Privatisation is no panacea when it comes to education. Nor can high-cost intervention at the tertiary stage

produce quality talent. The backbone of quality education is primary schooling. And improving that is not just a question of funding. The government has taken some steps to improve the situation by increasing the percentage of allocation in the budget. But It has done precious little to increase the efficacy of public spending in education. For that is a political and administrative task. Teachers who do not turn up to teach at rural schools (absenteeism is about 30% according to one estimate) and teachers who are not equipped or motivated to teach but continue in service with challenge are part of India's socio-political reality.

- 61. The Indian Government has not done enough to improve the quality of secondary education.
- 62. Allocating more funds in the budget for primary education will substantially improve the quality of education.
- 63. Quality of education is ensured in all the privately run educational institutions in India.
- 64. Government has been unsuccessful in achieving the desired result in education.
- 65. Motivating the primary school teachers and improving attendance of these teachers are major challenges in India.

Directions (181-195): Read the following passage carefully and answer the questions given below it. Certain words have been printed in **bold** to help you locate them while answering some of the questions.

The great fear in Asia a short while ago was that the region would suffer through the wealth destruction already taking place in the U.S. as a result of the financial crisis. Stock markets tumbled as exports plunged and economic growth deteriorated. Lofty property prices in China and elsewhere looked set to bust as credit tightened and buyers **evaporated**. But with surprising speed, fear in Asia swung back to greed as the region shows signs of recovery and property and stock prices are soaring in many parts of Asia.

Why should this sharp Asian turnaround be greeted with skepticism? Higher asset prices mean households feel wealthier and better able to spend, which could further fuel the region's nascent rebound. But just as easily, Asia could soon find itself saddled with overheated markets similar to the U.S. housing market. In short **the world has not changed, it has just moved places**.

The incipient bubble is being created by government policy. In response to the global credit crunch of 2008, policy makers in Asia slashed interest rates and **flooded** financial sectors with cash in frantic attempts to keep loans flowing and economies growing. These steps were logical for central bankers striving to reverse a deepening economic crisis. But there's evidence that there is too much easy money around.

It's winding up in stocks and real estate, pushing prices up too far and too fast for the underlying economic fundamentals. Much of the concern is focused on China, where government stimulus efforts have been large and effective. Money in China has **been** especially easy to find. Aggregate bank lending surged 201% in the first half of 2009 from the same period a year earlier, to nearly \$1.1 trillion. It's a sign of a quick recovery which was given a boost by China's surprisingly strong 7.9% GDP growth in the second quarter - has **buoyed** investor sentiment not just for stocks but also for real estate.

Former U.S. Federal Reserve Chairman Alan Greenspan argued the bubbles could only be recognised in hindsight. But investors - who have been well schooled in the dangers of bubbles over the past decade are increasingly wary that prices have risen too far, and that the slightest bit of negative economic news could knock markets for a loop. These fears are compounded by the possibility that Asia's central bankers will begin taking steps to shut off the money. Rumours that Beijing was on the verge of tightening credit led to Shanghai stocks plunging 5%. Yet many economists believe that, "there is close to a zero possibility that the Chinese government will do anything this year that constitutes tightening." And without a major shift in thinking, the easy-money conditions will stay in place. In a global economy that has produced more dramatic ups and downs than anyone thought possible over the past two years, Asia may be heading for another disheartening plunge.

51. (3) Anuj Soren does not satisfy criterion (i) or (a). Therefore, he cannot be selected.

52. (2) Namita Jaiswal does satisfy all the criteria. Therefore, she can be selected.

53. (5) Abhinav Ghosal does satisfy criteria (i), (ii), (b), (iv) and (v). Therefore, his case would be referred to ED-Personnel.
54. (4) Sohan Awasthi does satisfy criteria (a), (ii), (iii), (iv) and (v). Therefore, his case would be referred to GM- Personnel.
55. (1) There is no information regarding criterion (v), i.e., the marks in Personal Interview.
56. (5) It is obvious that both the assumptions are implicit in the statement. The Government has taken step assuming that decongestion of the roads will improve. Again, people may wish to use the separate lane.
57. (2) The assumption I is not valid. Assumption II seems to be implicit in the statement. It is clearly mentioned that the civic authority will assess the impact of the current building projects on the city's amenities in six months.
58. (1) Assumption II is not valid. People will avoid hardship during journey. Assumption I is implicit in the statement.
59. (4) The Government has directed all the degree colleges to declare results of all the examinations within a fortnight assuming that college authority is able to accomplish the task.
- Thus, none of the assumptions is implicit in the statement.
60. (5) Clearly both the assumptions are implicit in the statement.
61. (1) The contents of the passage clearly indicate that the Government has done very little to improve the quality of education.
62. (2) Consider the third line of the passage. It indicates that fund is one of factors for improving quality of education. Therefore, the inference is probably true as the inference mentions the term "substantially".
63. (5) Consider the very first line of the passage :
"Privatisation is no panacea when it comes to education".
It clearly indicates that quality of education is not guaranteed even in the private institutions.
64. (1) The theme of the passage indicates that the Inference is definitely true.

