Page 8-29

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

Vision:

"To produce innovative, entrepreneurial and successful engineers and technologists of high caliber for the nation, to serve as a valuable resource for industry, academia and society"

Mission:

1. To provide the students and the faculty with opportunities to create, interpret, and apply the knowledge in the field of Mechanical Engineering.

2. Provide technological service to local, national, and international communities.

Programme Educational Objectives:

- 1. Possess advanced knowledge and understanding of the specialization thus enabling them to tackle on-field problems, as well as pursue further academic achievements through research.
- 2. Possess entrepreneurial, managerial, analytical, problem solving and communication skills.
- 3. Inculcate students in a responsible, professional and ethical behavior.
- 4. Inculcate an attitude for life-long learning process.

Programme Outcome:

- 1. Possess knowledge of modern managerial and industrial concepts, conduct in-depth analysis and studies and apply expertise practically.
- 2. Work as well as manage multi-disciplinary projects to enhance skills, make effective oral presentations and prepare technical documents effectively.
- 3. Develop professional and ethical attitude and become socially responsible citizens.
- 4. Ability to understand global issues and conduct independent research in the emerging areas.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

List of Elective Subjects:-

| S.No. | Elective I | Code | S.No. | Elective II | Code |
|-------|---|---------------|-------|--|---------------|
| 1 | Enterprise Resource Planning | ME43231 (ME) | 1 | Production and Operation Management | ME43241 (ME) |
| 2 | Financial Management | ME43232 (ME) | 2 | Project Management | ME43242 (ME) |
| 3 | International Business Management | ME43233 (ME) | 3 | Agile Manufacturing | ME43243 (ME) |
| 4 | Strategic Management | ME43234 (ME) | 4 | Research Methodology | ME43244 (ME) |
| 5 | Security Analysis and Portfolio Management | ME43235 (ME) | 5 | Statistics for Management | ME43245 (ME) |
| 6 | Human Resource Management | ME43236 (ME) | 6 | Safety Aspect of Industrial and Manufacturing System | ME43246 (ME) |
| 7 | Customer Relationship Management | ME43237 (ME) | 7 | Optimization Techniques | ME43247 (ME) |
| 8 | E-Commerce Technology and Management | ME43238 (ME) | 8 | Creative Problem Solving Techniques | ME43248 (ME) |
| 9 | Database Management System | ME43239 (ME) | 9 | Organizational Theory Design and Development | ME43249 (ME) |
| 10 | Decision Support System | ME432310 (ME) | 10 | Computer Integrated Manufacturing | ME432410 (ME) |

***Usually new topics not covered in the syllabus will be given to each student. He / She will be asked to make a presentation in the class in seminar period.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

Department of Mechanical Engineering Programme: M. Tech. in Industrial Engineering and Management Course Title: Work Design and Measurement Course Code: ME43111ME Semester: First

| L | Т | Р | Credit |
|---|---|---|--------|
| 3 | 1 | 0 | 4 |

COURSE OUTCOMES:

At the end of the course, Student will be able:

- 1. To understand the need and importance of productivity.
- 2. To critically analyze existing methods of doing the job and evolve efficient and economical methods.
- 3. To understand ways of determining standard time for completing the job.
- 4. To apply work analysis and work measurement to office work.

SYLLABUS

PRODUCTIVITY CONCEPTS AND TECHNIQUES FOR ITS IMPROVEMENT

Introduction, Definitions of productivity, Productivity of materials, Productivity of land, buildings, machines and manpower, Factors contributing to productivity improvement, Work content and ineffective time, Improving productivity by reducing work content, Improving productivity by reducing ineffective time, Management of productivity.

WORK STUDY

Introduction, Definition, Basic procedure, Prerequisites of conducting a work study, the human factor in the application of work study, the influence of working conditions on work study, Ergonomics.

METHOD STUDY

Introduction to method study and the selection of job, Definition and objectives of method study, Procedure, Selection of job, recording of facts: Flow process charts, Man type, Material type, Equipment type, Critical Examination: The questioning technique, The principles of motion economy, Micro motion study, The simo chart Development & installation of improved method.

WORK MEASUREMENT

Purpose of work measurement, The techniques of work measurement, Time study & work sampling method, Rating, Allowances, Determination of standard time, PTS.

