षक से प्रश्न-पत्र की ही सीरीज वाला दूसरा प्रश्न-पत्र का लिफाफा प्राप्त कर लें। ऐसा न करने पर जिम्मेदारी अध्यर्थी की होगी।
- मोबाईल फोन अथवा इलेक्ट्रोनिक यंत्र का परीक्षा हॉल में प्रयोग पूर्णतया वर्जित हैं। यदि किसी अप्यर्थी के पास ऐसी कोई वर्जित सामग्री मिलती है तो उसके विरुद्ध आयोग द्वारा नियमानुसार कार्यवाही की जायेगी।
- कृपया अपना रोल नम्बर ओ.एम.आर. पत्रक पर सावधानी पूर्वक सही भरें। गलत अथवा अपूर्ण रोल नम्बर भरने पर 5 अंक कुल प्राप्तांकों में से अनिवार्य रूप से काटे जाएंगे।

चेतावनी : अगर कोई अभ्यर्थी नकल करते पकड़ा जाता है या उसके पास से कोई अनिधकृत सामग्री पाई जाती है, तो उस अभ्यर्थी के विरुद्ध पुलिस में प्राथमिकी दर्ज कराई जायेगी और आर. पी. ई. (अनुचित साधनों की रोकथाम) अधिनियम, 1992 के नियम 3 के तहत कार्यवाही की जायेगी। साथ ही आयोग ऐसे अध्यर्थी को भविष्य में होने वाली आयोग की समस्त परीक्षाओं से विवर्जित कर सकता है।

	(1)	L	(2)	L/2		
	(3)	L+1	(4)	L+2		
9	Cam	size depends upon				
	(1)	pitch circle	(2)	base circ	le	
	(3)	prime circle	(4)	outer circ	cle	
10	Corio	olis component is encountered	in	·.		
	(1)	slider crank mechanism	(2)	four bar	chain mechanism	
	(3)	quick return mechanism	(4)	circular	mechanism	
11	Idler	pulley is used for				
	(1)	maintaining belt tension				
	(2)	changing direction of rotation	l			
	(3)	for stopping motion frequently	у			
	(4)	for running during idling per	iods (only		
12	Slip	in belt drive is				
	(1)	loss of power				
	(2)	difference between velocities	of tw	o pulleys		
	(3)	difference between angular ve				
	(4)	difference between linear speed	of th	e rim of pu	illey and the belt on it	
13	The	pulley in a belt drive acts as				
	(1)	rolling pair	(2)	sliding p	pair	
	(3)	turning pair	(4)	cylindrica	al pair	
14	Sum	of the tensions when the bel	t is r	unning on	the pulley is	
	(1)	less than initial tension				
	(2)	more than initial tension				
	(3)	more than twice initial tension	on			
	(4)	half of initial tension				

OP16_A]

15	Func	ction of a governor is to		
	(1)	control the engine speed		
	(2)	maintain the speed of engir	ne cons	stant
	(3)	store energy and give up w	heneve	er required
	(4)	adjust variation of speed by	varyi	ng the input to the engine
16	Rop	e brake dynamometer uses		
	(1)	oil as lubricant	(2)	water as lubricant
	(3)	grease as lubricant	(4)	no lubricant
17	The	brake commonly used on tra	ain bog	ggies is
	(1)	internal expanding	(2)	band brake
	(3)	band and block brake	(4)	shoe brake
18		ver transmitted by belt is maximated to centrifugal tension i		hen maximum tension in the belt
	(1)	2 times	(2)	3 times
	(3)	4 times	(4)	5 times
19	The	ratio of number of teeth and	pitch o	circle diameter in a gear is called
	(1)	pitch	(2)	circular pitch
	(3)	diametral pitch	(4)	module
20	Gea	r train in which the first and las	t gear a	re on the same axis is known as
	(1)	simple gear train	(2)	compound gear train
	(3)	epicyclic gear train	(4)	reverted gear train
21	Criti	ical speed of shaft depends of	n	
	(1)	mass	(2)	stiffness
	(3)	mass and stiffness	(4)	mass, stiffness and eccentricity
22		timum magnitude of the unba	lanced	force in a line perpendicular to
	(1)	swaying couple	(2)	hammer blow
	(3)	unbalanced force	(4)	resultant force
OP1	6_A]	4	4	[Contd