65. (1) The last three line of the passage clearly indicate that the Inference is definitely true.
66. (4) From Problem Figure (1) to (2) the middle design does not change while the other two designs move one-half step in anticlockwise direction after being rotated through 90° anticlockwise. From Problem Figure (2) to (3) one of the designs move to the opposite side. These two steps are continued alternately in the subsequent figures.

67. (4) The following changes occur in the subsequent figures :
- (1) to (2) (2) to (3)

These two steps are continued alternately in the subsequent figures.

68. (1) The following changes occur in the subsequent figures :
- (1) to (2) (2) to (3)

These two steps are continued alternately in the subsequent figures.

69. (2) The following changes occur in the subsequent figures:

These three steps are continued in the same order in the subsequent figures.

70. (5) From Problem Figure (1) to (2) the leftmost and the rightmost designs interchange positions. Similarly, the two pairs of vertical designs interchange positions among themselves and the two central

designs are replaced with new designs. Similar changes occur from Problem Figure (3) to (4) and from Problem Figure (5) to Answer Figure.

71. (3) From Problem Figure (1) to (2) the shaded part of the central design becomes white and vice-versa, while the other four designs move one step in clockwise direction after being rotated through 90° anticlockwise. Similar changes occur from Problem Figure (3) to (4) and from Problem Figure (5) to Answer Figure.
72. (5) The design (B) moves one step in anticlockwise direction after being rotated through 90° clockwise. Now we can eliminate Answer Figures (3) and (4). The circle moves one step in clockwise direction after every two figures. Now we can eliminate Answer Figure (1).

73. (1) In the subsequent figures respectively two, three, three, four, four..... elements are added to complete the pattern.

74. (2) In each step the plane of design rotates through 45° anticlockwise and from Problem Figure (1) to (2) the first and the last designs are replaced with new designs. From Problem Figure (2) to (3) the first design moves to the last position. These two steps are continued in the subsequent figures alternately.

75. (3) The following changes occur from Problem Figure (1) to (2) :

Similar changes occur from Problem Figure (3) to (4) and from Problem Figure (5) to Answer Figure

$$76. (4) ? = \frac{15 \times 578}{100} + \frac{22.5 \times 644}{100}$$

$$= 86.70 + 144.90 = 231.6$$

$$77. (2) ? = (3 + 4 - 3) + \left(\frac{3}{4} + \frac{2}{5} - \frac{1}{8} \right)$$

$$= 4 + \left(\frac{30 + 16 - 5}{40} \right)$$

$$= 4 + \frac{41}{40} = 5\frac{1}{40} = 4 + \frac{41}{40} = 5\frac{1}{40}$$

78. (3) $345 - 60 + \frac{?}{31} = 292$

$$\Rightarrow \frac{?}{31} = 292 - 285 = 7$$

$$\Rightarrow ? = 31 \times 7 = 217$$

79. (1) $? = \frac{343 \times 49}{216 \times 16 \times 81}$

$$= \frac{7^3 \times 7^2}{(2 \times 3)^3 \times 2^4 \times 3^4} = \frac{7^5}{6^7}$$

80. (5) $\sqrt{25 \times 14 - 42 + (4)^2} = 18$

$$\Rightarrow 350 - 42 + (4)^2 = 18 \times 18$$

$$\Rightarrow 308 + 4^2 = 324$$

$$\Rightarrow 4^2 = 324 - 308 = 16 = 4^2$$

$$\Rightarrow ? = 2$$

81. (2) Let the present ages of Tia and Rakesh be $9x$ and $10x$ years respectively.

