HUMAN RIGHTS COURSE

Course wise Details Eligibility for Application and Number of Seats:-

Human Rights concepts is a dynamic one, which will find expanded expression and constantly cover new areas as human society continues to evolve to higher levels of development. The original content of philosophy of fundamental freedom was limited mainly to civil and political rights of the individual, often referred to as “first generation” rights. The expansive nature of the concept of human rights clubbed with the realization that without guaranteeing economic, social and cultural rights, full enjoyment of civil and political rights was not possible led to the inclusion of economic, social and cultural rights, popularly described as “second generation” rights.

The concept of human rights in its expanding comprehension, has now traveled to encompass what are called “third generation” rights which include right to self determination, right regarded as belonging to peoples rather than individuals, right to sovereignty over natural wealth and resources of the country and right to development as well as rights of disadvantaged groups to special protection. Thus the road traveled by human rights movement has been historic and impressive.

The human rights study program is designed for academicians, educators, practitioners and general students interested in human rights issues and opened to all national.
