Direction for Question 31-40: Read the given passage carefully and answer the questions given after the passage:

1. Often, we passionately pursue matters that in the future appear to be contradictory to our real intention or nature; and triumph is followed by remorse or regret. There are numerous examples of such a trend in the annals of history and contemporary life.

2. Alfred Nobel was the son of Immanuel Nobel, an inventor who experimented extensively with explosives. Alfred too carried out research and experiments with a large range of chemicals; he found new methods to blast rocks for the construction of roads and bridges; he was engaged in the development of technology and different weapons; his life revolved around rockets and cannons and gun powder. The ingenuity of the scientist brought him enough wealth to buy the Bofors armament plant in Sweden.

3. Paradoxically, Nobel's life was a busy one yet he was lonely; and as he grew older, he began suffering from guilt of having invented the dynamite that was being used for destructive purposes. He set aside a huge part of his wealth to institute Nobel Prizes. Besides honouring men and women for their extraordinary achievements in physics, chemistry, medicine and literature, he wished to honour people who worked for the promotion of peace.

4. It's strange that the very man whose name was closely connected with explosives and inventions that helped in waging wars willed a large part of his earnings for the people who work for the promotion of peace and the benefit of mankind. The Nobel Peace Prize is intended for a person who has accomplished the best work for fraternity among nations, for abolition or reduction of war and for promotion of peace.

5. Another example that comes to one's mind is that of Albert Einstein. In 1939, fearing that the Nazis would win the race to build the world's first atomic bomb, Einstein urged President Franklin D Roosevelt to launch an American programme on nuclear research. The matter was considered and a project called the Manhattan Project was initiated. The project involved intense nuclear research the construction of the world's first atomic bomb. All this while, Einstein had the impression that the bomb would be used to protect the world from the Nazis. But in 1945, when Hiroshima was bombed to end World War II, Einstein was deeply grieved and he regretted his endorsement of the need for nuclear research.

6. He also stated that had he known that the Germans would be unsuccessful in making the atomic bomb, he would have probably never recommended making one. In 1947, Einstein began working for the cause of disarmament. But, Einstein's name still continues to be linked with the

bomb. Man's fluctuating thoughts, changing opinions, varying opportunities keep the mind in a state of flux. Hence, the paradox of life: it's certain that nothing is certain in life.

31. The Manhattan Project was initiated _____.

- (a) For humanity
 - (b) With explosives
 - (c) For the Nobel Peace Prize

- (a) Lonely yet rich

Direction: Read the given passage carefully and choose the most appropriate option to the questions given below.

The World Trade Organisation (WTO) was created in the early 1990s as a component of the Uruguay Round negotiation. However, it could have been negotiated as part of the Tokyo Round of the 1970s, since negotiation was an attempt at a 'constitutional reform' of the General Agreement on Tariffs and Trade (GATT). Or it could have been put off to the future, as the US government wanted. What factors led to the creation of the WTO in the early 1990s? One factor was the pattern of multilateral bargaining that developed late in the Uruguay Round. Like all complex international agreements, the WTO was a product of a series of trade-offs between principal actors and groups. For the United States, which did not want a new organization, the disputed settlement part of the WTO package achieved its longstanding goal of a more effective and more legal dispute settlement system. For the Europeans, who by the 1990s had come to view GATT dispute settlement less in political terms and more as a regime of legal obligations, the WTO package was acceptable as a means to discipline the resort to unilateral measures by the United States. Countries like Canada and other middle and smaller trading partners were attracted by the expansion of a rule-based system and by the symbolic value of a trade organization, both of which inherently support the weak against the strong. The developing countries were attracted due to the provisions banning unilateral measures. Finally, and perhaps most important, many countries at the Uruguay Round came to put a higher priority on the export gains than on the import losses that the negotiation would produce, and they came to associate the WTO and a rule-based system with those gains. This reasoning - replicated in many countries - was contained in U. S. Ambassador Kantor's defence of the WTO, and it announced to a recognition that international trade and its benefits cannot be enjoyed unless trading nations accept the discipline of a negotiated rule-based environment. A second factor in the creation of the WTO was pressure from lawyers and the legal process. The dispute settlement system of the WTO was seen as a victory of legalists but the matter went deeper than that. The GATT, and the WTO, are contract

