

Third Semester
Curriculum
MBA (Full Time) 2 Yrs. Program of D.A.V.V., Indore
For
Affiliated Institutions
2009-2011

Third Semester

CORE

FT 301C Strategic Materials & Supply Chain Management

FT 302C Project Management

Students are required to choose two electives. Both electives will have same weightage.

SPECIALISATION

A. Marketing Management

FT 303M Product Policy Management

FT 304M Advertising and Brand Management

FT 305M Sales and Distribution Management

B. Financial Management

FT 303F Tax Planning and Management

FT 304F Financial Systems and Services

FT 305F Bank and Insurance Management

C. Human Resource Management

FT 303H Industrial Relations and Labour Law

FT 304H Human Resource Development & Audit

FT 305H Social Psychology

D. Information Systems Management

FT 303I Object Oriented Programming using C++

FT 304I Management Information System

FT 305I Relational Database Management Systems using ORACLE

E. Production and Operations Management

FT 303P Strategic Technology Management

FT 304P Product Innovation and Planning

FT 305P Work Study and Productivity

FT 301C STRATEGIC MATERIALS AND SUPPLY CHAIN MANAG EMENT

Objective:-

This course would help students develop an understanding about the strategic role of supply chain, key issues of supply chain and the drivers of supply chain performance. The course would acquaint the students with various concepts, models and decision-making tools pertaining to supply chain network design, forecasting, inventory, transportation etc. and also enable them to apply the tools In real-life situation.

Examination Scheme:

The faculty member will award internal marks out of 20 (8 for Tests and 12 for class participation). The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases/Numerical.

Course Contents

1. Importance of materials management, Codification, Simplification, Value analysis, Value engineering, Vendor analysis.
2. Concepts and importance of a Supply Chain (SC). Evolution of Supply Chain Management (SCM), Key issues of Supply Chain Management, Competitive and SC strategies, Achieving strategic fit,
3. Dynamics of supply chain: Supply Chain Interventions, Push-based, Pull-based and Push-Pull based supply chain. Network design and Operations in the Supply Chain,
4. Demand Forecasting in a Supply Chain, The value of information, Bullwhip effect, its Causes and remedial measures.
5. Managing inventory in SC environment: Basic and Advanced inventory models. Multi-echelon inventory models.
6. Transportation in SC environment: Design options for a transportation network,
7. Strategic Outsourcing and Strategic Alliances, Third party and fourth party logistics,
8. Retailer- Supplier partnerships (RSP), Supplier evaluation and selection. Use of best practices.
9. Information Technology (IT) in Supply Chain Management, SC performance model: SCOR model

FT 302C Project Management

Objectives:

To develop understanding of project planning. To develop ability to monitor and control projects and risk involved. To become familiar with tools and techniques used in managing projects.

Examination Scheme:

The faculty member will award internal marks out of 20 (8 for Tests and 12 for class participation). The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases/Numerical.

Course content:

1. Introduction to project and projects. Characteristics and types of projects. Gaining importance, project life cycle and its phases.
2. Project selection, non quantitative and scoring models, technical analysis and technology selection, market potential analysis and techniques of long term forecasting.
3. Financial feasibility, determinants of cost of project, its financing and deciding optimum capital structure. Cash flows from project and owner's perspective. Project Appraisal.
4. Financial feasibility with risk. Types of risk, techniques of risk evaluation and its mitigation. Sensitivity analysis, Hiller's model, scenario analysis, simulation.
5. Network analysis, construction of networks, CPM, various types of floats and their application, PERT and its applications.
6. Time cost relationship, crashing for optimum cost and optimum time. Resource leveling. Introduction to project software and applications of MS Project
7. Human Aspects of Project management: project manager's skills and functions, matrix organization, Social Cost Benefit Analysis, UNIDO approach, shadow pricing.
8. Project monitoring, Earned Value Analysis, abandonment analysis, PMIS, Project Termination and Audit. Reasons for failure.

FT 304H Human Resource Development & Audit

Objective

The objective of the Human Resource Development Course is to provide the students with a clear understanding of the concepts, processes, practices and strategies that form the basis of successful HRD in organizations. The course is intended to facilitate the development of knowledge and skills that HRD specialists need in performing their strategic role. The course strives to facilitate the understanding of how concepts and theories can be put into practice in a variety of organizations. The content of the course is also designed to familiarize students with the role of line managers and HR specialists in HRD.

Examination Scheme:

The faculty member will award internal marks out of 20 (8 for Tests and 12 for class participation). The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases

Course Contents

- 1 HRD Concepts: Definition, Evolution, HRM & HRD. Challenges & Goals of HRD.
- 2 HRD Function: HRD department structure, functions, and staffing
- 3 HRD Professionals: Roles and Competencies,
- 4 Developing HR Strategies: HRD System Design Principles, Systems Approach to HRD. Design & Administration of Select HRD Systems
- 5 Career Management and Development. Mentoring at Workplace. Work-Life Integration, Performance Management System
- 6 HRD & Diversity: HRD for culturally diverse employees. Developing global managers. HRD systems for International managers.
- 7 Applications of HRD: HRD Climate. HRD for managing organizational change. HRD for Workers (blue collar employees)
- 8 HRD Audit: Meaning and Concept, Need, Designing HRD Audit Process, Parameters to be Audited, Audit Results, Preventive and Corrective Actions, Role in Business Improvement, Methodology and Limitations.