OPI	[6_A]	5		[Contd
	(3)	infinity	(4)	spring force
	(1)	inertia force	(2)	impressed force
30	In f	orced vibrations, magnitude of	damı	ping force at resonance equals
	(3)	damping coefficient	(4)	ti ansimissionity
	(1)	_	` '	transmissibility
29		logarithmic decrement	(2)	critical damping
29	The	rate of decay of oscillations i	is kno	nwn as
	(3)	90 degree	(4)	180 degree
	(1)	0 degree	(2)	45 degree
28	For	steady state forced vibrations,	phase	e lag at resonance condition is
		•		
	(3)	pitching	(4)	steering
	(1)	rolling	(2)	waving
27	Whi	ch of the following effects is	more	dangerous for a ship
	(3)	acceleration	(4)	applied force
	(1)	displacement	(2)	velocity
26		damped vibration system, the		
	(3)	2	(4)	3

	(3)	under damped	(4)	critically damped
	(1)	not damped	(2)	highly damped
24				s unity, then the system will be
	(3)	one-quarter	(4)	two-thirds
	(1)	full	(2)	half
23		lly following fraction of recipro rocating engines	ocating	g masses is balanced in case of

31	<u> </u>	Carnot cycle, the work output is 25% of ermal efficiency of the engine would be
	(1) 10%	(2) 20%
	(3) 30%	(4) 50%
32	steam and helium as the working	ing on Carnot cycle respectively use air, g fluid. If all the engines operate within ture limits, then which engine will have
	(1) Engine A	
	(2) Engine B	
	(3) Engine C	
	(4) All engines will have the	same efficiency
33	_ ·	ne four operations suction, compression, pleted in the number of revolutions of
	(1) 1	(2) 2
	(3) 3	(4) 4
34	In a four stroke cycle S.I. engir	ne the camshaft runs at
	(1) same speed as crankshaft	
	(2) half the speed of cranksha	ft
	(3) twice the speed of cranksh	naft
	(4) any speed irrespective of o	crankshaft speed
35	The ratio of brake power to ind	icated power of an I.C. engine is called
	(1) mechanical efficiency	(2) thermal efficiency
	(3) volumetric efficiency	(4) relative efficiency
36	Specific fuel consumption of a die engine is	esel engine as compared to that for petrol
	(1) lower	
	(2) higher	
	(3) same for same power outp	put
	(4) may be lower or higher	
OP	P16_A]	6 [Contd

37	Compression ratio of diesel engines is in the range of						
	(1)	8 to 10	(2)	10 to 15			
	(3)	16 to 20	(4)	21 to 30			
38		ase of petrol engines, at starting	ıg				
	(1)	rich fuel-air ratio is needed					
	(2)	weak fuel-air ratio is needed					
	(3)	chemically correct fuel-air rati	io is	needed			
	(4)	any fuel-air ratio will do		•			
39	Volta	age developed to strike spark i	in the	e spark plug is in the range			
	(1)	6 to 12 volts	(2)	100 to 200 volts			
	(3)	1000 to 2000 volts	(4)	20000-25000 volts			
40	T	4-cylinder petrol engine the s	tanda	ard firing order is			
40			(2)	1-4-3-2			
	(1)	1-2-3-4	(4)				
	(3)	1-3-2-4	(+)				
41	Того	que developed by the engine is	s max	ximum at			
	(1)	minimum speed of engine					
	(2)	maximum speed of engine					
	(3)	maximum volumetric efficiency speed of engine					
	(4)	maximum power speed of engine					
42	Kno	ocking in petrol engines get rec	duced	l by			
	(1)	increasing compression ratio					
	(2)	retarding spark advance					
	(3)	increasing inlet air temperatu	re				
	(4)	increasing cooling water tem	perati	ure			
43	loni	ition quality of fuels for petrol	eng	ines is determined by			
	(1)	cetane number rating	(2)				
	. ,	calorific value rating	(4)