WORK DESIGN FOR OFFICE WORK

Organization and methods, Work measurement of office work, Work analysis techniques applied to support staff, Form design and control.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

TEXT BOOKS

- 1. Barnes, R.M. Motion and Time Study, Design and measurement of work, John Wiley sons (Asia)
- 2. ILO, Introduction to Work Study, Oxford and IBH publishing.

Reference Books

- 1. Benjamin W.Niebel, Andris Freivalds, Methods, standards & Work Design, McGraw Hill
- 2. Maynard H.B, Industrial Engineering Hand book, McGraw-Hill

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

Department of Mechanical Engineering

| Programme: M. Tech. in Industrial Engineering and Management | | | | |
|--|----------------------------------|--|--|--|
| Course Title: Decision Modeling | Core/ Elective: Core | | | |
| Course Code: ME43112ME | Contact hours and Credit: | | | |
| Semester: First | | | | |

| L | Т | Р | Credit |
|---|---|---|--------|
| 3 | 1 | 0 | 4 |

COURSE OUTCOMES: After studying this subject, Student will be able to:

1. Develop mathematical model of real life situations/problems.

2. Solve the different LPP, transportation, assignment problem by different methods/algorithms.

3. Develop network model of real life problem and analyze/solve/synthesize by different algorithms like shortest route, minimum spanning tree, maximum flow etc.

- 4. Optimize multi-objective problem through different algorithms.
- 5. Develop sequential, deterministic and stochastic case modules and solve/analyze the problem through forward and backward recursion equations and Markov Process.

SYLLABUS

INTRODUCTION

Theory of Simplex Method, Duality Theory, Dual simplex method, Revised simplex method, Transportation, Assignment, Sensitivity analysis.

Integer Programming: Cutting plane method, Branch and bound method.

NETWORK MODELS AND DECISION

Shortest Route problems, Minimal spanning tree problems, Maximal flow problems. Decision analysis, Decisions under risk, Decision trees – Decision analysis with experimentation, Utility theory, Decisions under uncertainty.

MULTI-OBJECTIVE DECISION MODELS

Introduction to multi-objective decision making, Concept of pareto-optimality, Goal programming formulation, The weighting method of solution, Analytic hierarchy process

SEQUENTIAL DECISION MAKING (DETERMINISTIC CASE)

Sequential decision models, Dynamic programming, Bellman's principle of optimality, Forward recursion and backward recursion, discrete state discrete time case, Continuous state continuous time case.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

SEQUENTIAL DECISION MAKING (STOCHASTIC CASE)

Stochastic processes, Markov processes, Markov chains, Markov decision problems, Algorithms for solving Markov decision problems, finite-stage models, infinite stage models.

| L | Т | Р | Credit |
|---|---|---|--------|
| 3 | 1 | 0 | 4 |

COURSE OUTCOMES: At the end of this course, the students are expected to be able to: 1. To classify and distinguish data, information and knowledge in context of information management.

2. To construct database management system and data model to enhance the performance of an organization.

3. To develop management information system illustrating various structured analysis tools.

SYLLABUS

INTRODUCTION

MIS Framework, Importance, Concept, Definition, Nature and Scope, Structure and Classification, Types of Information, Information Quality, Dimensions of Information, Human as an Information Processing System

INFORMATION TECHNOLOGIES

Basics of Computer System, Computer Software, Hardware and Programming Languages. Database Management System (DBMS), Database Hierarchy, Types of Database Structures or Data Models, Structured Query Language (SQL), Advances in Database Technology.

BUSINESS APPLICATIONS OF INFORMATION SYSTEMS

E business and E Commerce- Introduction, Cross functional Enterprise Information System, E-Commerce, Decision Making and Decision Support System (DSS).

DEVELOPMENT OF MIS

System Development Approaches, System Development Stages, System Analysis and Design, Structured Analysis Tool, Application of Operational Information Systems to Business.

MANAGEMENT OF INFORMATION RESOURCES

Implementation Processes, Maintenance, Evaluation and Security of Information System, Protection of Information System, Information System Planning, The four Stage Model of IS, Information Resource Management (IRM), Organization of Information System and End-User Computing.

