4

Donkey with a bag of salt — fall by accident into a stream — salt dissolves — loss of burden — donkey happy — repeat it next day — glad to fool the master — third day — a huge bag of cotton — donkey on purpose falls into the water — overloaded with extra weight of water — fools himself.

Read the following passage carefully and answer the questions that follow :

6 × 1 = 6

Early rising leads to health and happiness. The man who rises late can have little rest in the course of the day. Anyone who lies in bed late, is compelled to work till a late hour in the evening. He has to go without the evening exercise, which is so necessary for his health. In spite of all his efforts his work will not produce as good results as that of the early riser. The reason is that he cannot take advantage of the refreshing hours of the morning. Some people say that the quiet hour of mid-night is the best time for working. Several great thinkers say that they can write best when they burn the mid-night oil. Yet it is true to say that few men have a clear brain at night when the body needs rest and sleep. Those who work late into night ruin their health. Bad health must, in the long run, have a bad effect on the quality of their work.

Questions :

58. Why is early rising better than rising late ?

59. What has a man who has to work till late hours in the evening to forgo ?

60. Why do some thinkers burn the mid-night oil ?

61. What is the disadvantage of working at mid-night when nature wants the body to rest ?

62. What does the phrase 'burn the mid-night oil' mean ?

63. Suggest a suitable title.