44 In automobile engines a thermostat is provided for (1) regulating the temperature of suction air (2) regulating the temperature of lubrication oil (3) controlling the temperature of the cooling system (4) regulating the temperature of exhaust gases 45 The dynamo in an automobile (1)converts mechanical energy into electrical energy (2) continually recharge the battery acts as a reservoir of electrical energy (3) (4) supplies electric power What is wheel base of a vehicle? 46 it is width of tyres (1)(2)it is distance between front tyres (3) it is distance between front and rear axles (4) it is extreme length of the vehicle 47 Stoichiometric ratio is chemically correct air-fuel ratio by volume (1)(2)chemically correct air-fuel ratio by weight (3) theoretical mixture of air for complete combustion **(4)** actual ratio of air to fuel for maximum efficiency 48 During idling a petrol engine requires (1) rich mixture (2) lean mixture (3) chemically correct mixture **(4)** variable mixture 49 An air-fuel ratio 8 will have

(3) excess air (4) any of the above 8 OP16_A] [Contd...

.

(2)

excess fuel

(1)

chemically correct air

50	Purpose of supercharging an engine is to					
	(1)	increase power output of engine				
	(2)	reduce specific fuel consumption				
	(3)	reduce noise of engine				
	(4)	improve cooling of cylinders				
51		order to achieve maximum possible fuel economy the design features the will be affected are				
	(1)	volumetric efficiency (2) compression ratio				
	(3)	method of charging (4) atomization				
52	For as c	same power output and same compression ratio four stroke S.I. engine compared to two stroke engine has				
	(1)	higher fuel consumption				
	(2)	lower thermal efficiency				
	(3)	higher thermal efficiency				
	(4)	higher exhaust temperature				
53	The will	rmal efficiency of standard Otto cycle for a compression ratio 5.5 be				
	(1)	20% (2) 35.4%				
	(3)	47.5% (4) 50%				
54	In s	spark ignition engines, knocking tendency is reduced by				
	(1)	reduction of compression ratio				
	(2)	advancing ignition timing				
	(3)	increasing exhaust temperature				
	(4)	adding dope like tetra ethyl lead to the fuel				
55	Hig	thest useful compression ratio is the compression ratio at which				
	(1)	engine can be safely operated				
	(2)	engine gives maximum thermal efficiency				
	(3)	engine operates smoothly				
	(4)	detonation first becomes audible

	(3)	fluctuating load	(4)	wear and tear
	(1)	shock load	(2)	constant load
63	Resili	ence of material should be	conside	red when it is subjected to

70	Cro	owning of flat pulleys is generally done				
	(1)	to reduce belt friction				
	(2)	to prevent belt joint from damaging the belt surface				
	(3)	to prevent belt from running off the pulley				
	(4)	in case of cross belt drives only				
71	Gea	rs used for non-intersecting perpendicular shafts are				
	(I)	spur gears (2) helical gears				
	(3)	double helical gears (4) hypoid gears				
72	A a	utomobile gear box has				
	(1)	simple gear train				
	(2)	compound gear train				
	(3)	epicyclic gear train				
	(4)	compound epicyclic gear train				
73	Shea	ar stress theory is applicable to				
	(1)	ductile materials (2) brittle materials				
	(3)	elastic materials (4) plastic materials				
74		en both pinion and gear are made of the same material, then from the				
	(l)	pinion is the determining factor				
	(2)	gear is the determining factor				
	(3)	any one of the two may be taken as determining factor				
	(4)	criteria is strength of any one of the teeth				
75	Lew	is equation in gears is used to evaluate				
	(1)	tensile stress in bending				
	(2)	compressive stress in bending				
	(3)	creep stress				
	(4)	shear stress on flank				
OP1	6 A]	12 Contd				