FT 305H SOCIAL PSYCHOLOGY

Course Objectives

The Objectives of this course are to understand human behavior in social and industrial settings. A student will be able to comprehend the causes of behavior as well as the methods of improvement by going through this course.

Examination Scheme:

The faculty member will award internal marks out of 20 (8 for Tests and 12 for class participation). The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases

Course Contents

1. Social Psychology: Definition, Nature and Background.
2. Social Perception: Non-Verbal Communication, theories of Attribution, Impression formation and impression management.
3. Social Identity: Self Concept, Self-esteem, Self-efficacy, Self-monitoring and self-focusing.
4. Social Influence: Conformity, Compliance and Obedience.
5. Interviews, Application Blanks and References: the interview, Application blanks and biographical inventories, References and background investigations.
6. Employment Testing: Testing abilities, Testing personality, Testing skills and achievements, Using and not using tests.
7. Safety Psychology: Safety management and safety psychology, Differential accident liability.

FT 303 Object Oriented Programming using C++

Course Objective

The objective of this course is to help students to understand the concepts of Object Oriented programming using C++ and their use in organization and processing complex business information.

Examination Scheme:

The faculty member will award internal marks out of 20 (10 marks for the internal performance of the student and 10 marks for viva voce). The semester examination carrying 80 marks will have 7 questions out of which students will be required to attempt any 5 questions.

Course Contents

1. Object Oriented Programming: Introduction, Advantages of Object Oriented Programming, Procedural versus Object Oriented Languages, Overview of: Objects, Classes, Encapsulation, Data Binding, Inheritance and Polymorphism.
2. Programming with C++: General forms of a C++ programme, I/O with cout and cin, different operators, scope resolution operator, Data types, For while, do-while, if-else, switch and conditional statements, Classes and objects: structure and classes, unions and classes, constructors and destructors, Automatic, external and static data members and member function.
3. Arrays & Pointers: arrays of objects, Pointer to object, the this pointer, Function: General form, Prototypes, returning, passing objects to functions returning objects, friend function, recursion, and references.
4. Inheritance: Multilevel and Multiple Inheritance, Constructor, Destructor and Inheritance, Private, Public and Protected access specifies, function and operator overloading.
5. Functions & Templates: Virtual function, pure virtual function, polymorphism, generic functions, generic types, overloading of templates and functions, standard parameters with template functions, applying generic functions, and generic class.
6. File and Exception handling: Introduction to templates and Exception handling, File Classes, Opening and Closing a file, Reading and writing a text file, detecting EOF

FT 304 Management Information System

Course Objective

The objective of this course is to help the student acquire the basic knowledge of information system so as to enable them to make more efficient use of information for decision making.

Examination

The faculty member will award internal marks out of 20 (10 marks for the internal performance of the student and 10 marks for viva voce). The semester examination carrying 80 marks will have 7 questions out of which students will be required to attempt any 5 questions.

Course Contents

1. The meaning and use MIS, System View of Business, Process of MIS, Development of MIS within the organization, Management Process, Information Needs, System Approach in Planning Organizing and Controlling MIS.
2. Planning, Implementation and Controlling of Management Information System.
3. Fundamentals of Data Processing, Computer Operation of Manual Information System, Components of Computer Systems, Flow Chart, Conversion of Manual to Computer Based Systems, Computer Systems Software, Application Software, Telecommunication Modem.
4. Managerial Decision Making, characteristics and components of Decision Support System.
5. System Design: System design consideration, input/output design, forms design, file organization and database, data management, file design, program design, control and security.

FT 305 RDBMS using ORACLE

Course Objective

The objective of this course is to help students to understand the basics of Relational Database Management System, and back-end Tool using ORACLE and their use in organization and processing complex business information.

Examination Scheme:

The faculty member will award internal marks out of 20 (10 marks for the internal performance of the student and 10 marks for viva voce). The semester examination carrying 80 marks will have 7 questions out of which students will be required to attempt any 5 questions.