Department of Mechanical Engineering Programme: M. Tech. in Industrial Engineering and Management

Course Title: Computer Method for Management Course Code: ME43114ME Semester: First

Core/ Elective: Core

Contact hours and Credit:

| L | Т | Р | Credit |
|---|---|---|--------|
| 3 | 1 | 0 | 4 |

COURSE OUTCOMES:-

At the end of this course, the students will be able to:

- 1. Develop flowcharts and create programmes for solution of simple problems.
- 2. Understand structured programming concepts especially related to managerial theories.
- 3. Execute managerial algorithms using Matlab/C/Excel.
- 4. Solve the managerial problems using computer programming.

SYLLABUS

FUNDAMENTALS OF PROGRAMMING IN C/ MAT LAB:

Variables and Arithmetic statements, Arrays, Functions, Data types, Flow of control, Functions, Recursion, Pointers and strings, Bitwise operators and enumeration types, Structures and unions, Linear linked lists and list operations, Basic I/O functions.

PROGRAMMING AND PROBLEM SOLVING IN C / MAT LAB:

Computer organization, Steps involved in computer programming, developing algorithms and flow charts for business problem, Efficiency of algorithms, Program design methods, Top-down modular programming, Measures of program performance.

SUPPLY CHAIN NETWORK DESIGN:

Basics of Network, Decisions, Mathematical modelling for supply chain echelons with flow, structure, capacity constraints etc.

Algorithms for solving Network design problems Flow, capacity based problems, integer problems, and binary problems

COMPUTERIZED LAYOUT PLANNING:

Quantitative, Qualitative, and multi-objective, Limitation of Computerized Layout Planning, Flow Dominance, Complexity Rating, Solution Efficiency

Location Factors, Location Theory, Nature, Significance and Scope of Facilities Layout Planning, Basic Philosophy in Computerized Layout Planning, Construction and Improvement Algorithms, Major features of Improvement Algorithms.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

MASS PRODUCTION MANAGEMENT (LINE BALANCING):

Basic idea of assembly line balancing, Optimization of number of stations with given production rate, Minimization of cycle time with fixed number of stations. Line Balancing Algorithms: Kilbridge and Wester, Rank Positional Weight method, COMSOAL, Modie and Young method.

| Programme: M. Tech. in Industrial Eng | ineering ar | nd N | lana | agement | |
| Course Title: Management and Productivity Core/Elective: Core | | | | | |
| Course Code: ME43115 ME | Contract | hou | rs a | nd credit | |
| Semester: First | L | Т | Р | Credit | |
| | 3 | 1 | 0 | 4 | |

COURSE OUTCOMES: The focus of Management and Productivity is Improve personal skills in managing workload & conflicting priorities. Develop a structured & systematic approach to productivity bottlenecks & learn practical techniques to streamline & reach your productive peak. At the end of the course student will able to:

- Descried the core features of the management and productivity management function at the managerial and strategic levels, specifically the relationships between people, process, technology, productivity and quality and how it contributes to the competitiveness of firms.
- Explain the various parts of the management and productivity processes and their interaction with other business functions (strategy, engineering, finance, marketing, HRM, project management and innovation)
- Apply and analyze the value analysis (VA), value engineering (VE) and business process reengineering (BPR) to enhance the productivity radically.

SYLLABUS

INTRODUCTION

Concept, features, natures and importance of management, principles of scientific management, effective management. Productivity concepts-Macro and Micro factors of productivity, productivity benefit model, productivity cycles.

FUNCTIONS OF MANAGEMENT

Concept of planning and its types, objective and strategy related to planning. Concept of organizing and forms of organization structure. Concept of staffing recruitment, selection, training and development. Motivation theory and applications, leadership. Controlling and its techniques.

VALUE ANALYSIS AND VALUE ENGINEERING

Concept-procedure-application and role in productivity. Productivity models: Productivity measurement at International, National and organization level, total productivity models. Productivity management in manufacturing and service sector.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

BUSINESS PROCESS REENGINEERING

Concept of BPR, process of BPR, prerequisites for effective BPR implementation, application of BPR in productivity improvement. Case study related to BPR application.

SYSTEM IMPROVES PRODUCTIVITY THROUGH QUALITY

Quality and productivity, total quality control and quality management; effective human resources management: management of people, role of management, workers participation, productivity training.

