‘The Individual and Society’ Concept Note

This course makes the assumption that literature is an important and relevant way of making sense of the world we live in, though literature employs myth, metaphor, fictional characters, irony, rhyme, and other devices of language that might not be seen as legitimate in more ‘scientific’ subjects. By these means, literature can, for example, enable the reader to identify temporarily with people from other cultures and backgrounds, and offer an ‘experience’ of being a Dalit boy rejected by a school (Valmiki’s *Jhootan*), or a Black African rejected as a tenant by a white landlady (Soyinka’s *Telephone Conversation*) – and an opportunity to compare the two. Discussion of one text in the light of other texts is an important part of this course. For example, several of the chosen texts vividly illustrate the socialization of the girl child into roles acceptable to a patriarchal society and show this same phenomenon occurring in widely different cultures – inviting revealing comparisons. At least two pieces use poetic language and irony in very quiet ways to make a devastating criticism of the unnaturalness of war. We expect students to discuss how the use of language and choice of genre affect the writer’s meaning and the reader’s response.

We deliberately chose texts from widely different backgrounds precisely because we wanted the student to appreciate the ways in which his or her situation is comparable or analogous to the experiences of other races, classes or nationalities. We also strongly felt that though our students are Indian, They cannot possible be untouched by western and other cultural influences, and since we live in the so-called ‘global village’ the essays and stories selected should reflect that reality. We have chosen 29 writers in all in this paper and 13 of them are from the Indian subcontinent. Nearly all are twentieth century authors as their themes and experiences are closer to the students’ world.

The course comprises fictional writing, essays of different types and styles, and poems. It is arranged according to themes that we thought would not only be of interest and relevance to students but would be similar to those likely to appear in the new courses of other disciplines. But where a Sociology or Political Science course would handle ‘Gender’, or ‘Race’, etc., according to the specific approaches of those disciplines, our course would bring these concepts to life for the students by literary means and thus reinforce and deepen the impact of the other courses he or she may be studying.

THE COURSE

The course will consist of an anthology, *The Individual and Society*, comprising a wide selection of poems, short stories and prose pieces. These have been grouped under four broad themes: Caste/Class; Gender; Race and Violence and War. Readings will comprise 110 – 120 pages.