Course Contents

1. Database Management Systems: Data, Database, Database Management Systems, Types of Database Management Systems – Relational, Hierarchical, Network, and Object oriented database management systems, Entity Relationship Model (E-R Model) Normalization Theory, Codd's Rules for RDBMS.
2. Relational Database Management Systems: Concepts of RDBMS, Components of RDBMS, Introduction to SQL, Data Definition language, Data Manipulation Language, Query Language, Data Control Language, Cartesian Product and Joins, Use of Union, Intersection, Minus, SQL operators and functions, SQL select statement and type of queries, In, Exists, Group by Having and Like clause in SQL, View, Sequence and synonyms SQLPLUS, creating reports using SQLPLUS.
3. SQL/PLSQL: Introduction to PL/SQL, The PL/SQL block constructs, using variables and SQL statement in the PL/SQL block, PL/SQL constructs like If..Else..Endif, Loop. .Endloop, while loop etc. working master detail relationship, writing triggers informs and creating list of values with cursors, creating and using stored functions, procedures and packages.
4. Advanced Database Concepts: Data mining, data warehousing-design, basic principles, OLAP, transaction management, failure & recovery.

FT 303P Strategic Technology Management

Objective

Objective of this course is provide the students exposure to the concepts of technology management, and technology management issues like technology development, acquisition, absorption, diffusion and technology support systems.

Examination Scheme

The faculty member will award internal marks out of 20 (8 for Tests and 12 for class participation). The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases

Course Contents

1. Technology Issue and Implications: Concepts and Definition, Aspects and Issues,
2. Technology Change: Implication
3. Technology Development and Acquisition: Forecasting and Decasting, Identifying
4. Technological Change, Generation and Development and Technology Transfer..
5. Technology Absorption and Diffusion: Absorption: Accommodate and Management
6. Technological Change, Evaluation and Assessment and Diffusion
7. Technology Environment: Science and Technology in India, Policies, Linkages.
8. Technology Support Systems: Financing, Information Systems, Organization at Enterprise Level.

FT 304P Product Innovation and Planning

Objective

Improve the understanding of and competence in making product-market choices, managing brands, and managing new product introduction. Explore the emerging concepts, techniques, and analytical approaches relevant to the above areas. The emphasis will be on the application of concepts and tools used in PPC for achieving efficiency and quality superiority.

Examination Scheme:

The faculty member will award internal marks out of 20 (8 for Tests and 12 for class participation). The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases/Numerical

Course Contents

1. Product strategy Proposed Product Planning Model-Setting Objectives, Monitoring the Environment, Situation Analysis, Development of a Product/Market Program, Product Mix Strategy. Analysis of product line and product mix decisions.
2. Idea generation, concept and product development and evaluation, and business analysis. Characteristics of Successful Product Development, New Product Development Process and Organizations.
3. Testing products and other critical elements of marketing mix. Test Marketing Objectives, Limitations of Test Marketing, Design Consideration in Test Marketing, Alternatives to test Marketing Procedures, Product Launch Tracking, Relaunch. Test market planning, evaluation, and introduction strategies.
4. Materials Planning and Control: Input Required for Materials Planning and Control, Steps in Materials Planning and Control, Techniques of Materials Planning and Control, Machining Allowances, Make or Buy Decision, Scientific Stock Control Techniques (Inventory Control Models).
5. Factors Influencing Process Planning: Step in Process Planning and Process Selection.
6. Manufacturing resource planning (MRP II): Introduction, Aggregate production planning, master production scheduling, MRP II (Introduction, concepts), MRP II with Just in Time, choice of software, making MRP II system work, achieving business objectives with MRP II.
7. Scheduling: Factors Influencing Scheduling, Working and Scheduling Charts, Job Sequences (n job on two machines, n job on three machines), Project Scheduling, Critical Ratio Scheduling.

8.Capacity Planning: Capacity Planning, Integrated Production Planning and Control.

FT 305P Work Study and Productivity

Objective

The objective of the course is to expose students to the of productivity and various techniques of time and motion study, and help them develop abilities and skills required for the enhancement of value and productivity.

Examination Scheme

The faculty member will award internal marks out of 20 (8 for Tests and 12 for class participation). The semester examination carrying 80 marks will have two sections A and B. Section A worth 60 marks will have 6 theory questions out of which students will be required to attempt any four questions. Section B carrying 20 marks will contain one or more cases/Numerical

Course Contents

1. Concepts and Definition of Productivity, Productivity Improvement Factors (Both Internal and external to the Organization)
2. Work Content of a Job, Management Techniques to Reduce Work Contents and Ineffective Time.
3. Human Aspects in Application of Work. Study.
4. Introduction and Selection of Jobs, Flow Diagram, String Diagram, Flow Process Chart, Multiple Activity Chart, Travel Chart ..
5. Principles of Motion Economy, Classification of Movements, Micro Motion' Study, Simo-chart.
6. Purpose, Use Techniques and Procedure of Work Measurement, Time Study, Selecting Jobs to be
7. Studied and Making a Time Study, Rating, Allowance, Techniques of Work, easurement, Activity
8. Sampling, Synthesis, Analytical Estimating, Predetermined motion Time Systems.

Text Readings

Barnes, **Motion and Time Study Design and Measurement of Work**, 2009, Wiley
International Labour Office, Geneva, **Introduction to Work Study**, Universal Book Corporation, 3rd Revised Ed.,