Text Books

1. Productivity engineering and management – Sumanth, D.J. – Tata McGraw-Hill, New Delhi 1990.

2. Handbook for Productivity Measurement and Improvement - Carl G. Thor - Productivity Press.

3. Ralph M. Barnes, "Motion and Time Study", Johan wiley and sons, 1990.

4. Principles and Practice of Management- L M Prasad, Sultan Chand & Sons

Reference Books

1. Productivity management, a practical Handbook, Joseoh Prokopenko, International Labour office, 1987.

 Business Process Improvement: The Breakthrough Strategy for Total Quality, Productivity and Competitiveness – H. James Harrington - McGraw-Hill
Re-engineering and re-inventing the enterprise – Rastogi, P.N.,-Wheeler publications, New Delhi 1995.

4. Productivity Management-Systems approach-Premvrat, Sardana, G.D. and Sahay, B.S.-Narosa Publications, New Delhi, 1998.

Semester: First

| L | Т | Р | Credit |
|---|---|---|--------|
| 0 | 0 | 3 | 2 |

Development of algorithms and computer programs using **C**, **MATLAB**, or **EXCEL** (discrete) for the modeling and analysis of following decision problems:

- Graphical Methods solution of different LPP (for two decision variables)
- Simplex problem for LPP
- > Initial solution of transportation problem and optimization through MODI method
- > Development of various decision models
- Multi-objective Decision Models
- Sequential Decision Making (Deterministic Case): Forward recursion and backward recursion, discrete state discrete time case, Continuous state continuous time case.
- Sequential Decision Making (Stochastic Case): Based on Markov decision Algorithms

Course Outcomes

At the end of this lab, students will be able to:

- Acquire new problem solving skills.
- Develop flowcharts.
- Understand structured programming concept related to industrial engineering and management.
- Write programme in C/C++/MATLAB and work with EXCEL for managerial functions.

<u>Lab</u>

Development of algorithms and computer programs using C, C++, MATLAB, LINDO, LINGO, EXCEL and ARENA for the modeling and analysis of decision problems in the following areas:

- Production Planning Controls
- Inventory And Supply Chain Management
- Manufacturing System Design
- Performance of Manufacturing System
- Facilities Planning

National Institute of Technology Raipur

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

Department of Mechanical Engineering

Programme: M. Tech. in Industrial Engineering and Management

Course Title: Quality Assurance Course Code: ME43211ME Semester: Second Core/ Elective: Core Contact hours and Credit:

| L | Т | Р | Credit |
|---|---|---|--------|
| 3 | 1 | 0 | 4 |

COURSE OUTCOMES:

- 1. To understand the importance of quality assurance in competitive environment.
- 2. To have an overview of use of statistics in process control.
- 3. To distinguish between chance cause and assignable cause of variation in quality.
- 4. To understand methods of sampling inspection.
- 5. To understand concepts of TQM, Quality circle, ISO 9000 series of standard etc.

SYLLABUS

INTRODUCTION

Definition and Need of quality, Aspects of quality, Quality of design, Quality of conformance, Quality characteristic, Quality control and Quality Assurance, Economics of quality. Inspection, Its objectives and types, Inspection versus Quality Control, Statistical Quality Control.

Probability & Statistics: Definition, Laws, Probability Distributions (Normal Binomial, Poisson, Exponential) & related problems. Measures of Central tendency & Dispersion, Concept of Variation, Variable and attribute data, Frequency distribution.

STATISTICAL PROCESS CONTROL

Control Charts, Concept of variability, Assignable & chance causes, Concept of specifications and tolerances, Definition and objectives of control charts, Control charts for variables and attributes & related problems, Variable charts vs attribute charts, Patterns on control charts, Type–I & Type-II Errors, Process capability and its methods of determination.

ACCEPTANCE SAMPLING

Definition, Advantages over 100% inspection, Methods of taking samples, operating characteristics curve. Single, Double and Multiple sampling Sequential Sampling Plan & Related problems.

TOTAL QUALITY MANAGEMENT

TQM principles, Customer satisfaction, voice of customer, House of quality, Quality function deployment. Description of TQM, Concept of Quality Circles, JIT System, Taguchi's Concept of Quality, Zero Defect Concept, Six sigma Concept.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

QUALITY SYSTEMS

Description of ISO: 9000 series of standards, ISO: 9001–2000 Systems. Implementation of Quality systems, documentation – Quality Auditing.