organizations based on rules, and it is inevitable that an organization creating a further rule will in turn be influenced by legal process. Robert Hudee has defined the "momentum of legal development". But what is it precisely? Legal development can be defined as the promotion of technical and legal values of consistency, clarity (or certainty) and effectiveness. These are the values for the ones who are responsible for administering any legal system will seek to maximize. As it played out in the WTO, consistency meant integrating under one roof the whole lot of separate agreements signed under GATT auspices; clarity meant removing ambiguities about the powers of contracting parties to make certain decisions or to undertake waivers; and effectiveness meant eliminating exceptions arising out of grandfather-rights and resolving defects in dispute settlement procedures and institutional provisions. Concern for these values is inherent in any rule-based system of co-operation, since without these value rules would be meaningless in the first place, therefore, create their own incentive for fulfilment. The moment of legal development has occurred in other institutions besides the GATT, most notably in the European Union (EU). Over the past two decades the European Court of Justice (ECJ) has consistently rendered decisions that have expanded incrementally the EU's internal market, in which the doctrine of 'mutual recognition' handed down in Cassis de Dijon case in 1979 was a key turning point. The court is now widely recognized as a major player in European integration, even though arguably such a strong role was not originally envisaged in the Treaty of Rome, which initiated the current European Union. One means the Court used to expand integration was the 'teleological method of interpretation', whereby the actions of member states were evaluated against 'the accomplishment of the most elementary goals set forth in the Preamble to the (Rome) treaty. The teleological method represents an effort to keep current policies consistent with slated goals, and it is analogous to the effort in GATT to keep contracting party trade practices consistent with slated rules. In both cases legal concerns and procedures are an independent force for further co-operation.

In the large part the WTO was an exercise in consolidation. In the context of a trade negotiation that created a near-revolutionary expansion of international trade rules, the formation of the WTO was a deeply conservative act needed to ensure that the benefits of the new rules would not be lost. The WTO was all about institutional structure and dispute settlement: these are the concerns of conservatives and not revolutionaries, that is why lawyers and legalists took the lead on these issues. The WTO codified the GATT institutional practice that had developed by custom over three decades, and it incorporated a new dispute settlement system that was necessary to keep both old and new rules from becoming a sham. Both the international structure and the dispute settlement system were necessary to preserve and enhance the integrity of the multilateral trade regime that had been built incrementally from the 1940s to the 1990s.

11. In the statement '... it amounted to a recognition that international trade and its benefits cannot be enjoyed unless trading nations accept the discipline of a negotiated rule-based environment', it refers to:
- The export gains many countries came to associate with a rule-based system.
 - The higher priority on export gains placed by many countries at the Uruguay Round.
 - The provision of a rule-based system by the WTO.
 - Ambassador Kantor's defence of the WTO.
12. What would be the closest reason why WTO was not formed in 1970s?
- The US government did not like it.
 - Important players did not find it in their best interest to do so.
 - Lawyers did not work for the dispute settlement system.
 - The Tokyo Round negotiations was an attempt at constitutional reform.
13. In the method of interpretation of the European Court of Justice:
- Actions against member states needed to be evaluated against the said community goals.
 - Enunciation of the most elementary community goals needed to be emphasized.
 - Current policies need to be consistent with stated goals.
 - Contracting party trade practices need to be consistent with stated rules.
14. According to the passage, WTO promoted the technical legal values partly through.
- Integrating under one roof the agreements signed under GATT.
 - Rules that create their own incentive for fulfilment.
 - Ambiguities about the powers of contracting parties to make certain decisions.
 - Grandfather-rights exceptions and defects in dispute settlement procedures.
15. The most likely reason for the acceptance of the WTO package by nations was that:
- It has the means to prevent the US from taking unilateral measures.
 - Its rule-based system leads to export gains.
 - It settles disputes more legally and more effectively.
 - They recognized the need for a rule-based environment to protect the benefits of increased trade.

LEGAL APTITUDE/REASONING

Question numbers 111-161 consists of legal proposition(s)/ principle(s) (hereinafter referred to as 'principle') and facts. Such principles may or may not be true in the real and legal sense, yet you have to conclusively assume them to be true for the purposes of this Section. In other words, in wiring these questions, you must not rely on any principle except the principles those are given herein below for every question. Further, you must not assume any facts other than those stated in the question. The objective of this section is to test your interest towards study of law, research aptitude and problem solving ability, even if the 'most reasonable conclusion' arrived at may be absurd or unacceptable for any other reason. It is not the objective of this section to test your knowledge of law.

Therefore, to answer a question, principle is to be applied to the given facts and to choose the most appropriate option.

Principle: The concept of natural justice is against biasness and for the right to a fair hearing. While the term natural justice is often retained as a general concept, and it has largely been replaced and extended by the general 'duty to act fairly'.