10 years ago,

$$\frac{9x - 10}{10x - 10} = \frac{4}{5}$$

$$\Rightarrow 45x - 50 = 40x - 40$$

$$\Rightarrow 5x = 10 \Rightarrow x = \frac{10}{5} = 2$$

\therefore Rakesh's present age

$$= 10x = 10 \times 2 = 20 \text{ years.}$$

82. (3) $2\pi r_1 = 132$

$$\Rightarrow 2 \times \frac{22}{7} \times r_1 = 132$$

$$\Rightarrow r_1 = \frac{132 \times 7}{2 \times 22} = 21 \text{ metre}$$

Similarly,

$$2\pi r_2 = 176 \Rightarrow r_2 = \frac{176 \times 7}{2 \times 22} = 28 \text{ m}$$

\therefore Difference between their ar

$$= \pi (r_2^2 - r_1^2) = \pi (r_2 + r_1)(r_2 - r_1)$$

$$= \frac{22}{7} \times 49 \times 7 = 1078 \text{ sq. metr}$$

$$= 7400 \left[(1.135)^2 - 1 \right]$$

$$= 7400 \times 0.288225 = \text{Rs. } 2132.87$$

(1) The word 'OFFICES' consists of 7 letters out of which letter 'F' comes twice.

\therefore Total number of arrangements

$$= \frac{7!}{2!}$$

$$= \frac{7 \times 6 \times 5 \times 4 \times 3 \times 2 \times 1}{2 \times 1} = 2520$$

1. (2) Let Mona's investment = Rs. 100

\therefore Sonu's investment = Rs. 110

and Raghu's investment = Rs. $\frac{1000}{9}$

\therefore Ratio of Mona's, Sonu's and Raghu's investments

$$= 100 : 110 : \frac{1000}{9}$$

$$= 90 : 99 : 100$$

$$\text{Sum of ratios} = 90 + 99 + 100 = 289$$

\therefore Raghu's investment

$$= \text{Rs. } \left(\frac{100}{289} \times 5780 \right) = \text{Rs. } 2000$$

6. (3) The pattern is :

$$13 + 12 = 25 ; 25 + 15 = 40.$$

$$40 + 18 = 58 \neq \boxed{57}$$

$$58 + 21 = 79$$

17. (1) The pattern is :

$$850 - 200 = 650 \neq \boxed{600}$$

$$650 - 100 = 550$$

$$550 - 50 = 500$$

$$500 - 25 = 475$$

$$475 - 12.5 = 462.5$$

88. (4) The pattern is :

$$2 \times 3 = 6 \neq \boxed{10}$$

$$6 \times 3 = 18 ; 18 \times 3 = 54$$

$$54 \times 3 = 162$$

89. (3) The pattern is :

$$8 + 4 \times 1 = 12 ; 12 + 4 \times 3 = 24$$

$$24 + 4 \times 5 = 44 \neq \boxed{46}$$

$$44 + 4 \times 7 = 72$$

$$72 + 4 \times 9 = 108$$

90. (1) The pattern is :