RELIABILITY: Definitions of Reliability Failure, Elements of reliability. Quality vs. reliability, System Reliability & related problems. Causes of failures, Constant Failure rate, MTBF, Bath Tub Curve.

Department of Mechanical Engineering Programme: M. Tech. in Industrial Engineering and Management Course Title: Supply Chain Management Course Code: ME43212ME Semester: Second

| L | Т | Р | Credit |
|---|---|---|--------|
| 3 | 1 | 0 | 4 |

COURSE OUTCOMES: After studying this subject, Student will be able to:

- 1. Understand the nature of supply chains and trace the historical perspective, leading to their development and growth.
- 2. Identify the goal of a supply chain and find out the impact of supply chain decision on the success of the firm.
- 3. Design distribution network with strength and weakness of various distribution options of SCM.
- 4. Synthesize different real life cases and establish strategic fit between the supply chain strategy and the competitive strategy.

SYLLABUS

INTRODUCTION TO SUPPLY CHAIN MANAGEMENT (SCM)

Concept of Logistics Management, Concept of supply management and SCM, Component, Benefits of SCM, Core competency, Value chain, Elements of supply chain efficiency, Flow in supply chains, Key issues in supply chain management, Trends in Supply Chain, Supply Chain Planning, Decision phases in supply chain, Supply chain integration, Process view of a supply chain, Competitive Strategy and supply chain strategies, Uncertainties in supply chain, Supply chain drivers. Bullwhip Effect and Information Sharing, Push and Pull Supply Chain.

FORECASTING AND INVENTORIES IN A SUPPLY CHAIN

Forecasting and its role, characteristics of forecasts, classification, forecasting methods, Integrate demand planning and forecasting through SC.

Planning and managing inventories in SC: Goals, role, effects of cyclic inventory in SC, effect of lot size, Economic order quantity, Quantity Discount, Strategic change

SOURCING AND PROCUREMENT

Outsourcing benefit, Importance of suppliers, evaluating a potential supplier, Supplier selection, Supply contracts, Competitive bidding and Negotiation, E-procurement

PURCHASING

Objectives, Relations with other departments, Centralized and Decentralized purchasing, Purchasing procedure, Types of orders, Tender buying, Purchasing department records, Computer based systems/EDI.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

SUPPLY CHAIN DISTRIBUTION AND LOGISTICS STRATEGY, INTEGRATION, AND RISK POOLING

Supply chain integration, Facility Sizing/Space Requirements, Warehouse Management Systems, Storage Systems, Order Fulfilment Methodologies, Material Handling Requirements, Distribution Strategies – Traditional Retail, Direct Shipping, Cross-docking, Cross-dock Operations, Distribution Strategies: Pool Distribution, Transshipment, Milk-Run Systems, Classic Techniques of Risk Management, View of (s, S) Policy, Data analysis, Pooling based on Location, Product, lead Time and capacity.

Department of Mechanical Engineering Programme: M. Tech. in Industrial Engineering and Management

Course Title: Enterprise Resource Planning (ERP) Systems Subject Code: ME43231 ME Semester: Second **Core/Elective: Elective Contact Hours and Credits:**

| L | Т | Р | Credit |
|---|---|---|--------|
| 3 | 1 | 0 | 4 |

COURSE OUTCOMES:

At the end of the course, Student will be able:

- 1. To summarize conceptual model of ERP system and to discover scope and functions of ERP system.
- 2. To categorize ERP system and other information system to improve overall performance of an organization.
- 3. To evaluate / measure success of ERP system and other related systems for betterment of an organization.
- 4. To predict present and future of ERP system and e-commerce.

SYLLABUS

INTRODUCTION

Concept of ERP, Origin, Evolution of ERP, Conceptual Model of ERP, The Structure of ERP, Need of ERP, Advantages and Disadvantages of ERP, Functions of ERP, Overview of available ERP Packages and Tools.

ERP AND RELATED TECHNOLOGIES

Business Process Reengineering(BPR), Data ware Housing, Data Mining, Online Analytic Processing(OLAP), Product Life Cycle Management(PLM), Supply chain Management(SCM).

ERP MARKETPLACE AND MARKETPLACE DYNAMICS

Market Overview, Marketplace Dynamics, the Changing ERP Market, ERP in Indian Scenario.

ERP- FUNCTIONAL MODULES: Introduction, Functional Modules of ERP system, Integration of ERP, Supply chain and Customer Relationship Applications.