111. **Facts:** 'X', a male employee of a company was dismissed by the employer just on the basis of a complaint by 'Y', a female employee of the company that 'X' was trying to be too friendly with her and often requested her to accompany him to the canteen.

- (a) No, because in the modern times this type of behaviour is common
- (b) No, because the employer did not give a chance to 'X' to explain his side, there by violated the principles of natural justice.
- (c) Yes, moral law is antique and therefore, not applicable in modern times, therefore the termination is valid and no violations of the principles of natural justice occurred
- (d) Yes, because men are not supposed to behave improperly with women and hence there is no violation of any principles of law

 - (c) Sale of car is complete.
 - (d) Sale will be automatically completed after the expiry of one month.

Principle: Every agreement, by which any party is restricted absolutely from enforcing his right in respect of any contract, by the usual legal proceedings in the ordinary Tribunals, is void to that extent. The law also provides that nobody can confer jurisdiction to a civil court by an agreement between parties.

113. **Facts:** A and B entered into a valid contract for rendering certain service. A clause in the contract was that in case of any dispute arose out of the contract; it shall be referred to for Arbitration only. Is the contract valid?

 - (b) The parties were trying to confer jurisdiction to some authority to decide a dispute and hence the clause would be invalid.
 - (c) Arbitrator cannot be termed as an ordinary Tribunal. Hence, the agreement is void and would be unenforceable.
 - (d) The contract is valid but the clause regarding Arbitration is void.

Principle: It is a case of fraud where a party to a contract knows or believes a fact to be true, but conceals it actively from the other party with a view to induce that person to enter into the contract.

114. **Facts:** While taking a life insurance policy, in reply to questions by the insurance company during the inquiry into his proposal, Zameer deliberately concealed the fact of his medical treatment for a serious ailment, which he had undergone only a few weeks ago.
- The act of Zameer did not amount to fraud, as disclosing the fact would have resulted in exposure of his privacy.
 - The act of Zameer amounted to innocent misrepresentation
 - The act of Zameer did not amount to any misrepresentation.
 - The concealment of fact by Zameer amounted to fraud.

Principle: Contract is a written or spoken agreement, with specific terms between two or more persons or entities in which there is a promise to do something in return for a valuable benefit known as consideration. Such an agreement is intended to be enforceable by law. A unilateral contract is one in which there is a promise to pay or give other consideration in return for actual performance.

Mr. Martin, a foreigner who came to India as a Tourist who was staying in a Hotel found a Key similar to same Car Ignition Key. Mr. Martin brought this matter to the notice of the Hotel Manager. The Manager informed Mr. Martin about the Company's advertisement on January 1, 2017. Mr. Martin wants to claim the Car. Will he succeed?
- No. The Soap Company has not entered into a contract with Mr. Martin as he was not in India on January 1, 2017 when the advertisement was published.
 - No. Actual intention of the Company was to promote the sale of the Soap.
 - The Hotel Manager who could legally claim the Car as he was the one actually purchased the soap for the use in the Hotel.

- X is not guilty of criminal misappropriation as he did not make any personal gain out of those items with him.
 - X is liable for criminal misappropriation and embezzlement.
 - X is liable for theft as he took A's property without X's permission.
 - If at all X is liable, it is for criminal misappropriation only.

P told her that she should compensate him for the advertisement charges then only he would return it otherwise he will sell it and make good his expenses. The film star told P that she had advertised in a national newspaper about her lost Necklace which was lost somewhere in the Cricket Stadium. The advertisement was published for three consecutive days incurring a large expenditure for her. Mentioning all this she refuses to pay P and claims the Necklace back. Which among the following is the most appropriate answer to this?
- (a) P was requesting the film star for the actual expenditure incurred by him before returning the Necklace. This request is legally sustainable.
 - (b) The film star was right in refusing P, as she did not offer any reward for anyone who would return the Necklace.
 - (c) As it was wrong on the part of P to bargain over a property belonging to a celebrity and he should have accepted some gift which might have been given by the film star and returned the Necklace instead of threatening her that he would sell it.
 - (d) As the film star had notified in the newspaper, P ought to have read it and contacted her instead of publishing another notification. So he cannot claim any compensation.

 - The Bank can recover the loan amount from the Trade Union as Soloman is the Secretary of the Union.
 - The Bank cannot initiate any action against Soloman as he is the Secretary of a Registered Trade Union.

Indian law expressly forbids a minor from entering into a contract. Hence, any contract entered into by a minor is void-ab-initio regardless of