$$142 - 23 = 119 ; 119 - 19 = 100$$

$$100 - 17 = 83$$

$$83 - 13 = 70 \neq \boxed{65}$$

$$70 - 11 = 59$$

$$59 - 7 = 52$$

(3) I. $2x^2 + 7x + 4x + 14 = 0$

$$\Rightarrow x(2x + 7) + 2(2x + 7) = 0$$

$$\Rightarrow (x + 2)(2x + 7) = 0$$

$$\therefore x = -2 \text{ or } -\frac{7}{2}$$

II. $4y^2 + 2.2y.3 + 9 = 0$

$$\Rightarrow (2y + 3)^2 = 0$$

$$\Rightarrow 2y + 3 = 0$$

$$\Rightarrow 2y + 3 = 0$$

$$\Rightarrow 2y + 3 = 0$$

$$\therefore y = -\frac{3}{2}$$

Clearly, $x < y$

2. (1) I. $(x - 2)(x + 2) = 0$

$$\therefore x = 2 \text{ or } -2$$

II. $y^2 + 2.y.3 + 9 = 0$

$$\Rightarrow (y + 3)^2 = 0$$

$$\Rightarrow y + 3 = 0$$

$$\therefore y = -3$$

Clearly, $x > y$

3. (2) I. $x^2 - 4x - 3x + 12 = 0$

$$\Rightarrow x(x - 4) - 3(x - 4) = 0$$

$$\Rightarrow (x - 3)(x - 4) = 0$$

$$\therefore x = 3 \text{ or } 4$$

II. $y^2 + 4y - 3y - 12 = 0$

$$\Rightarrow y(y + 4) - 3(y + 4) = 0$$

$$\Rightarrow (y - 3)(y + 4) = 0$$

$$\therefore y = 3 \text{ or } -4$$

Clearly, $x \geq y$

4. (4) I. $x^2 = 729$

$$\therefore x = \sqrt{729} = \pm 27$$

II. $y = \sqrt{729} = +27$

$$\therefore y = \sqrt{729} = +27$$

Clearly, $x \leq y$

95. (5) I. $x^4 = 227 + 398 = 625 = 5^4$

$$\Rightarrow x = 5$$

II. $y^2 = 346 - 321 = 25 = 5^2$

$$\Rightarrow y = 5$$

Clearly, $x = y$

96. (4) Average of percentage of marks in science

$$= \frac{91 + 87 + 81 + 70 + 49 + 42}{6}$$

$$= \frac{420}{6} = 70\%$$

\therefore Required average marks in science

$$= \frac{125 \times 70}{100} = 87.5$$

97. (3) Marks obtained by student F in :

$$\text{Hindi} \Rightarrow \frac{175 \times 74}{100} = 129.50$$

$$\text{English} \Rightarrow \frac{80 \times 68}{100} = 54.40$$

$$\text{Science} \Rightarrow \frac{125 \times 42}{100} = 52.50$$

∴ Required average marks

$$= \frac{129.5 + 54.4 + 52.5}{3} = 78.8$$

8. (2) Required marks

$$= \frac{175 \times 48}{100} + \frac{120 \times 55}{100} + 94$$

$$= 84 + 66 + 94 = 244$$

9. (1) Required ratio

$$= \frac{125 \times 49}{100} : \frac{175 \times 83}{100} = 35 : 83$$

10. (5) Minimum marks = 101 = x% (let)

$$\therefore \frac{x \times 125}{100} = 101$$

$$\Rightarrow x = \frac{101 \times 100}{125} = 80.8$$

Clearly, students D, E and F cannot opt for science.

$$11. (2) ? = \frac{18 \times 600}{100} + \frac{28 \times 450}{100}$$

$$[609 \approx 600 ; 27.5 \approx 28]$$

$$= 108 + 126 \approx 234$$

∴ Required answer = 233

$$3. (4) ? = \frac{23}{10} \times \frac{34}{7} \times \frac{15}{2} \approx 84$$

$$4. (4) ? \approx 12.6 \times 22 \times 18 \approx 4989.6$$

∴ Required answer = 4959

$$5. (3) ? = 17 + 27 + 37 - 13 - 9 \approx 59$$

∴ Required answer = 60

$$\text{Number of female players} = 600 - 440 = 160$$

For female players

$$\text{Athletics} \Rightarrow \frac{30 \times 160}{100} = 48$$

$$\text{Table tennis} \Rightarrow \frac{160 \times 10}{100} = 16$$

Remaining players

$$= 160 - 48 - 16 = 96$$

$$\text{Kho-kho} \Rightarrow \frac{1}{4} \times 96 = 24$$

$$\text{Lawn tennis} \Rightarrow \frac{3}{4} \times 96 = 72$$

For male players :

$$\text{Athletics} \Rightarrow \frac{3}{8} \times 440 = 165$$

$$\text{Remaining players} = 440 - 165 = 275$$

$$\text{Lawn tennis} \Rightarrow \frac{4 \times 275}{100} = 11$$

$$\text{Kho-kho} \Rightarrow \frac{3}{8} \times 264 = 99$$

$$\text{Table tennis} \Rightarrow \frac{5}{8} \times 264 = 165$$

106. (2) Number of female players participating in athletics and kho-kho = 48 + 24 = 72

107. (3) Required ratio = 11 : 16

108. (1) Required difference = 99 - 72 = 27

109. (5) Required number of players = (16 + 165) + (48 + 165) = 181 + 213 = 394

$$= \text{Rs. } 1339200$$

21. (2) Average number of students in college A

$$= \left(\frac{20 + 40 + 45 + 50 + 70 + 75}{6} \right) \text{ thousands}$$

$$= 50000$$

22. (1) Percentage increase

$$= \left(\frac{70 - 65}{65} \times 100 \right) = 7.69 \approx 8$$

23. (4) Required ratio

$$= (40 + 50 + 70) : (30 + 60 + 85)$$

$$= 160 : 175 = 32 : 35$$

24. (3) Total number of students in college B over years

$$= 390 \text{ thousands}$$

$$\text{Number of students in college B in 2008} = 85 \text{ thousands}$$

∴ Required percentage

$$= \frac{85}{390} \times 100 \approx 21.79$$

25. (3) It is obvious from the diagram. The rise in the year 2004 was 100 per cent for both the colleges A and B