76 When a nut is tightened by placing wasner below it, the boil will subjected to following type of loads				sher below it, the boit will be
	(1)	compression	(2)	tension
	(3)	shear	(4)	combined load
77	Resili	ience of a bolt may be increa	ased b	у
	(1)	increasing its length		
	(2)	increasing its shank diameter	•	
	(3)	increasing diameter of thread	led po	rtion
	(4)	increasing head size		
78		aring efficiency of a riveted join	t is 60	%, then ratio of pitch to diameter
	(1)	0.2	(2)	0.3
	(3)	0.4	(4)	0.5
79	Fact	or of safety in design is the	ratio (of
	(1)	yield stress/working stress		
	(2)	tensile stress/working stress		
	(3)	compressive stress/working s	stress	
	(4)	bearing stress/working stress	ł	
80	A b	oiler plate thickness is 20 mi	m. The	e rivet diameter will be
	(1)	10 mm	(2)	20 mm
	(3)	30 mm	(4)	40 mm
81		ich of the following steel key ishing ?	is usua	ally strong in failure by shear and
	(1)	rectangular	(2)	square
	(3)	circular	(4)	flat
82	Thi	ck cylinders are designed by		
	(1)	Lame's equation		
	(2)	calculating radial stress whi	ich is	uniform
	(3)	thick cylinder theory		
	(4)	thin cylinder theory		
OI	P16_A] 1	13	[Contd

83	Slee	ve of mutt coupling is design	ed as	a
	(1)	thin vessel	(2)	thick vessel
	(3)	solid shaft	(4)	hollow shaft
84	The	most important dimension in	the d	esign of nut is
	(1)	inside diameter	(2)	height
	(3)	pitch diameter	(4)	thread size
85	Bolt	s are designed on the basis o	f	
	(1)	direct tensile stress	(2)	direct shear stress
	(3)	direct compressive stress	(4)	direct bearing stress
86	Dian	neter of washer is generally to	aken	e e
	(1)	equal to nut size		
	(2)	less than nut size		
	(3)	bigger than nut size		
	(4)	any size irrespective of nut	size	
87	Whie	ch of the following is a perm	anent	fastening ?
	(1)	bolts	(2)	keys
	(3)	screws	(4)	rivets
88	The	function of a washer is to		
	(1)	provide cushioning effect		
	(2)	provide bearing area		
	(3)	absorb shocks and vibrations		
	(4)	provide smooth surface in pl	ace of	f rough surface
89	Gear	box is used		
	(1)	to produce torque		
	(2)	for speed reduction		
	(3)	to obtain variable speeds		
	(4)	to increase efficiency of syst	em	
ΩP1	6 41	14		1Contd

90	Spriii	g differ watches and clocks	ume	•
	(1)	involute gears	(2)	cycloid gears
	(3)	epicycloid gears	(4)	straight rack gears
91	Econ	omizer is used in a steam po		
	(1)	air	(2)	feed water
	(3)	flue gases	(4)	steam
92	In a	two stage gas turbine plant	with i	ntercooling and reheating
	(1)	both work ratio and thermal	effici	ency improve
	(2)	work ratio improves but the	rmal	efficiency decreases
	(3)	thermal efficiency improves l	out w	ork ratio decreases
	(4)	both work ratio and thermal	effic	ency decrease
93	In c	ase of impulse steam turbine	there	is
	(1)	enthalpy drop in fixed and		
	(2)	enthalpy drop only in movin		
	(3)	enthalpy drop in nozzles		
	(4)	no enthalpy drop		
94	In h	nydraulic reaction turbine, func	tion (of the draft tube is to
	(1)	increase the flow rate		
	(2)	reduce water hammer effect		
	(3)	convert kinetic energy of w expansion in divergent part	ater	to potential energy by a gradual
	(4)	increase efficiency of the tu	ırbine	
95	Frai	ncis turbine is usually used for	or	
	(1)	low head installation upto	30 m	
	(2)	medium head installation fro	om 30	m to 180 m
	(3)	high head installation above	180	m
	(4)	for all heads		
OF	16_A]	1	5	[Contd

