# THE INSTITUTION

## INTRODUCTION

**The Institution of Electronics and Telecommunication Engineers (IETE), formerly the Institution of Telecommunication Engineers (ITE) was founded in 1953 by a small group of professionals for the advancement of Telecommunication and Electronics in India. Today the Institution has grown in its status to international levels with its manifold activities for furthering the cause of development in the key sectors of Electronics, Telecommunications, Computer Science Engineering, Information Technology and allied disciplines. The emphasis of the current activities is on creation of a concrete base of trained manpower in these fields at various levels of competence and also to contribute gainfully towards the continued professional development needs of existing technical personnel. The IETE also provides a platform for meaningful interaction among professionals from the Industry, R&D Organisations, Educational Institutions and Government Departments.**

## MEMBERSHIP

1. The IETE is a professional society devoted to the advancement of Electronics and Telecommunication, Computers and Information Technology. The Institution is headed by a Council, elected from its large base of corporate members in India and abroad. It confers professional status by way of admitting such persons, as may be qualified to various classes of membership such as Honorary Fellow, Distinguished Fellow, Fellow, Member, Associate Member, Diploma Member Student Member and Associate. Organizational Membership is also open to Public/Private Sector Companies, Institutions, R&D Laboratories and Government Organisations.

## OBJECTIVES

2. The IETE focuses on advancing the science and technology of electronics, telecommunications, computers, information technology and related areas. The objectives of the Institution include;

- Organise conferences, symposia, workshops and brainstorming sessions involving all concerned professionals, students and industry associations for the advancement of the Disciplines.
- Provide a forum for discussion on national policies and to provide suitable inputs to policy makers.
- Promote and conduct basic engineering and continuing technical education programmes for human resource development.
- Bring out quality publications for all levels of readership.
- Honour outstanding professionals.

## EXAMINATIONS

3. The IETE conducts the AMIETE (Graduateship) Examination, in order that a student qualifies and becomes an Associate Member of the Institution. The AMIETE examination is recognized by Government of India, Ministry of Human Resource & Development (MHRD) for the

purposes of recruitment to superior posts and services under the Central Government. A similar recognition has been given by UPSC & several State Governments. A large number of Universities and Institutions have recognized AMIETE for admission to postgraduate courses. Extract/Detail of recognition from Govt of India/State Governments/ Universities/Institutions are appended at **Annexure I, II, III, & IV**

4. This qualification further enables a candidate to appear for GATE for postgraduate studies in India. AMIETE (ET) standard in a particular case has been evaluated by the World Education Service, a New York based Educational Credential Evaluators, who have declared that it is equivalent to a Bachelors Degree in Electronics and Telecommunication Engineering.

5. The IETE also conducts ALCCS course (Advanced Level Course in Computer Science) which is also recognised by the Ministry of HRD, Government of India, for the purpose of appointment to superior posts and services under the Central Government, where M. Tech in Computer Science is a prescribed qualification for recruitment.

### **FACILITIES FOR STUDENTS**

6. The IETE helps the students by extending library facilities, laboratory assistance, and coordination of IETE Students Forum and by providing necessary guidance at its IETE Centres. To spread its many fold technical activities in all the regions of the country, IETE has established so far 65 Centres spread all over the country including a centre at Kathmandu and examination centre at Abhu Dhabi. IETE also has mutual arrangements with similar professional bodies like the Institution of Engineers (India), CSI, IEEE (USA), IEEE Com Soc and IET (UK) for availing each other's facilities for the benefit of its members.

### **LECTURES THROUGH EDUSAT SATELLITE**

7. IETE has embarked on an ambitious project of " Reaching The Unreached "through its Satellite Education Programme. In this programme, live, interactive lectures are broadcast from its Teaching End Studio at IETE, Noida centre and is received at classrooms terminals (SITs) at Ahmedabad, Bangalore, Bhopal , Chandigarh ,Delhi, Pune ,Hyderabad, Mankapur and Imphal. More SITs are being established at other centres shortly.

### **SOLUTIONS TO QUESTION PAPERS**

8. To help the students , IETE has printed solutions to Questions papers for both AMIETE and DipIETE streams. List of subjects for which solutions are printed is available on the website [www.iete.org](http://www.iete.org)

### **LABORATORY MANUAL**

9. All students of AMIETE and DipIETE are required to procure lab-manuals and conduct their experiments and record the same in the concerned lab-manuals. The manuals of all the lab examination have been printed. Students can obtain these manuals as under:

**AMIETE (ET)**  
**DETAILED SYLLABUS**

**Introduction**

Most of the Student Members of the IETE are working engineers/ technicians/science graduates or under graduates. Thus, due to occupational reasons and other factors these students are deprived of a formal education and therefore have to learn the subjects through self-study only.

**Review of Syllabus**

2. IETE periodically reviews the syllabi of AMIETE and the aim of these reviews is not only to renovate and modernize the contents but also to make them contemporary. The syllabi for both Electronics & Telecommunications (ET), Computer Science & Engineering (CS) and Information Technology (IT) streams have been reviewed recently.

3. Keeping the above aspects in view and based on feed backs/suggestions received from the students, this syllabus has been formulated to meet the following criteria:-

- The Syllabus should cater to the technological advancements.
- The textbooks should be available and affordable to the students.
- In the absence of a formal coaching to the students, there should be a reasonable correlation between the topics in a subject and the textbooks.

**Salient Features**

4. Some salient features of the syllabus are:-

- Each subject has a code preceding it (viz AE101, AC101 and AT101 are codes for Mathematics-I in ET, CS and IT streams respectively).
- In order to guide the student and to enable him/her to prepare well for an examination, each subject is divided into 8 units and each unit has the course contents to be covered in 7 or 8 hours.
- The textbooks have been numbered in Roman Numerical (viz I, II, III)
- The chapters and sections are mentioned inside the bracket e.g. I (2.1) would indicate chapter 2 and section 1 of textbook-I.

**Scheme of the Examination**

5. For all theory subjects the Question Paper contains

- 10 objective questions for 20 marks covering the complete syllabus
- 8 questions are from each unit and each question carries 16 marks.

6. Regular feed back from the students, academicians, corporate members and professionals is requested to keep this syllabus updated, so that our students keep abreast of latest technological changes. Though every effort has been made to identify standard and best textbooks for each subject, we welcome suggestions on availability of better and cheaper textbooks.