ERP IMPLEMENTATION, ERP IMPLEMENTATION LIFE CYCLE

ERP Package selection, ERP Transition Strategies, Success and Failure Factors of an ERP Implementation. Measurement of Success of ERP System and other Related Systems.

National Institute of Technology Raipur

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

PRESENT AND FUTURE OF ERP & E-COMMERCE

Future Directives in ERP, ERP and Internet, Future directions and Trends in ERP, ERP-Manufacturing and Managerial Perspectives. Case study using ERP tool, like SAP, ORACLE, JD Edward, BAAN etc.

TEXT BOOKS

- 1. Alexis Leon, "Enterprise Resource Planning", Tata McGraw Hill.
- 2. Alexis Leon, "ERP Demystified", Tata McGraw Hill.
- 3. Dimpi Shrivastava and Aarti Batra, "ERP Systems", I.K. International Publishing House.

REFERENCE BOOKS

- 1. Vinod Kumar Garg and N K Venkitakrishnan, "Enterprise Resource Planning Concepts and Practice", PHI.
- 2. Rahul V. Altekar "Enterprisewide Resource Planning", Tata McGraw Hill.
- 3. Joseph A Brady, Ellen F Monk, Bret Wagner, "Concepts in Enterprise Resource Planning", Thompson Course Technology.
- 4. Mary Summer, "Enterprise Resource Planning"- Pearson Education.

DEPARTMENT OF MECHANICAL ENGINEERING PROGRAMME: M. TECH. IN INDUSTRIAL ENGINEERING AND MANAGEMENT

COURSE Title: COMPUTER INTEGRATED MANUFACTURING CORE/ELECTIVE: ELECTIVE COURSE CODE: ME432410 ME CONTRACT HOURS AND CREDIT SEMESTER: SECOND

| L | Т | Р | Credit |
|---|---|---|--------|
| 3 | 1 | 0 | 4 |

COURSE OUTCOMES:

The student will achieve an understanding of the issues related to computer-integrated manufacturing and the integration of automated processes within a modern manufacturing environment. From the course students are able:

- 1. To select an automated processes in a modern manufacturing environment.
- 2. To express engineering design and modeling techniques towards flexible manufacturing system, robotics, numerical control and the integration of computer control/usage in manufacturing.
- 3. To demonstrate contemporary manufacturing/production strategies such as group technology, rapid prototypes and reverse engineering.
- 4. To describe the operation and applications of PLC and enhance the quality of product by using CIM & CAQC.

SYLLABUS

FUNDAMENTAL OF MANUFACTURING AND AUTOMATION

Production operation and automation strategies, Manufacturing industries, Types of production function in manufacturing, Production concept and mathematical models, Automation strategies. Cost- benefits analysis.

GROUP TECHNOLOGY

Part families, Part classification and coding, Production flow analysis, Machine cell design, Benefits of Group Technology. Industrial Robotics: Robotic programming, Robotic languages, work cell control Robot cleft design, types of robot application, Processing operations.

FLEXIBLE MANUFACTURING SYSTEM

What is FMS?, FMS work station, Material Handling and storage systems, Computer control system, Analysis methods for flexible manufacturing systems, application & benefits.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

COMPUTER INTEGRATED MANUFACTURING

What is CAD, CAM & CIMS? CIM Data base Model and Manufacturing data base. Computer aided process planning, Computer integrated Production Planning system. Brief introduction to concurrent Engineering, Rapid Prototypes and Reverse Engineering.

PROGRAMMABLE LOGIC CONTROLLERS

Parts of PLC, Operation and application of PLC, Fundamentals of Net workings. ; Computer Aided Quality Control: QC and CIM, objectives of CAQC, CMM, Flexible Inspection systems.