96	Over	rall efficiency of a thermal por	wer p	lant is equal to	
	(1)	Rankine cycle efficiency			
	(2)	Carnot cycle efficiency			
	(3)	Regenerative cycle efficiency			
	(4)	Boiler efficiency x turbine ef	ficien	cy x generator efficien	ncy
97	Press	sure on two sides of impulse	wheel	of a steam turbine	
	(1)	is same		•	
	(2)	is different			
	(3)	increases from one side to the	ie oth	er side	
	(4)	decreases from one side to t	he oth	ner side

OP	16_A	}	17	[Contd

- 110 Diversity factor is always
 - (1) equal to unity

- (2) less than unity
- (3) more than unity
- (4) zero
- 111 High load factor indicates that
 - (1) cost of generation per unit power is increased
 - (2) total plant capacity is utilized for most of the time
 - (3) total plant capacity is not properly utilized for most of the time
 - (4) load on the plant is high
- 112 CANDU reactor uses
 - (1) only fertile material
 - (2) highly enriched uranium
 - (3) natural uranium as fuel and heavy water as moderator and coolant
 - (4) plutonium as fuel
- 113 Fast breeder reactors are best suited for India because of
 - (1) large thorium deposits
 - (2) large uranium deposits
 - (3) large plutonium deposits
 - (4) all of the above
- 114 Thermal shielding is provided to
 - (1) protect the walls of the reactor from radiation damage
 - (2) prevent meltdown of the core of the reactor
 - (3) protect the operating personnel from exposure to radiation
 - (4) all of the above
- 115 The function of a moderator in a nuclear reactor is to
 - (1) slow down the fast moving electrons
 - (2) speed up the slow moving electrons
 - (3) start the chain reaction
 - (4) transfer heat produced inside the reactor to a heat exchanger

OP16_A| 18 [Contd...

	on chain reaction is possible v		
(1)	fission produces the same nur	mber c	of neutrons which are absorbed
(2)	fission produces more electro-	ns tha	n are absorbed
(3)	fission produces less electron	s than	are absorbed
(4)	none of the above		
In a	nuclear reactor the function of	of a re	eflector is to
(1)	reduce the speed of the neut	rons	
(2)	stop the chain reaction		
(3)	reflect the escaping neutrons	back	into the core

125	Whi	ch method is used for turning	inter	pal tapers only ?
	(1)	compound rest	(2)	tailstock off set
	(3)	taper attachment	(4)	reamer
126	A n	nandrel is		
	(1)	a slightly tapered hardened st	eel s	haft that supports works which
	(2)	a tapered gauge used for insp	ection	n of tapered holes
	(3)	auxiliary chuck used on lathe	for	holding small loads
	(4)	is used in lathe work to hold	l cast	ings
127	Preci	ision is		
	(1)	repeatability of a measurement	t pro	cess
	(2)	agreement of the result of a m measured quantity	easure	ement with the true value of the
	(3)	ability of a measuring device to being measured	dete	ct small differences in a quantity
	(4)	error of judgement in reading	an c	bservation
OP1	6_A]	20		[Contd

128 Accuracy is

- (1) repeatability of a measuring process
- (2) error of judgement in recording an observation
- (3) ability of an instrument to reproduce same reading under identical situations
- (4) agreement of the result of a measurement with the true value of the measured quantity
- 129 Which one of the following measuring instruments is supposed to be most accurate
 - (1) micrometer

- (2) vernier caliper
- (3) vernier dial gauge
- (4) optical projector
- 130 Knurling is an operation
 - (1) of cutting smooth collars
 - (2) of under cutting
 - (3) of generally roughing the surface for hand grip
 - (4) done prior to screw cutting
- 131 Resistance wire strain gauge works on the principle
 - (1) that resistance changes in proportion to strain on material
 - (2) the resistance of wire changes with load
 - (3) that conductivity is directly proportional to load on member
 - (4) due to elongation length increases and diameter reduces, thereby resistance changes
- 132 A rotameter is used to measure
 - (1) rpm of engine
 - (2) rotation of shafts
 - (3) twist due to torque applied on shafts
 - (4) flow of liquids and gases
- 133 Hot wire anemometer is used to
 - (1) measure pressure of liquid
 - (2) measure velocity of air stream
 - (3) measure temperature of moving fluid
 - (4) measure thermal conductivity of solid