Text Books

1. M.P Groover, Automation, Production systems & Computer Integrated Manufacturing- PHI.

2. Boucher, T.O. Computer automation in manufacturing-an introduction, chapman and, Hall, 1996.

3. Yoram Koren, Computer Control of Manufacturing Systems, McGraw Hill International, Singapore, 2006

Reference Books

- 1. Ray, Robots and Manufacturing Automation, John Wiley, New York, 1985.
- 2. Deb, S.R. Robotics technology and flexible automation, Tata MeGraw-Hill, New Delhi, 1994.
- 3. G. Boothroyd and C. Poli, Automation Assembly, Marcel Dekkar, New York, 1982.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

DEPARTMENT OF MECHANICAL ENGINEERING PROGRAMME: M. TECH. IN INDUSTRIAL ENGINEERING AND MANAGEMENT

COURSE TITLE: PRODUCT DEVELOPMENT & MANAGEMENT COURSE CODE: ME43213 ME Semester: Second

| | - | - | a 11 |
|---|---|---|--------|
| L | Т | P | Credit |
| 3 | 1 | 0 | 4 |

COURSE OUTCOMES:

The focus of Product Development and Management is integration of the marketing, development, and managerial decision of the firm in creating a new product. The course is intended to provide the following benefits:

- Competence with a set of tools and methods for product development and design.
- Confidence in the ability to create a new product.
- Awareness of the role of multiple function in creating a new product (e.g. marketing, finance, industrial design, engineering, production).
- Ability to co-ordinate multiple interdisciplinary task in order to achieve a common objective.
- Enhanced team working skills.

SYLLABUS

DEVELOPING PRODUCT

Need for Developing Product, Concept Generation, Key Concept In Innovation, Thinking For Innovation, And Various Element Of The Innovation Cycle, Ideation Involving User Interaction, Need Identification And Co-Creation, Triz: Theory Of Inventive Problem Solving, Assessment Of Potential Of Technology For Success, Producer To User Innovation. "Lead User" Innovation Communities and Innovators, Toolkit to Support Product Development by Customers, Tools and trends in product development.

EVALUATION

Demand Forecasting, Decision Making and Concept Selection, Evaluation Methods

ECONOMIC DECISION MAKING:

Mathematics of Time Value of Money, Cost Comparison, Depreciation Texas Profitability of Investments, Other Aspects of Profitability, Inflation Sensitivity and Break Even Analysis.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

UNDERSTANDING MARKETING MANAGEMENT:

Capturing Marketing Inside, Connecting with Customers, Creating Brand, Setting Product Strategy and Managing Services, Delivering and Communicating Value, Creating Long term Growth.

PROTOTYPING

Familiarization of solid modelling techniques and software. Basic principle of rapid prototyping processes. Industrial RP system, Role of Rapid Prototyping and Rapid Tooling in Product Development and Simultaneous Engineering. Introduction to reverse engineering, Integration of Reverse Engineering and Rapid prototyping, Application and use of Reverse Engineering in Product Development.

(INSTITUTE OF NATIONAL IMPORTANCE) G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

Department of Mechanical Engineering Programme: M. Tech. in Industrial Engineering and Management Lab Title: Project on Product Development Core/Elective: Core Course Code: ME432126 ME

Semester: Second

Contract hours and credit

| | L | Т | Р | Credit |
|---|---|---|---|--------|
| ſ | 0 | 0 | 3 | 2 |

Lab Outcomes

At the end of this lab students will be able to:

- 1. Understand principles and methods of product development.
- 2. Work in teams.
- 3. Carry out multidisciplinary product development activity.

Lab

Central to this lab class is a team-based approach to conceive and develop a new product and present a prototype in the final class session. The goal of this exercise is to learn principles and methods of product development, to improve teamwork skills and to appreciate the inherent multidisciplinary nature of product development. Project ideas for product development come from the students in the class. Guidelines for reasonable projects are given below. The project proposal process is explained in the following sections.

- Project Proposal
 - > Preparation of a project proposal.
 - Identification of appropriate project proposals and selection among the proposed projects.
- Proposal Presentation
 - > A verbal or visual demonstration of the product opportunity.
 - > Explanation of the richness of the market opportunity.
 - > Demonstration of the existing competitive products.
 - > Convincing arguments for product proposal.
- Project Constraints

While special cases will be considered, students will be strongly encouraged to choose a project satisfying all of the following constraints:

- There should be a demonstrable market for the product. One good way to verify a market need is to identify existing products that attempt to meet the need. Product need not be a variant of an existing product, but the market need addressed by the product should be clearly evident. The product does not need to have a tremendous economic potential, but should at least be an attractive opportunity for an established firm with related products and/or skills.
- > The product should require no basic technological breakthroughs.
- Students have access to more than five potential users of their product (more than 20 would be nice).
